Thread: [\[TOOL\] TinyChat Tool](#) [\[/TOOL\]](#)

EricR - February 24, 2012, 5:41 am

I made a small PHP script that lets you view all Tinychat rooms in fullscreen with no ads

This is great for spamming , or if you want nothing but the chatroom

Simply put the room name you want to join after room=

for example tc.php?room=h4ngout , then hit enter and watch the chat load

You can find my script here: [Here](#)

Or use the direct link here: <http://www.sn0wz.com/tc/?room=RoomName>

UPDATE: Now i have added a smooth control that makes jumping to rooms more easily.

Click the "Enter a room" button and put in the room name , then hit ok

it will send you to that room instantly , enjoy: [Click](#)

HotFudge - March 13, 2012, 2:55 pm

Cool cool, Thanks for the idea, I always try to construct my own :D

dndnn - March 16, 2012, 2:51 am

I was wondering if there's any way to log onto a TC account with this tool.

EricR - March 17, 2012, 5:06 pm

If you are logged into the site, your profile will still show, however you will lose mod powers.

if you want mod powers i would have to make a special embedded page with your mod hash (small piece of javascript)

tW0_ELEVEN__ - March 19, 2012, 5:26 am

hey can you make me that mod power in this script , i have the hash code and etc .. pm i can not pm yet thank you

EricR - March 19, 2012, 5:40 am

Yes, copy the whole source of the room your mod in, then put it on here [pastebin](#) and post the link in a reply, or pm me it

EricR - March 21, 2012, 10:41 pm

Ghost, i have finished the source for your embedded page with moderator.

here it is <http://sn0wz.tk/ghost.php?room=r00mname>bro it does not work :/ can you fix this also lol dont put it on the thread lol

EricR - March 22, 2012, 2:25 am

if the mod doesn't work then you are on a different ip. then i need the source of the room again so get another source and put it on pastebin again.

tW0_ELEVEN__ - March 22, 2012, 3:04 am

lol ok . i will do that , i will send to you in pm

MZ_CARMELA_HEADBITCH - March 22, 2012, 8:56 am

HEY DO YOU HAVE THE PROGRAM THAT ALLOWS YOU LOAD THE ROOM WITH GUESTS??

dndnn - April 5, 2012, 5:10 am

Hey sn0w. I saved ghost.php before your maintenance. I was wondering if you can make it possible to add more parameter like how you have ?room=blahblah maybe we could also do account=blahblah and autoop=blahblah. Maybe it'll be useful to others :) I was able to get mod working with the saved html I had.

peek - April 14, 2012, 5:51 pm

This is very helpful and I'm so happy I found this thread. I'm on a pretty shit computer, and this makes it so there is way less lag.
