Thread: [\[TuT\] Torrent on first page of google!](#)

[H]ell - January 5, 2010, 3:17 pm

Hey.,!

This is my first tutorial so please dont go hard on me ^\_^

Ive been using this method for a while and didnt want to share it  
But i thought it might come handy for you people to in this community!

To show what you can achive with this method in 10 min type this in google

"windows 7 keygen high speed"

Let me google that for you:

<http://imgtfy.com/?q=Windows+7+Keygen+High+Speed>

You will see that I AM at the top and filled the first page of google completly for my self..?  
Well i cant use it since this i have another ip now than what i registerd the rat to >\_<  
But i can update the pages in a flash.

But anyways doing this is really easy  
Here we go:

First you need to register some accounts at: [funpic](#)

After doing that you need to activate the ftp. ( Im not gonna go into this when you cant manage that  
this is nothing for you ... )

After activating the ftp and got the pass for it go to:

[net2ftp.com](#) or use an ftp client

Upload your virus you want to spread there ( make sure its in a rar file )

Do this for all the accounts ( 1 will do to but more are better ( More seeders ))

Now download utorrent! ( If you didnt have it already :P )

<http://www.utorrent.com/>

When you have downloaded it and installed it open it up.

Create a new torrent ( File-> New Torrent or ctrl+N )

You will now see a little box where you can create the torrent

First click add file and select the .rar file you also uploaded to the FTP

Now in the trackers box enter this

<http://pastebin.mozilla.org/694876>

Now the trick : Webseeds.

You were probably wondering why you had to uplpoad those file's to the ftp  
Well its for webseeds.

In the box webseeds add this:

<http://YOURFUNPICUSERNAME.funpic.org/YOURVIRUS.rar>

At the YOURFUNPICUSERNAME -> change that to the funpic username where you registered under

And at the YOURVIRUS change that to the file you uploaded

Now to this with for every account you set up and uploaded the file on

Ok now hit the create torrent button. You will have to save your torrent somewhere, Put it where you want ( Make sure you can't remove this after you created it ;) )

It will save your torrent and bring you back to the torrent creation screen. You can close that and go to your "completed" Tab

There you will see the torrent you have just created.

almost done

Next up:

Uploading your torrent.

Ok what you are now going to do is directly go to: Thepiratebay.org ( Make sure you use a proxy of some sort )

There you will register an account, if you already have 1 and don't want to risk it and don't have a spam email

use: [www.bloatbox.com](http://www.bloatbox.com) Its a disposable email that isn't blocked by tpb

After registration and activation of your account login and click: Upload a torrent

Just follow the instructions on screen, make sure you use a good name and catching description

Now hit the upload button and DONE!!!

Now switch back to uTorrent and right click on your torrent press the : Update tracker, button

And now you can search some more torrent sites where you can upload your torrent. Make sure you use the same torrent name and description as on the piratebay.

You will see your download grow in just minutes. It will take 2 hours to get on the google page with your torrent

And after some days you will rule the complete first page if you used a good torrent name ;)

So that's it for this tutorial

Please leave a comment and please +rep me for this

More tutorials coming soon! :D

**[H]ell** - January 5, 2010, 4:23 pm

buuuuuuump? ;(

Please reply ;)

**PwNaGe™** - January 5, 2010, 4:28 pm

nice!

thx for this will try it later

**Kevon** - January 5, 2010, 4:34 pm

Thanks, This is very nice tutorial. I will post the result after i have time.

btw, very nice for new people.

**ToLeGiT** - January 5, 2010, 5:13 pm

Nice! I will try it sometime when I spread on Torrents again. ?

**[H]ell** - January 5, 2010, 5:14 pm

Yay replies :D

Well it worked for me i totally own the first page on google :P  
Try the lmgty link  
<http://spam.com/yduf7l3>

Hoping for more replies ^\_^

**ToLeGiT** - January 5, 2010, 5:15 pm

?????

**thefun25** - January 5, 2010, 7:00 pm

Thats really nice. And remove that spam link its confusing narbs.  
Argh.. Its freaking taking for ever for confirm emails

Who is another good webseed host?

**wootwoot911** - January 5, 2010, 8:31 pm

Doesnt pirate bay delete crypted torrents?

**#DataBase** - January 5, 2010, 8:38 pm

Quote: Doesnt pirate bay delete crypted torrents?

Yes, they will check files. And they will detect it sure.

#DB

**wootwoot911** - January 5, 2010, 8:39 pm

Hmmm but I guess being on the google page is worth it.

**thefun25** - January 5, 2010, 8:46 pm

So... Does anybody know a good webseed host? Im not getting emails I tried 5 times.

**wootwoot911** - January 5, 2010, 8:53 pm

Me too lol. Seriously I dont know how this will help your spreading since # takes out ur malware in under 15 mins.

**[H]ell** - January 6, 2010, 12:02 am

I updated the "spamlink" , Hackforums doesnt like tinyurl :O  
And as for the piratebay, Yea they will remove your torrent i dont know how they do it but before they removed it

The trackerlist will do a magic trick.. I dont know what it is but im still receiving logs / downloads after its removed :P

Im btw using istealer now just in case you were asking ^\_^

[H]ell - January 6, 2010, 6:11 am

Bump :O

Spoiler ([Click to View](#))

1337God - January 6, 2010, 6:23 am

I don't get what is this...

[H]ell - January 6, 2010, 3:23 pm

Wen your using torrent spreading you can get your torrent on the first page of google using this.. That wasnt that hard to understand right?

0x000011 - January 6, 2010, 3:29 pm

nice tut Mrhappy, definetly can be put to good use

Vorfin - January 17, 2010, 7:27 am

(Jan 5, 2010 09:38 PM)#DataBase Wrote: ([CITE](#)) Yes, they will check files. And they will detect it sure.

#DBI've had a 'keygen' up there for months, hasn't been removed. I only gets removed if they detect it.

[H]ell - January 17, 2010, 3:05 pm

I dont know how to upload stuff on tbp

But what ever it does it gets deleted but gets me at google :P

So idc

[H]ell - January 18, 2010, 1:45 pm

Nooooow i dont want my tut to drown! ;(

Andrew Watson - January 18, 2010, 3:21 pm

I don't get the confirmation link. Ive tried 3 different emails gmail hotmail and yahoo waited a day and none have come.

kl3zero - January 19, 2010, 4:24 pm

just started torrent spreading again will give this a go

deputysalty - February 15, 2010, 1:27 pm

the pastebin link doesn't work for me, its just blank in the box :/

Diamond3x - February 15, 2010, 2:07 pm

(Jan 5, 2010 09:38 PM)#DataBase Wrote: ([CITE](#)) Yes, they will check files. And they will detect it sure.

#DB

How they check 4 crypted files.U mean if i bind my server with a file or something will they know.Anyway can i have ur msn?

(Jan 5, 2010 09:38 PM)#DataBase Wrote: ([CITE](#)) Yes, they will check files. And they will detect it

sure.

i would like it to how they detect crytper "torrents" or files

RBH - February 16, 2010, 7:35 am

Pastebin for trackers don't work anymore could you post it here/update the link ?

WooT - February 16, 2010, 6:03 pm

(Feb 16, 2010 08:35 AM)ElitePower Wrote: [\[CITE\]](#) Pastebin for trackers don't work anymore could you post it here/update the link ?

I second this. Would love to have this =]

GodlyTinker - February 17, 2010, 10:13 pm

Why the hell do my files get deleted on TPB after like 20 minutes... ??? ?

Kodaroka - February 17, 2010, 10:50 pm

Or you can get freehosting accounts and upload torrent php scripts on it thus making it a seedbox,

( Your hosting will get suspended after a while)

xoxo1 - February 18, 2010, 3:25 am

Very good tutorial! Keep up the work!

lemondragon - February 12, 2011, 2:25 am

Hey, the pastebin doesn't work for me either, could you fix it?

Thanks.

[H]ell - February 12, 2011, 2:48 am

Thanks.

And the of the year goes to lemondragon.

KillYou! - February 12, 2011, 3:45 am

It looks like A FUD!! Thank you verry much for the tutorial well good luck mate :)\_

Adam Marks - December 25, 2013, 1:03 am

Be in mind that the people that inspect "copied torrentz" will banish you and your uploaded torrents

easily ... because of "SPAM" or Suspicion of Viruses ....

Please Disable Sandboxie features or Process hacker as they Will know if you have done anything to the legit file , i would put a delay of 30 mins .... so the Gay Moderators dont suspect a thing :)
