As your regular used accounts got hacked, I believe you have been Keylogged. Make a full scan with [Malwarebytes](#) & also you can use [KeyScrambler](#) to prevent Keyloggers! :)

thx but i need that account i have it done now it got a keylogger now it is removed

The most important is to get back is your email, so try to do that with your Security Question. And when you got ur email back you can also get ur skype and all that back ;)

But i would scan ur system with malwarebytes first to delete the rat/keylogger that you might have.

Just write to minecraft support if you can or if there is any.. It's best if you contact them in phone, and then just tell them that your minecraft account and email account have been hacked.

Hope you get it back! ;)

thx can you give me the mail of minecraft support?

CPAManager - February 25, 2012, 6:56 am

Here you go - <http://www.minecraft.net/support>

Next time you can use google :D

c00lb0y - February 25, 2012, 7:19 am

but more accounts on that mail gh4cks@live.nl pls hack it for me

Sry im not hacking emails, just try to reset ur password on ur email, you just need to answer ur

Security Questions.

Lol, learn to do suff by yourself, you can't just expect people to hack your email back for you for free.

i have the ip of the hacker what i can white that ip?

CPAManager - February 25, 2012, 1:29 pm

You can trace the IP Adress.. ?

c00lb0y - February 26, 2012, 1:38 am

but how? can i do that? or can i hack him?

Braavi - February 26, 2012, 4:10 am

send the hacker a keylogger simple as thad xD

Jae? - February 26, 2012, 6:39 am

You can report his IP to your local authorities and get him arrested for hacking.

I would never do that, as I have hacked, and If I was to get hacked, it's just karma.

But, if you want to get serious, report him.
