Thread: [Portforwarding lan to lan connection](#)

InfectedWorld - February 23, 2012, 10:31 am

Hey

I cant port forward because of this problem

<http://homecommunity.cisco.com/t5/Wired-Routers/Cant-port-forward-please-help/td-p/491522>

Read that first

How can i do lan to lan connection i really suck at this

If you succes i will pay you some rsgp/paypal

i got access to my modem&router

Hope somebody can help me :s

Thanks!

Pumpkins - February 23, 2012, 11:20 am

I think you use port 127.0.0.1, 127.0.0.2 etc, or something like 192.168.0.1

Im not 100% sure, hope I helped.

InfectedWorld - February 23, 2012, 11:33 am

Thanks for the try :)

someone else helped my over teamvieuwer

xsysrqx - February 23, 2012, 11:50 am

I don't believe you need to port forward since you are on the same network. Port forward only is need when you want to communicate with a computer that is not an the same network.

So in your situation it is not needed.

Hreidmar - February 23, 2012, 2:56 pm

When youre under the same network you DON'T have to Portforward oh and as for Address you have to put instead of DNS/NO-IP just put your LAN IP.

If you dont know your LAN IP search on Youtube "how to find my LAN IP".

Good Luck. =)
