Thread: [\[TUT\]\[EASY\]NOOB FRIENDLY - MAKE A KEYLOGGER\[TUT\]](#)

Kill4joy KJ-Vulcan Tools - February 20, 2012, 4:06 pm

First, you will need to download the keylogger from [this thread](#).

I will try to make this as noob friendly as possible, and explain everything as I go.

Step 1: The Email

After you downloaded the program, open it up and you should see the builder. Input YOUR email username & password into the boxes. The reason we are doing this is because the keylogger will log INTO your email, then email yourself the logs. I recommend making a new email specifically for keylogging.

Select what email provider you are using here. If you are using gmail, select the first provider, if you are using yahoo, select the second provider, if you are using hotmail or live, select the third option.

Input the subject of the message you will receive every time you receive a keylog. Most people put "Runescape Logger" or something similar.

I recommend checking both of these boxes. The computer info will send the victim's IP address and their computer name. The screenshot will send a picture of the victim's screen whenever the log was sent.

This is the time in between the logs. I usually recommend 5-15 minutes.

At this point I suggest you click Test Email and make sure everything is working fine.

--

Step 2: The Icon

This is what the Icon of the output file will be. It will ONLY take in .ico's. If you do not have any, I suggest either downloading them online, or you can get some from this thread:

<https://hackforums.net/showthread.php?tid=1107879>

Some anti-viruses will detect an icon if it has been used before for malware, so I recommend getting some more obscure icons that have not been used before. After you locate the .ico it should appear in the box located to the right of the browse button.

--

Step 3: Options

Click the Extra Options Tab at the top of the builder.

[img]http://screensnapr.com/e/PaVLpK.png[/img]

The add to startup option will make the victim file go on startup on the victim's computer, so whenever he reboots his computer, he will become keylogged again. The melt option will make the file go hidden when it is first run. I usually recommend that you check both of them.

[img]http://screensnapr.com/e/9ON8ZI.png[/img]

This option will allow you to display an error message when the file is first run by the victim. Common messages are "This file is not compatible with your computer."

[img]http://screensnapr.com/e/BrHaGi.png[/img]

The Use Downloader function will download and execute a file on the first run of the victim file. You can do this if you want it to execute many different viruses, its a better alternative to binding. Make sure you put a direct link to the file.

The Website Visitor function will automatically visit the website on run. It will pop up in the default web browser.

[img]http://screensnapr.com/e/5QkH5b.png[/img]

I strongly recommend that you check both of these functions. They will decrease the detection rate and make your logger more secure from whalers. I also recommend that you click Generate Key a few times to get a unique key. This is generating an encryption key to keep all of your information secure.

--

Step 4: Assembly

Now click on the Assembly & Build Tab.

[img]http://screensnapr.com/e/PyQ23Y.png[/img]

Click the "Randomly Generate" button. Now you can change the assembly to whatever you want it to say. For example, if you want to disguise this as a runescape product, you should change the company to "Jagex LTD." and the Product to "Runescape" and the Copyright to "Jagex LTD. All Rights Reserved". I do not suggest changing the version and File Version.

Below is an example:

[img]http://screensnapr.com/e/aMYtM8.png[/img]

[img]http://screensnapr.com/e/GAdQLx.png[/img]

This is a file pumper, it will increase the size of the output file. You should keep this at 0 unless you want to increase the size of your victim file.

--

Step 5: Build

[img]http://screensnapr.com/e/sHtgMl.png[/img]

Change the File Name to whatever you are disguising the file as, for example you can change it to "Runescape Pin Generator". Now click build. Wait a bit and it should give you the following message:

[img]http://screensnapr.com/e/s8xnTP.png[/img]

All you have to do now is go to the folder where your builder is located and you should notice your victim file. You can send it to all your friends now! Remember, to tell which anti-viruses detect your file ONLY use elementscanner.com. Do not use ANY other site.

LegacY96 - February 20, 2012, 4:14 pm

Great looking tut!! Thanks a ton for this man!

Kill4joy KJ-Vulcan Tools - February 20, 2012, 5:32 pm

thank you, I hope a lot of people benefit from this!

whygetddosed - February 20, 2012, 6:10 pm

another great guide kj keep up the good work

Lonely - February 20, 2012, 6:28 pm

Why use a Keylogger, When you could use a RAT?

#TeamRAT

Kill4joy KJ-Vulcan Tools - February 20, 2012, 6:33 pm

(Feb 20, 2012 07:28 PM)?illuminati? Wrote: [\[CITE\]](#) Why use a Keylogger, When you could use a RAT?

#TeamRAT

keyloggers are easier to set up, this on is FUD(currently) you do not need to portfoward, the file size is far less(27kb) and the stability is far higher then most rats.

Zumoto - February 20, 2012, 8:14 pm

Thanks for this it works great!

35charactersistoolongofamessagessometimes

Ace Coder - February 20, 2012, 8:33 pm

Fantastic work and great tutorial. Thank you very much!

troyer - February 20, 2012, 8:48 pm

Would this keylogger work on a mac? Nice tut man!

Keep the good work up

Slaytanic - February 21, 2012, 4:30 am

Hi i tried to test using this by doing it to myself and i couldnt send an exe file through gmail?

is there anyway around this?

thanks in advance

TheBavas - February 21, 2012, 5:34 am

Thankyou! well,does it capture unicoded words?!for eg. if i want to infect a user who uses unicoded usernames! would this logger useful in that way?

m4teusz - February 21, 2012, 6:38 am

Great tut!

Thank you very much for the great tut

Thankx mate

XMaster - February 21, 2012, 7:52 am

Doesnt work for me. i have do a gmail and a live.de mail account and nothing is working

RULE? - February 21, 2012, 11:21 am

How can i make this FUD. I cant upload to mediafire atm.

KiruKashi - February 21, 2012, 11:58 am

(Feb 20, 2012 07:33 PM)Kill4joy KJ-Vulcan Tools Wrote: [\[CITE\]](#) keyloggers are easier to set up, this on is FUD(currently) you do not need to portforward, the file size is far less(27kb) and the stability is far higher then most rats.

FUD!

O_O.

Made me smile ;)

I'll try this.

ricco19 - February 21, 2012, 1:53 pm

nice tut man ,.. thanks for good jobb

v0ise - February 21, 2012, 2:04 pm

Thanks for your time and effort in constructing this tutorial!

PCP008 - February 21, 2012, 3:15 pm

The email dosent work for me any help mate?

Kill4joy KJ-Vulcan Tools - February 21, 2012, 3:22 pm

(Feb 21, 2012 04:15 PM)PCP008 Wrote: [\[CITE\]](#) The email dosent work for me any help mate? yeah sure, make sure you can send emails too, send atleast 2-3 emails for your email before using it for the logger.

PCP008 - February 21, 2012, 3:25 pm

(Feb 21, 2012 04:22 PM)Kill4joy KJ-Vulcan Tools Wrote: [\[CITE\]](#) yeah sure, make sure you can send emails too, send atleast 2-3 emails for your email before using it for the logger.

Many thanks for such fast reply can i use the same email to send the spoof 2-3? or multiple?

Kill4joy KJ-Vulcan Tools - February 21, 2012, 3:31 pm

(Feb 21, 2012 04:25 PM)PCP008 Wrote: [\[CITE\]](#) Many thanks for such fast reply can i use the same email to send the spoof 2-3? or multiple?

I am not quite sure what you mean, just make sure the email you are using can properly send out messages before using it for your keylogger. some email providers block the smtp for a new email until it has sent out a certain amount of emails.

PCP008 - February 21, 2012, 3:32 pm

(Feb 21, 2012 04:25 PM)PCP008 Wrote: [\[CITE\]](#) Many thanks for such fast reply can i use the same

email to send the spoof 2-3? or multiple?

I sent about 8 messages with 3 different accounts and it continues to give me an error message could i just buy a pre-made gmail or yahoo or live.com that will work with the program i will send you \$2.00 paypal just pm me your paypal. Understood what you ment and so i sent out about 10emails all recieved and still no cigar... im using yahoo btw. Some help for everyone who gets stuck! Make a Gmail i tried yahoo live none worked Gmail worked first time.

Jibzyy - February 22, 2012, 4:43 pm

Hey, I've tried numerous things (Using different email providers/allowing the logger to bypass my firewall/etc) and I cannot get the email to work, I am getting this message.

Help please? :)

Kill4joy KJ-Vulcan Tools - February 23, 2012, 2:49 pm

Try building another one and see if it works.

vrmaganae - February 23, 2012, 3:54 pm

hey.. well first of all thnx for the tut and the logger.

i will like just to clarify something.

currently i have this set up with gmail.

at the moment im getting the emails, i get the pc general info, im getting the screenshots but it seems that it only displays the title of the tabs that are been used. and not the keys that are been pressed at the moment. can someone help me with this issue?

here is an example:

Kill4joy KJ-Vulcan Tools - February 23, 2012, 7:00 pm

it is recording their key strokes, but it looks like he is spanish...

ryck - February 23, 2012, 9:15 pm

Nice tut man, i will try that soon!

vrmaganae - February 23, 2012, 10:29 pm

ohh of course i forgot to mention it was in spanish (my native lenguaje) but it doesnt make any sense and just now i've notice that instead of sending 1 email every 15 mins i actually get 4 emails at the same time. and each one of em its scrambled

here is another example:

1ST EMAIL

[Al Green - All I Need - YouTube - Google Chrome]

[Facebook - Google Chrome]

oltm [Backspace]r

[(1) Facebook - Google Chrome]

[Facebook - Google Chrome]

ajo[Backspace]

3RD EMAIL

[Al Green - All I Need - YouTube - Google Chrome]

[Facebook - Google Chrome]

a zj

[(1) Facebook - Google Chrome]

[Facebook - Google Chrome]

jbe

[ACCT NAME - Google Chrome]

er

4TH EMAIL

[Al Green - All I Need - YouTube - Google Chrome]

[Facebook - Google Chrome]

la [Backspace] licj

[(1) Facebook - Google Chrome]
[Facebook - Google Chrome]
js[Backspace]
[ACCT NAME - Google Chrome]
amsedu[Backspace][Backspace][Backspace][Backspace]ueormso lsn

so i notice that this all happend in the same timeframe because of the youtube link but cant figured out the message amd actually i was looking for login info and its not display cause before there was another user and without notice ith changes acct names

liamjonesxd - February 23, 2012, 11:34 pm
how can i use this keylogger to get peoples passwords on runescape??

scared n00b - February 24, 2012, 1:47 am
What settings to use it with a crypter? I tried some settings but after the crypt the keylogger is always broken.

imcoolkk - February 24, 2012, 4:30 am
Great job :)
Tnx 4 sharing..
?

DrunkenFish - February 24, 2012, 4:36 am
is there a way to turn off the logging? id like to test it on my computer but i dont want it there forever :D

thanks btw this is great!

noldenity - February 24, 2012, 5:21 am
Thank you very nice tut, and very helpfull

FantasPT - February 24, 2012, 12:36 pm
Testing this right now, dude I'm gonna try to infect a friend of mine

Randy™ - February 24, 2012, 4:05 pm
It says my email doesn't work? Its a new email too?

liamjonesxd - February 24, 2012, 8:59 pm
my emails are scrambled too

the programs are fine but the keystrokes arnt how can i fix

Xlegitz - February 24, 2012, 10:19 pm
great guide will be useing this. :]

joker. - February 25, 2012, 12:05 am
my emails are all scrambled up too so i cant read it any help?

CurosMJ - February 25, 2012, 12:46 am
Bro,

The keylogger's main exe is not opening . it generates an error " Application failed to initialize properly". I'm using WinXp. Please help me out.

My Email: manan.study@gmail.com?

KiruKashi - February 25, 2012, 12:50 am
Does Vulcan not have a binder?

I am in need of a binder.

Jackblqck - February 25, 2012, 4:44 am
Any one got it fully working ? any emails suggestions to use?

HILFN - February 25, 2012, 6:02 am
Really good tutorial and easy to understand, thanks a ton for this man, will defo be trying it out!

YMCMB™ - February 25, 2012, 7:31 am
Really nice tutorial bro! Very detailed and easy to follow. Thanks!:D

what_bout_i - February 25, 2012, 9:42 am

It wont let me use the email. i enter the email i want to use, click the test and it doesnt work :(

FantasPT - February 25, 2012, 10:37 am

It's working fine for me.

I done everything the tutorial seed, and the only thing that I still need to do is try to infect a computer to see if It's working.

Great Tutorial and Tool

Thanks man ;)

complexion - February 25, 2012, 7:10 pm

Nice TUT.

Will Use in future

When i learn how to use it

joker. - February 25, 2012, 9:10 pm

infect your own computer... i did it now i can see what my family does :)

prashantjcha - February 25, 2012, 9:13 pm

great tut....liked it..perfect for noobs...complete detailed...

Kill4joy KJ-Vulcan Tools - February 26, 2012, 8:21 pm

Haha, yeah, I might make a tutorial on how to remove the keylogger later.

whatisthisidonteven - February 26, 2012, 9:53 pm

This is an awesome tut, but those surveys are a bitch when I try and download it

CurosMJ - February 26, 2012, 10:56 pm

Good work K4J.

But, the vulcan logger requires .net framework 4.0 which means it can't be run in win xp sp2 or sp1. it will run on sp3 and vista,7.

do you have any other alternative to vulcan logger?

Kill4joy KJ-Vulcan Tools - February 27, 2012, 4:32 pm

(Feb 26, 2012 11:56 PM)Manan J Wrote: [\[CITE\]](#) Good work K4J.

No, the builder requires 4.0, the output file is in 2.0...

josh - February 27, 2012, 4:44 pm

This was a great tutorial. Haaha I'm going to actually use it now. The only downside to this is the .net 4.0. I'll have to use a different computer because I can't install it here.

Thanks for the program!

Kill4joy KJ-Vulcan Tools - February 27, 2012, 4:46 pm

"because I can't install it here"

Yeah this laptop is like... kinda school issued so I can't really update it. I tried it out on a friend to test it. Haha it worked well.

Thanks

Ching Oracle - February 28, 2012, 3:05 am

nice tut download now testing im sure its working

thanks

jpo38 - February 28, 2012, 8:16 am

nice tut, man

will try it out latter

DeMoHaunt - February 28, 2012, 11:02 am

nice tut and easy to read

(35 characters)

Rebellious1 - February 28, 2012, 6:56 pm

Great easy to follow guide. I can now set up a keylogger in a couple of minutes.

kamz89 - February 29, 2012, 8:20 pm

You mean how to make a keylog server.

Fatality614 - March 1, 2012, 1:22 am

thanks lol :D

for the tutorial :D

--

Predator_Crack - March 1, 2012, 3:38 am

At first thought, it was going to be a tutorial for creating a logger (vb.net) due to the title of thread but even that is something that will help everyone. Your free logger is one of the best atm no doubts.

Kill4joy KJ-Vulcan Tools - March 1, 2012, 1:38 pm

thanks guys, and sorry about the confusion!

shakka - March 6, 2012, 3:09 pm

iv downloaded it and it works on myself but when i send it out i get nothing back ..how do you view all your slaves?

Luxxed - March 6, 2012, 11:45 pm

I tested this on my sisters computer and it sends the logs but all of the words are mixed up "Regarde ouid good aye h utar h am-like u tsa ha" We both speak English and type somewhat well. I've seen others have this problem. Any suggestions?

1001403838326 - March 6, 2012, 11:49 pm

(I'M A NOOB) what is a keylogger? What does it do?

huneo - March 7, 2012, 12:32 am

Thank you for this tut, testing it right now !

Hikki - March 7, 2012, 3:13 am

Thankyou brother..!! hope everyone will like this :D

kamrulahsan06 - March 11, 2012, 4:52 am

From some days ago, ESS is started to catch this as spyware...No more FUD :(

Trollface.jpeg - March 11, 2012, 9:42 am

OOhhhh , I get it. You send it to people and set timer to record the "typers messages" and then I will see what it is?

*Im swedish , sorry for bad english :) I get eternal error instead of compiling succes! HELP ME!!

I have done everything right , I guess. What's wrong with it?

Snipe sos - March 11, 2012, 8:45 pm

Thank you so much, I absolutely love your logger, now if I can just get a hold of a binder and a spreader life will be good.

gorlami - March 13, 2012, 1:30 pm

the download site wants me to do a survey and give my phone number and subscribe to download -.-'

codyth - March 13, 2012, 6:14 pm

Wait, Im confused. Does this capture like passwords and everything too/. It isnt sending me the logs email, what do I do????

gorlami - March 17, 2012, 9:49 am

the file was deleted? and i just got out of the survey?

SeniorRandom - March 17, 2012, 10:01 am

Nice Tutorial! Very clearly laid out, Thanks!

Infinity. - March 17, 2012, 3:32 pm

This is really Awesome thread mate <3 <3 <3

Im new to this can u tell what a keylogger is/does

jaco - March 19, 2012, 2:16 pm

This works just fine and i like the icon changer, i ran it on myself and was good but to take it off all i did was run malwarebytes pro and a few cleaners it seems to take it off... thanks io really like this logger:)

liamjonesxd - March 23, 2012, 4:54 am

god dam survey link why! i used to have this[/u]

mariya - April 14, 2012, 7:18 am

No more FUD, its being detected by Avast... :(

thor7756 - April 14, 2012, 1:31 pm

Hey, I understand most things but this, I have no idea where the file for my victim to download is.

?Shrewd - April 14, 2012, 3:37 pm

That was a good tutorial for noobs. Hope they can stop spamming the beginner hacking section now.

aboycalledanuj - April 15, 2012, 12:58 am

When i input my email and tried testing it. It says "Email not working!
i tried using gmail and yahoo both with corresponding smtps bt no success. What to do?

cclover1 - April 15, 2012, 7:14 am

hi there mate. just downloaded and followed your instructions line by line. Very well constructed tutorial for the less experienced.

I've managed to upload this to mediafire and labeled it as a game file. I was wondering if there was a way to find out if it works.

So as soon as they download the .exe file and open it, it will work straight away on the persons computer?

Thanks!!

hello buddy, ive just been reading through peoples replys on this thread and it seems alot of people are having the issue of 'scrambled text' when the logs come through. Can you please address this so we can get past the issue. Many Thanks!

Thijz7x - April 21, 2012, 8:06 am

Look's great! Ima use it! Ima try to hack some RuneScape accounts.

befriend - May 3, 2012, 2:40 am

Hi i tried to test using this by doing it to myself and ijust want send through yahoo

oZZar - May 3, 2012, 5:26 am

Very good tutorial. Thanks for sharing this to us!

dirt81 - May 15, 2012, 2:07 pm

thanks for the keylogger mate
35 char

'Chief. - May 16, 2012, 2:08 am

The title of the thread is misleading, should be "How to setup a keylogger."

Friendly - May 18, 2012, 5:57 am

I use this keylogger for a couple months now and it is still working.
Thanks this keylogger man.

Kuso - May 19, 2012, 2:16 am

I am not sure why, but I use yahoo and I chose the second provider with correct email and pass...
Still get the not working for email.

SocialBoy - May 21, 2012, 3:54 am

Kool But How do i crypt this shit man?

vjbittu7 - May 21, 2012, 5:30 am

Fantastic work and great tutorial. Thank you very much!

APB- - May 25, 2012, 6:05 pm

Nice TuT man im going to do this now.

BeMyEscape - May 25, 2012, 6:09 pm

Looks amazingly easy. Thanks alot for posting this, even I understood it. <- Says alot.

Iso. - May 26, 2012, 1:04 am

Thanks for this tutorial, really helps us all out!

Team Plazma - May 26, 2012, 4:30 am

Thanks Very good easy to follow! VOUCH! thanks :D

kisskiss69 - May 28, 2012, 1:50 am

This is legit thanks man, keep up the good work.

anoxz_ - May 28, 2012, 6:40 pm

Damn really nice work! thanks in advance!! <33

Savez - May 28, 2012, 7:43 pm

Really nice man, can't wait to try it out!
Thanks! It'll be useful cheers man!

ORK24 - May 28, 2012, 8:35 pm

Awesome tutorial, thank you (:
I prefer Unkown logger (:

Moaf - May 28, 2012, 9:05 pm

Great tutorial, I'll have to try this out when I have the time, thanks!

FPSgamer - May 31, 2012, 1:21 pm

THANKS MAN!
Do you think i could public it in Mediafire or something?

Well, This is not a Free program, It actually costs 1 US Dollar or a Survey. Seriously that is so low!

TIHOR - July 3, 2012, 12:01 pm

Niceee!!!~! I'm gonna use itt :D Ty

can u please fix links. i would like to learn thanks.

skyman1628 - July 16, 2012, 7:06 pm

Hey, can someone help me, it says "go to the folder where your builder is located" where would this be and where was it made in the TUT!? please someone reply and help me <3

Wolfie1984 - July 16, 2012, 7:08 pm

Great TUT, bookmarked for future reference

Corsair - July 17, 2012, 12:19 am

Nice tut. Basic and helpful. Not really liking all the colors though >.<

Blocked - July 17, 2012, 5:33 pm

CAn someone help me

mrmikeman2 - August 21, 2012, 7:06 pm

Hey, I really appreciate this. Your site has lot's of excellent tools, and also, the only keylogger in the whole forum I could get to work. This is extremely helpful, and if I could, you would have more rep right now. Thanks again. ?

likamuffin - September 3, 2012, 3:11 pm

the link on the other page doesnt work you have to take a survey and put your address and stuff...

PortableHacker - September 16, 2012, 4:54 pm

Images are disabled mind posting them up again

jammerski - September 16, 2012, 5:30 pm

Fantastic work and great tutorial. Thank you very much!

||||| - September 16, 2012, 5:49 pm

Nice Tutorial bro , keep making them like this :D
