Will put a video soon up!!

Fredo In The Cut - February 22, 2012, 12:48 pm

When you buy this rat, does it automatically work since you don't need to portforward? Do you need to do anything? :)

Modesty - February 22, 2012, 3:16 pm

(Feb 22, 2012 01:48 PM)Snapback Wrote: [\[CITE\]](#) When you buy this rat, does it automatically work since you don't need to portforward? Do you need to do anything? :)

If you have a router that supports UPnP then it will portforward for you. Otherwise you'll need to manually portforward. Instructions on how to manually portforward for each router can be found here: www.portforward.com

michalrudas007 - February 23, 2012, 12:00 am

password recovery is not working for me..can you Help?

thanks and Good luck with your sales

Fredo In The Cut - February 23, 2012, 4:37 am

This might help you: <http://www.softpedia.com/get/System/System-Miscellaneous/UPnP-Test.shtml>

Not sure if it works tho.

Modesty - February 24, 2012, 8:15 am

(Feb 23, 2012 05:37 AM)Snapback Wrote: [\[CITE\]](#) How do you find out that if your router supports UPnP?

pm me your router model :)

Also it supports unicode characters if anyone's wondering:

.illogical - February 24, 2012, 8:16 am

Does ClientMesh have a .NET dependency?

Modesty - February 24, 2012, 8:31 am

(Feb 24, 2012 09:16 AM)Luci[D]ream Wrote: [\[CITE\]](#) Does ClientMesh have a .NET dependency? .net 2.0 yes. But we're working on a native wrapper that will download and install .net silently if it is not present and then start the client file

~digital~ - February 24, 2012, 8:42 am

(Feb 24, 2012 09:15 AM)Modesty Wrote: [\[CITE\]](#) pm me your router model :)

Also it supports unicode characters if anyone's wondering:

thats good better than DC5 who shows wrong character(but works, the name are just strange)

Bsahed 4.8 does not support unicode and DOES NOT WORK (the folder content will never shows)

(Feb 24, 2012 09:31 AM)Modesty Wrote: [\[CITE\]](#) .net 2.0 yes. But we're working on a native wrapper that will download and install .net silently if it is not present and then start the client file good luck.... between the different OS, the 32/64bit and the size of the framework ?

this feature can be cool, but a lot of computer have .net 2 or greater installed...

it would be better to correct a good part (or all) the 13 bugs/missing feature i post on the old topic ?

i would also change the topic name... there is no free crypter, but an inbuilt crypter.

a free crypter would mean that we can crypt other file with clientmesh... this is not the case ;)

+Awesome - February 24, 2012, 8:53 am

Hey mate, mind replying to your PM?

Modesty - February 25, 2012, 3:14 am

(Feb 24, 2012 09:42 AM)alain57 Wrote: [\[CITE\]](#) i would also change the topic name... there is no free crypter, but an inbuilt crypter.

Do check the folder named Loader :)

I've fixed most of the stuff that one of our customers had suggested in a bug report, will be updating soon :)

Jiszle - February 25, 2012, 1:44 pm

Which is more stable, blackshades or this? Thanks :D

Walter White - February 25, 2012, 2:12 pm

I love the look of this client. Soo sexy.
Good luck with sales ?

~eXplode~ - February 25, 2012, 2:38 pm

whenever i try i build a new client i see the .exe appear and it just disappears 1 second after?
Anyone know how to fix this?

Thanks.

Exzib - February 25, 2012, 2:53 pm

Does it only steal chrome logins? Or does it work with IE and FF?

Abuser™ - February 25, 2012, 2:58 pm

Very misleading title by "NO PORTFORWARD*" because UpNp does PORTFORWARD but instead it does it for you.

NO PORTFORWARD means not PORTFORWARDING

Purple BMX - February 25, 2012, 9:17 pm

Its a good client, But i decided to buy black shades to test it out. There is no point in having 2 clients so I was told i can sell my client mesh license. So if anyone wants it, Message me.

Tbag - February 25, 2012, 9:22 pm

Can anybody comment on the stability of this RAT? Also the crypter?

Modesty - February 26, 2012, 3:12 am

Thanks.

possibly your Antivirus is deleting your client. Turn it off while creating and crypting the client, then you can turn it back on.

(Feb 25, 2012 03:58 PM)Abuser™ Wrote: [\[CITE\]](#) Very misleading title by "NO PORTFORWARD*" because UpNp does PORTFORWARD but instead it does it for you.

NO PORTFORWARD means not PORTFORWARDING

Anyone to think that any program that works with communication over WAN without portforwarding a port is a bit silly. By default, port 25, 80 and a few others are forwarded, thus to allow FTP & HTTP communication. So ofcourse it needs portforwarding, but no MANUAL portforwarding. adding the word MANUAL will not fit in the thread title, and that's why I put an asterisk and wrote about UPnP within the thread.

unix2 - February 26, 2012, 11:25 am

(Feb 25, 2012 10:22 PM)Tbag Wrote: [\[CITE\]](#) Can anybody comment on the stability of this RAT? Also the crypter?
very stable..

totally unrelated I have found one bug. I had 20 bots and im on windows 7 32 bit. The bots would start connecting rapidly, and client mesh started making many icons and notifications then crash.

I unchecked "always show all icons and notification on the taskbar" and now it doesn't crash on startup.

Also, would you possibly add video card type on system info?? or even driver installed

Nitrox - February 26, 2012, 12:09 pm

This looks pretty interesting! Might buy it in a couple of weeks.

Good luck mate!

Modesty - February 26, 2012, 12:50 pm

(Feb 26, 2012 12:25 PM)unix2 Wrote: [\[CITE\]](#) very stable..

any news about that update ??

theguybro - March 6, 2012, 5:50 pm

Vouch, just got this. Very nice RAT. DNB helped me set up. It has a very professional feel to it. Thanks a lot for this great product!

theguybro - March 7, 2012, 6:19 pm

(Feb 25, 2012 10:22 PM)Tbag Wrote: [\[CITE\]](#) Can anybody comment on the stability of this RAT?
Also the crypter?
Stability is great. Everything works great.

i?fe??ø - March 7, 2012, 6:41 pm

So I heard you can't crypt your RAT, well dude that sucks!

ngrBot - March 7, 2012, 8:55 pm

I love the gui.
Looks like a good product.

Positive - March 7, 2012, 9:17 pm

Looks kinda like PixelRat.
But great job anyways.

Good luck with sales.

theguybro - March 8, 2012, 12:17 am

(Feb 27, 2012 09:33 AM)Modesty Wrote: [\[CITE\]](#) untick the notifications in settings as that could cause it to play up sometimes.
Yo, Modesty. I tried this, but it still sends notifications?

Modesty - March 8, 2012, 8:37 am

(Mar 8, 2012 01:17 AM)theguybro Wrote: [\[CITE\]](#) Yo, Modesty. I tried this, but it still sends notifications?
Make sure you press "save settings" too ^^

theguybro - March 8, 2012, 12:00 pm

Got it. Forgot to edit post. Sorry!

youngwitty - March 8, 2012, 7:03 pm

This looks like a pretty good Rat I'd like to hear from some people that have purchased it and be informed as to whether or not the built in crypter works to keep it fud. If it can be crypted. Etc. Etc. Thank you very much!

theguybro - March 8, 2012, 7:17 pm

(Mar 8, 2012 08:03 PM)youngwitty Wrote: [\[CITE\]](#) This looks like a pretty good Rat I'd like to hear from some people that have purchased it and be informed as to whether or not the built in crypter works to keep it fud. If it can be crypted. Etc. Etc. Thank you very much!

I have this RAT. It's very nice, and has a great feel to it, as well as quite a few unique features. The inbuilt crypter -does- work, but the output isn't FUD. If you own another crypter, just don't use the inbuilt crypter, and disable the startup option in RAT, if your crypter has a startup option. Hope this cleared a few things up.

Fred Jacobson - March 12, 2012, 4:41 pm

The RAT is very, very good. I really like it, the things you can do with your connections is just all great. I have 1 problem though; When I get 20 or more bots logged in, my client Crashes. What's the problem? I'd like some help. Thanks in advance!

~digital~ - March 14, 2012, 4:50 am

(Feb 25, 2012 04:14 AM)Modesty Wrote: [\[CITE\]](#) I've fixed most of the stuff that one of our customers had suggested in a bug report, will be updating soon :)

are the bugs fixed ? if yes why not releasing an update ? or does i missed it ?

theguybro - March 14, 2012, 2:13 pm

Hey Modesty, is there any way to slow down the connection of the bots?

\$W1TcH - March 17, 2012, 5:39 am

thanks for updating this! i sent you a pm !

1337 is leet - March 17, 2012, 10:40 am

When ever I get more than 20 connections on clientmesh my client crashes, Why?

Gent - March 19, 2012, 3:46 pm

Just waiting for the email containing my login info. I've heard good things about this and the UI is very minimal and clean (which I like). Hopefully it's worth it.

Milopeach - March 20, 2012, 5:07 am

"Client Mesh 5.0" - First thoughts: 'Shiiiiitt, That's gonna be sick'.

Opens page.

Awww, That's HAWT!

I must buy this.

Gorhell - March 20, 2012, 7:45 am

I'm wondering how is the no portforward thing? Interested in this product and GUI looks COOL!

Modesty - March 20, 2012, 4:03 pm

(Mar 20, 2012 07:45 AM)Gorhell Wrote: [\[CITE\]](#) I'm wondering how is the no portforward thing? Interested in this product and GUI looks COOL!

if your router supports UPNP, it will portforward for you so there's no manual portforward that you need to do :)

Gent - March 20, 2012, 6:32 pm

I can't properly crypt this. Compiled servers don't properly inject and just sit in a loop for about ten minutes until they crash. I also can't use the same port again if I close the client then reopen it.

Modesty - March 21, 2012, 8:01 am

(Mar 20, 2012 06:32 PM)Joomla12 Wrote: [\[CITE\]](#) I can't properly crypt this. Compiled servers don't properly inject and just sit in a loop for about ten minutes until they crash. I also can't use the same port again if I close the client then reopen it.

Crypting the file is not our responsibility, it's the problem with the crypter. The client files created do not require any extra things such as EOF/Resource protection so there's a fault in the crypter you're using.

And errm, maybe it's not closing properly on your computer, try and check if it's running in the processes before opening a new instance.

Halon2 - March 21, 2012, 12:36 pm

Do you have a video of the built in crypter ? Because i would like to see this before i buy it :)

Regards,
Halon2

Vergeten - March 21, 2012, 2:51 pm

Can you explain me why I should buy this and not Blackshades? Same price for both.

What are the bugs currently, what about the crypter what is the detection "rate" atm?

Gent - March 21, 2012, 3:30 pm

The built in crypter is 10/37.

As far as it being an issue with my crypter, it shouldn't be. The crypted file is supposed to drop in AppData but since compiled binaries drop in AppData/pixels, it can't properly be crypted. Add the ability to choose where it gets dropped or remove it entirely. Also, I killed all instances of it and I still have the issue with the port.

Edit: Clients also crash when trying to recover passwords or start remote assistance.

Goodbye123123 - March 21, 2012, 3:54 pm

Just curious what was this coded on VB net only? Or....

Modesty - March 22, 2012, 9:29 am

(Mar 21, 2012 03:30 PM)Joomla12 Wrote: [\[CITE\]](#) As far as it being an issue with my crypter, it shouldn't be. I think he has the same problem as me.

Mine ClientMesh just quits after I start up, you see for few sec the login screen and than disappear with no error or something =/

So I don't think it evens update now because of this.

Modesty - April 19, 2012, 12:03 pm

Yeah cm wasn't out 3 years ago, thank you.

prodigyhf - April 30, 2012, 2:15 pm

I am seriously considering buying this at this point. BlackShades is good, but the downtime, the features that don't work sometimes/all the time, and the lack of stability is what motivates me to get a different RAT.

Here is what is important to me:I need to be able to hold 100-200 bots all at once without any/only minor performance hits.

I like a lot of "troll" features because that is mainly what I do. For example, it needs a good fun menu with a lot of working features.

I need a good password stealer because that is really the one and only thing I do that is very malicious to people's computers. I usually get them on my RAT, steal their passwords, then troll and play around with them.

I need the RAT to be very good at keeping bots and not losing them. It also needs to be pretty resistant to botkills.

If ClientMesh is good at all of the above things, then I will be purchasing tonight.

Modesty - April 30, 2012, 2:54 pm

(Apr 30, 2012 02:15 PM)CyberProdigy Wrote: [\[CITE\]](#) I am seriously considering buying this at this point. BlackShades is good, but the downtime, the features that don't work sometimes/all the time, and the lack of stability is what motivates me to get a different RAT.

This is the closest we have to a "fun" menu at the moment:

[img]<http://www.clientmesh.com/images/app/5.png>[img]

chickenmove - May 1, 2012, 9:38 am

U said now since 2 Months, that u will release an update, where is this fucking update ?

CM cant load more than 60 Bots than it crashes, and crypter doesnt work to.
Bad R.A.T !

Modesty - May 1, 2012, 12:31 pm

(May 1, 2012 09:38 AM)chickenmove Wrote: [\[CITE\]](#) U said now since 2 Months, that u will release an update, where is this update ?

The last update was out 2 months ago. I wouldn't have said "I will release an update" as soon as I updated. Please be patient, thank you :)

[img]http://i.minus.com/inIzsbNwZvWUp.bmp[/img]

A new control panel, ergonomically designed with efficiency in mind.

Modesty - May 2, 2012, 6:44 am

(May 1, 2012 04:07 PM)CyberProdigy Wrote: [\[CITE\]](#) I just bought it and now whenever I login it says failed. Does it take a while to update?

Jheez lol if you read the email there's a not that says your account will be activated in 24 hours ._.
thank you for your patience.

michalrudas007 - May 2, 2012, 1:06 pm

still waiting for update.. there is no update from many months

Modesty - May 2, 2012, 2:56 pm

[img]http://i.minus.com/iSttovvtepXo6.png[/img]

Just a pre-alpha screenshot. Extremely happy with this atm.

ColdestWinter - May 2, 2012, 3:06 pm

(May 2, 2012 03:05 PM)CyberProdigy Wrote: [\[CITE\]](#) Will it actually be able to handle a client for more than 5 minutes without crashing?

I heard ClientMesh is very unstable and it doesn't work with a lot of crypters.

Modesty - May 2, 2012, 3:10 pm

(May 2, 2012 03:07 PM)CyberProdigy Wrote: [\[CITE\]](#) That is pretty much true lol. None of my 3 crypters work with it.

Sorry but this is ridiculous. The burden of a crypter working for an application is on the crypter. You can't expect me to test every crypter out and make sure it works with clientmesh. It's the crypter owner's responsibility to test his crypter with different apps. Clientmesh is a simple .net executable requiring no support. It's not my fault you're buying shit crypters. ClientMesh works fine with Insidious and Saddams FYI.

Another point. This thread is for SALES SUPPORT. for PRODUCT SUPPORT, pm me.

prodigyhf - May 2, 2012, 3:10 pm

(May 2, 2012 03:09 PM)Vibrate Wrote: [\[CITE\]](#) Ask for a refund if it's that bad. No one should have to waste money on something that doesn't work or crashes.

If he would let me get a refund, I would. Maybe in the future I would buy again when it is more stable.

Modesty - May 3, 2012, 8:56 am

I'll quote what I said in a pm to someone.

Quote:I'm about 80% through the next version and I'll have it out soon, and I've worked on the

stability of that for a while so it's great.

Just testing with 71 sockets open, no lag what so ever, CPU usage is only at 1%.

screenshot:

Spoiler ([Click to View](#))

[img]http://i.minus.com/imhefb05aiDvl.png[/img]

Of course a software goes through several stages before it reaches a point where usability level becomes 100%. I'm proud to say that we've reached it, and you'll be extremely satisfied with your next update :)

p.s. the 80% is calculated by dividing the number of completed features by the total features and multiplying 100, if anyone wants to question that :)

prodigyhf - May 3, 2012, 2:32 pm

(May 3, 2012 08:56 AM)Modesty Wrote: [\[CITE\]](#) I'll quote what I said in a pm to someone.

p.s. the 80% is calculated by dividing the number of completed features by the total features and multiplying 100, if anyone wants to question that :)

I hope the update actually allows me to use the RAT. It looks amazing and has all the features I need but nothing is working atm.

Modesty - May 3, 2012, 2:49 pm

Just doing some more stress testing, we got a 100 clients using up 0% CPU. I think we should be able to hold atleast 50,000 before it will start causing problems with efficiency.

[img]http://i.minus.com/i5BeWSwU9ufgp.png[/img]

Lana Del Rey_ - May 3, 2012, 3:14 pm

The GUI on that RAT looks very clean!

prodigyhf - May 3, 2012, 7:05 pm

Thanks.

Embed in loader is our crypter, you will be able to embed the file in another executable (by following the steps shown) and this will reduce detections. If you want to crypt ClientMesh then do not choose this option.

At the present moment, unfortunately not however you can always build a new client file with a different IP/DNS and install it on a machine that's already a client and then you'll have two or more client files operating on that machine, each with a different IP to connect to.

Update Progress: [img]http://www.pixelfrag.com/progress.php?max=100&val=84[/img]

Magecow - May 9, 2012, 4:13 pm

cant wait for updated release i might have to try this one out

prodigyhf - May 9, 2012, 5:48 pm

Holy shit it's getting so close! Keep up the good work! I can't wait!

Modesty - May 10, 2012, 6:01 am

Only things left:

- Builder
- Map visualisation
- Security system
- Client security
- Finishing visual effects

I'll probably be adding a few more slick features but we're pretty much near the end now :)

A builder you can't go wrong with:
