Thread: [\[TuT\] Metus Delphi 2.8 Setup Guide \[TuT\]](#)

Coca Cola - January 4, 2010, 12:39 pm

Hello. Back when i was new to hostbooting i always needed help, so here i am giving some help to others who are new.

Lets get started, First of all you need the download link for the Metus Delphi 2.8

Downloads:

Metus Delphi 2.8 - <http://www.multiupload.com/6ESL9EHJU3>

Sandboxie - <http://www.sandboxie.com/index.php?DownloadSandboxie>

1st Step - Creating No-ip

First go to no-ip.com

Create an account.

Login to the account.

Click create a host.

Enter 3 random digits or numbers for your no-ip and select .info

2nd - Opening Ports.

Metus Delphi usually runs on the port 3174.

Go to your command prompt - Type cmd in run.

Once the cmd has opened type ipconfig /all.

There will be a list of ip's, the one you need will begin 192.

Enter this ip into your web browser, this will open your router settings, go to applications. Select to add a new application, name it what ever you like.

For the Protocol Select Both.

Enter 3174 for Start and End.

Enter the last 3 digits from the ip you recieve from the cmd, e.g the ip 192.168.1.582.

To now check that the port is open go to www.canyouseeme.org and enter the port 3174, if it doesnt show the port open you may need to disable firewall to allow it.

3rd - Creating the bot

Open Metus Delphi 2.8

Select Server Builder and fill in the boxes.

Profile - Can be anything.

Port - The port you opened to run it on, in this case 3174.

Host - Your no-ip account you created in step 1, e.g 8e3.no-ip.info

Password - Optional, but not really needed.

Server ID - Can be anything.

Startup EXE - Leave this. Dont change

Mutex - Do not change it will change on its own.

Enable or Disable USB spread, Enabling USB spread can make the bot less stable. Then click build. You must ensure that in the file with Metus Delphi 2.8 client you have the stub.exe.

Once built it should appear in the folder with the stub.exe and client.

4th - Testing the bot.

Download sandbox - Download at top.

Right click on the built file and their should be and option to "run sandboxed" select this.

Right click in the middle of the Metus Delphi client and click "listen" enter the port you are using, in this case 3174. The bot should then appear.

This tutorial has been created by me, i hope this helps, if you have anything i need to add in please dont hesitate to tell me.Thanks.

Coca Cola

ToLeGiT - January 4, 2010, 12:41 pm

Already more than 3 tutorials for this.

Drafted - January 4, 2010, 12:48 pm

Nice Guide, +rep

2 shooooort

Example - January 4, 2010, 1:14 pm

Yes, I believe there is like 5 tutorials like this. Isn't Metus one of the least stable bots? I don't see any X-R tutorials...

Coca Cola - January 4, 2010, 1:48 pm

(Jan 4, 2010 01:48 PM)Mikieo Wrote: [\[CITE\]](#) Nice Guide, +rep

2 shooooort

Thanks mate :)

And one more tutorial never hurt anyone.

Đ?†?x - January 4, 2010, 2:46 pm

Well you are right.. one more tutorial wont hurt anyone. But what he mean is those others may be better than yours. So you should look around first before posting a tutorial.. But anyway, good work and good luck =)

Coca Cola - January 5, 2010, 6:01 am

(Jan 4, 2010 03:46 PM)Denne Wrote: [\[CITE\]](#) Well you are right.. one more tutorial wont hurt anyone. But what he mean is those others may be better than yours. So you should look around first before posting a tutorial.. But anyway, good work and good luck =)

Ok il try update the guide later, add pictures ect.

Coca Cola - January 5, 2010, 10:20 am

Just to say if you guys have anything for me to add just reply or pm me, thanks.x

KryPyro - January 5, 2010, 10:23 am

Nice tutorial. There may be other ones but this is pretty straight forward.

HF Amp - January 5, 2010, 12:18 pm

i need help the bot dose not appear for me

Coca Cola - January 5, 2010, 1:43 pm

(Jan 5, 2010 11:23 AM)KryPyro Wrote: [\[CITE\]](#) Nice tutorial. There may be other ones but this is pretty straight forward.
thanks :)

NeTwork Exploit - January 5, 2010, 7:25 pm

you should put scan links, users are easily fooled by the guided tut so they just go ahead and dload.
u have 29 posts. at least put brent's link

ToLeGiT - January 5, 2010, 7:35 pm

i copied links from another metus delphi tutorial, il replace with brents.

Cant edit post, heres download link copied from brent's tutorial.

<http://brent328.110mb.com/MeTuS-Delphi-2.8.zip>

BaNNED - January 6, 2010, 6:40 am

i can't read . Please remove black font color .

SpeakYourMind - January 6, 2010, 7:24 am

(Jan 4, 2010 02:14 PM)Example Wrote: [\[CITE\]](#) Yes, I believe there is like 5 tutorials like this. Isn't Metus one of the least stable bots? I don't see any X-R tutorials...

XR tutorials that are actually purchased are pretty much self explanatory.

- Serial
- Open Ports
- Download your server.exe
- registered DNS.

Done.

Frohe - January 8, 2010, 11:51 am

Hello im new to these fourms, but its not about this. when i try to open the Delphi it wont let me open says i dont have the permission and im the only Admin on my computer. please send me a pm or somthing to help me out. TY

dank - January 8, 2010, 6:42 pm

Imao at this guy putting his bot as the booter.... gtfo

Never Comin' Back - January 8, 2010, 6:44 pm

Works pretty good.

<Too short>

Coca Cola - January 9, 2010, 2:50 am

(Jan 8, 2010 07:42 PM)dank Wrote: [\[CITE\]](#) lmao at this guy putting his bot as the booter.... gtfo I didnt you fucking retard i copied the links from another thread, you really think im going to put a file which is like 15/24 or whatever it is?

Senqi - January 9, 2010, 9:59 am

For some reason this doesn't work for me, first I thought my ports weren't forwarded right but they are. Then I infected myself and looked in TCPview and noticed it attempts to connect to XXX.no:3174 (XXX being my no-ip dns), and yes when building I was completely sure I had it like: XXX.no-ip.info

So anyone know anything about this?

KryPyro - January 9, 2010, 10:43 am

I can help you setup your booter for \$1 via paypal only. Please contact me if your interested!

LifeRuiner - January 9, 2010, 3:23 pm

I'm having problems port-forwarding aswell. I've looked at this TuT, and several on youtube. But once I test it, my 3174 never is open. Maybe I'm just retarded? Help?

Coca Cola - January 9, 2010, 3:58 pm

LifeRuiner, often your firewall blocks the port from opening.

LifeRuiner - January 9, 2010, 4:23 pm

I thought that might be the problem too, but my windows firewall is off, and my linksys firewall is off also.

BANNED - January 10, 2010, 10:38 am

Just followed the tutorial and now happy .

JUAN9087™ - January 13, 2010, 11:39 am

can i still use this if i dont have a router?

jimbo- - January 21, 2010, 12:00 pm

very nice guide thanks

Mr Kyle - January 22, 2010, 3:35 am

it says status: closed why?

Crionik - March 26, 2010, 3:26 pm

nice bot in the dl link.

jayz1995 - April 11, 2010, 1:34 am

ive tried everything port forwarded,made no-ip done everythhing when i run the bot in my own comp i dont get any connections im on win7 so i cant use sandbox.

Hacker44 - April 11, 2010, 8:12 pm

When i go to click build server it doesn't say, the server is built, any tips?

Herbal Tea - April 16, 2010, 4:24 am

As soon as I extract it, it just disappears.

JJ iz Kronik - May 3, 2010, 7:22 pm

Yeah me to my bot doesn't appear

JJ iz Kronik - May 4, 2010, 4:38 pm

Kooooooll thats a good tut

ogzxparadox - May 10, 2010, 8:11 pm

WTF every time I set up metus or DARTH dossier my bots NEVER show up yet my cybergate works I have no idea what to do if anyone is willing to teamview me and help me set this up I will pay 10 bucks paypal just pm me thanks

jkx87 - June 26, 2010, 3:33 pm

nice job and arigato for this tut

hacker_10101 - June 27, 2010, 11:31 am

MeTuS_Delphi stub.exe is backdoored .Run with sandboxie ,dont downlaod it ,u will be infected by him

noid - September 17, 2010, 1:00 am

Yes, I believe there is like 5 tutorials like this. Isn't Metus one of the least stable bots? I don't see any X-R tutorials...

GhOsTI33T - September 17, 2010, 1:56 am

great tutorial! just did it and it works great... any good "free" crypters? to make it FUD?

Effexion - September 19, 2010, 12:20 am

Isn't this the programme where you can install RATs with just an IP?

william1902 - September 19, 2010, 6:10 am

Dont download this from the downloadlink.

File is infected!

haloistaken - September 19, 2010, 6:55 am

THis would work good for Runescape?

GhOsTI33T - September 19, 2010, 6:01 pm

Infected.... Dont download i found out the hard way. Reported link.

DarkDev - September 22, 2010, 2:53 pm

This is a pretty good tutorial. I would change the txt color to something easier to read though.

LordTKO - November 10, 2010, 5:33 am

Dude, My Metus isn't getting any bots -.-.. i sent the build file to like 10 people.. and nothing has came up.. ive double checked all the ports etc.. help pl0x!

Snorlaxlolz - February 10, 2011, 11:52 am

I dont understand how to portforward? Do i have to make my IP static? I made it static and i dont know wat to do. Do i forward my STATIC ip?

Snorlaxlolz - February 10, 2011, 2:41 pm

Do we run metus delphi in sandbox?

Triny511 - February 11, 2011, 12:09 am

Imao, if you wanna be smart i would suggest finding a different thread with better and newer information and etc..

autorunman22 - February 13, 2011, 3:06 am

Is this a ddoser right? Dont laugh xD im newbie at it.

XxNightmar3xX - August 24, 2011, 6:26 pm

Great Tutorial for all those nobs out there :)
yeah this thread is better though :)

<https://hackforums.net/showthread.php?tid=55342&page=113>

xcangriix - October 31, 2011, 1:25 pm

why it said backdoor and trojan ? when i scanned it said that

FreeSonicHaha - July 9, 2014, 2:26 pm

Okay so everthing when i run the server.exe in sandboxed mode it comes up in my Metus but if I send the server.exe to anyone else they double click and it doesnt do anything. Please help

john12 - July 9, 2014, 3:03 pm
