Cybergate is pretty good but isn't it free?

Why sell it for so high?

My Best Rat Ever ...

i will try to get it ..in future

best regards Cg team

KernelMode - February 23, 2012, 3:58 pm

Amazing to see a new update come out. ?

Black Shadow - February 23, 2012, 4:35 pm

Big vouch from me for this great RAT, I have been a member for over a year now and upgraded to the gold package so I have another 2 years.

xMercuryx - February 23, 2012, 4:48 pm

Wait , I hate to sound like a complete dumbass, but you coded Cybergate? XD

Can you please label the features that are NOT in the free version besides the automatic port forwarding | the stealer | downloader

Interested in buying!

Xilence - February 23, 2012, 8:34 pm

Wow, this looks awesome. Look forward to a purchase from me in the future :)

Exzib - February 24, 2012, 12:30 am

Cant really remember what version i had. But id the keylogger fixed? That did nothing? And the stealer disconnected your slave...

I got a refund tho. Lucky me!

Falconw0w - February 24, 2012, 2:12 am

Vouch for ASM. An awesome seller. Finally CG is officially on HF.

GLWS mate :D

Kululu - February 24, 2012, 2:16 am

Look awesome will consider to buy it

PROJECT1 - February 24, 2012, 2:48 am

Please mate explaine to me this option: URL VISITER hidden or not, means i can open a google page remotely without the slave knowing what im doing on his computer?

Please explaine thanks.

Yes it's just like any other bot. You can open a website and choose weather it shows up the slaves computer or not.

Is it FUD or we need a crypter?

After expiring of our period (1 year or 2 year), are we able to use old version or not?

PROJECT1 - February 26, 2012, 12:11 am

If you can unlock a version for me without HIWD i will buy it i have very bad experience with those rat connected with the server most of the time never works and i have to wait when the owner fix it i cant work like that i need a free HIWD one.

No it has to be crypted.

Yes you can use the old versions after your period has expired, just no updates.

Sorry but, that can't be done.

Illumin?ti - March 3, 2012, 7:28 pm

Is this stable or is it like the other CyberGate versions when compared to DC(free) stability sucks?

elmedoc - March 4, 2012, 1:56 am

What features cybergate paid have vs to cybergate 1.07 ?
