Thread: [Virus Scanning websites](#)

Dwayne Johnson - February 26, 2012, 1:19 am

I need a good free place to check if my virus fud, does anyone know any good sites?

Predator_Crack - February 26, 2012, 4:28 am

Almost 9/10 free virus scan sites are usually distributing samples of the uploaded file so they are not worth of using them for your crypted files.

- my-avscan.net
- scan4you.net
- multiscan.com
- scanwith.me
- elementscanner.net

Elementscanner gives 2 free daily scans after you register and my-avscan gives you one. Prefer them.

Dont use that one :

Geüploade bestanden worden naar antivirusbedrijven verstuurd zodat de detectiegraad van hun antivirusproducten verbeterd kan worden. Lees meer hierover in onze privacy policy. Als je niet wilt dat je bestanden doorgestuurd worden, gebruik onze dienst dan niet om deze bestanden te scannen.

Translation:

Uploaded files will be sent to antivirus companies so that their anti-virus detection rate can be improved. Read more in our privacy policy. If you do not want your files are sent, use our service or not these files to scan.

So don't use ?

Oh really, my mate was telling me today that they didn't. Oh well, maybe keep away from it then!
