Thread: [Charny Email Bomber \[Check this out! \]](#)

Charny - January 4, 2010, 12:33 am

Hello, Charny Email Bomber (CEB) is my first 'Hacking tool'.

It will send an amount of messages to a desired Email. It's made with C#.

Pictures :

[\[IMG\]http://img46.imageshack.us/img46/4402/47114171.png\[/IMG\]](http://img46.imageshack.us/img46/4402/47114171.png)

[\[IMG\]http://img46.imageshack.us/img46/4944/32807911.png\[/IMG\]](http://img46.imageshack.us/img46/4944/32807911.png)

You must use a Gmail account or it won't work. But you can send the message to any type of account.

Download :

[\[img\]http://host-a.net/Charny/Charny%20Email%20Bomber.exe/link.png\[/img\]](http://host-a.net/Charny/Charny%20Email%20Bomber.exe/link.png)

If you are still sending messages when you close the application, the process will be running until the message are all sent. So you must press the 'Stop' button before closing the application, it will kill the process.

Please post comments and suggestions and if you find a bug, post it here.

N.B : English isn't my primary language, so don't complain about my spelling errors. Thanks Charny

Cmon guys, I want some feedback.

supapig - January 4, 2010, 11:39 am

DONT DOWNLOAD THIS TOOL

U stupid dumbshit it dont work !!! u can try set email : test@gmail.com and pass dasdn514aleqw and it says complete stupid fake from mf.. Its keylogger because ive closed program and proccess still running :X!

Charny - January 4, 2010, 11:41 am

Uhh??? Are you serious ? It's 100% safe, wow you are an idiot.

edit : I don't even know how keyloggers works + what is FUD?

edit2 : for the process, I don't know why it's still running, and for the other thing, I will try to fix that, give me a second. and if you want, I can post the source code, so you will see that there is no malware in this application.

edit3 : I tried with the example that you said, test@gmail.com and pass dasdn514aleqw. It doesn't says complete :

supapig - January 4, 2010, 12:00 pm

I think this us keylogger because process still running ... fix process and ill try it again

Charny - January 4, 2010, 12:02 pm

Hmm.. There is no method to check the sender email in this program, so it doesn't check if the sender email is valid, it only check if the receiver email is valid. So, you should try with a real gmail account, you will see it works.

And please don't start flaming or I will report your posts.

Thanks, Charny.

Edit : for the process, I'm kinda new with programming, so I will try to find a way to fix it. If I fix it, I will post the new link.

Ok, if you are still sending messages when you close the application, the process will be running until the message are all sent. So you must press the 'Stop' button before closing the application, it will kill the process.

Ok, if you are still sending messages when you close the application, the process will be running until the message are all sent. So you must press the 'Stop' button before closing the application, it will kill the process.

Was just about to say that :D

You all need to fucking chill ok? I hate flammers so much fucking hell.

Charny - January 4, 2010, 1:49 pm

Thanks Talish,

Did you try it ?

Charny - January 5, 2010, 5:49 pm

I want some feedback please.

Macadelic - January 5, 2010, 5:51 pm

I like how you act like you don't know keylogging.

Charny - January 5, 2010, 5:54 pm

Uhh? I seriously doesn't know anything about keylogging. I can send you the source code if you think it has a keylogger.

kenzor101 - January 5, 2010, 8:08 pm

Mmmm.. that looks nice ill test it later.

Charny - January 5, 2010, 8:23 pm

Thanks :)

[toshort]

Charny - January 6, 2010, 8:21 pm

I will probably release a new version tomorrow.

Charny - January 8, 2010, 2:06 pm

I need some suggestions.

Zher0 - January 8, 2010, 2:09 pm

Ok...could we get a mod to check this out because theirs so much debate over this...its funny people learn how to keylogg on these forums then they try it out in a different section...funny

The End Gamer - January 8, 2010, 2:11 pm

U Know That I Won't Download it Because U have 30 posts
But Thanks For Sharing it =)

Charny - January 8, 2010, 2:53 pm

it's 100% safe but if you don't want to download it, that's your choice. And if a mod see this, I hope he will check it and tell you that it safes.

Charny.

hackstock - January 8, 2010, 2:58 pm

yea it is safe but it doesnt work :)

Charny - January 8, 2010, 3:02 pm

Yes it works. What did you enter in the fields?

You must use a Gmail account.

evil_genius - January 8, 2010, 3:33 pm

all i can say is LOL !

Charny - January 8, 2010, 3:53 pm

(Jan 8, 2010 04:33 PM)evil_genius Wrote: [\[CITE\]](#) all i can say is LOL !

Why are you saying that?

Charny - January 9, 2010, 9:00 pm

I need some suggestions? A better GUI? More features? Please let me know.

Charny - January 22, 2010, 2:26 pm

I still need suggestions!

BaNNED - January 22, 2010, 6:02 pm

charny is good coder ,

Because i love his script maker .

Also all charny's program are verified by HH Analyzers . But that is doesn't mean the program is SAFE . So if you don't want to use it , then just don't download . Or analyze by yourself.

Anyway i sure its not backdoored !!! .

charny ,

I will test it later .

Byte - January 22, 2010, 6:20 pm

It works, but they kinda send slow... took 2 minutes to send 15 emails.

Charny - January 22, 2010, 7:49 pm

Ok thanks guys, I will try to fix the bugs :)

Charny - January 27, 2010, 3:13 pm

BUMP!

[TOOOOOOSHORT]

Charny - January 29, 2010, 1:45 pm

Bump!

I want some suggestions :)

Delusional - January 29, 2010, 1:49 pm

i like the GUI (:

did you coded in VB.NET ?

Charny - January 29, 2010, 1:56 pm

Thanks :D

And it's coded in C#.

Delusional - January 29, 2010, 2:03 pm

this GUI made by you ? or just a windows theme ? (:

Charny - January 29, 2010, 2:18 pm

I used visual C# 2008 to make the gui.

Delusional - January 29, 2010, 2:28 pm

really nice i like it f*ckin much (:

-mothered- - January 29, 2010, 4:08 pm

Negative or positive replies, either way I will download and try It on my test lappy(s).
Thanks for sharing :)

Charny - January 29, 2010, 4:46 pm
Your welcome ;)

And please give me some suggestions :p

Apache Server - February 1, 2010, 2:13 am
i will download and try

deli_kral - February 1, 2010, 3:44 am
Thank you for sharing Let's look at

Charny - February 1, 2010, 5:12 am
Thanks for the comments guys ;)

melacute - March 2, 2010, 4:24 pm
works great for me :D i try to my friend hehehhe thx

(,)_____charny_____(",)

Charny - March 2, 2010, 4:25 pm
You're welcome ;)

Enjoy.

Beck - April 23, 2010, 5:25 pm
Looks very nice, Charny.

Look forward to more new tools you release, will certainly check them out, ;)

By the way, for the features part, try to input a anonymous prank mail function, so that you can put any e-mail you want, and it will show and prank the user who gets the e-mail with the e-mail you have typed in, any e-mail, like even billgates@superman.com.

And, add a attachment function, so that you can send attachments to the person so they can open a file with the e-mail if they want to.
