Thread: [\[FREE\] Sadaf's Keylogger \[FUD 100%\]](#)

Saroya.Jutt - January 6, 2010, 7:23 am

HELLO GUYS..

I have just start work in VB 2008 and think to make first KEYLOGGER.

So i have finally made it, which is completley 100% FUD and FREE for all members.

Here is a screen shot...

guys 4 download but not a single answer here.....?

say thanks if you like this man

Eleqtriq - January 6, 2010, 12:29 pm

The GUI looks pretty nice, did you write the whole source yourself or use a guide?

TheBlackMarket - January 6, 2010, 12:33 pm

Nice GUI, works good, thanks mate :)

The Name's Bing - January 6, 2010, 4:00 pm

Nice GUI dude, Gonna download later when RS isnt overloaded

(Jan 6, 2010 01:41 PM)Gasman Wrote: [\[CITE\]](#) Nice, I can't download it at the moment (# overload)... But trust me, I'll use this on some teachers :)Good luck getting a Teacher to open the Server ?

Toys - January 6, 2010, 4:11 pm

You could make a shortcut and change the icon and the name of it I guess to fool a teacher.

Like, get a picture of the icon for internet explorer (most schools use that as the default browsers, if not all) and then use it as the icon and change the name of the *.exe to Internet Explorer. She wants to do a lesson via internet, and she gets owned.

kdata - January 7, 2010, 3:04 am

hey it doesnt open on my pc. all avs off?

so go and install

Godly - January 7, 2010, 3:36 am

will try this soon :) looks great

Zetron - January 7, 2010, 4:12 am

Wow, big fail logger... When you open it, it shows the mail and the password of the user that made the keylogger... FAIL....

Gives us the time interval?

sp33dwalk3r - January 7, 2010, 7:40 am

i have to enter full g mail adress? like testestest@gmail.com or only testetsttest

Itachi Uchiha - January 7, 2010, 7:41 am

GUI is horrible personally but nice try. I'll take it for a test.

Plutonium - January 7, 2010, 7:48 am

This looks shitty as hell.... Prolly not good logs either

gaylechris - January 7, 2010, 3:23 pm

when built serever s opened a message box s pooed out.....check it.....thx:)
popped out....this happens 4 any1 here??

Godly - January 7, 2010, 4:40 pm

this is bad.. no offence, when i planted it on my Victims computer it just opened a file with my email and pass..

Hatseflats - January 7, 2010, 5:37 pm

Ive used Albertino's keylogger for a while and ive made sure alot of people downloaded it but all of a

sudden I didnt get any logs anymore but my mailbox wasnt full or anything.

Now ive made a new e-mail adress and still I wont get any mails anymore so can someone tell me whats going on (I use gmail)

kami117 - January 8, 2010, 5:34 am

nice keylogger sadaf tnx keep it up

imAcarrot - January 8, 2010, 5:37 am

GUI is bad.....

im downloading now

but its ugly xD

gaylechris - January 8, 2010, 5:43 am

hey iis it workin??? lol lol...it doesnt 4 me...some screen pops up if i open server...it works 4 any1?

and how are you supposed to get access to a teachers computer in order to make those changes

and if you have access why not just install the keylogger right away instead of trying to disguise it

Hatseflats - January 9, 2010, 8:10 pm

Hi,

I guess this works to log people with mozilla/iexplorer and chrome ?

and btw how long will it take to get logs 10 minutes I suppose ?

Muscles Glasses - January 9, 2010, 10:07 pm

Guys this is made in vb08 it isn't that hard but for the noobs of vb then its a pleasurable program, Could make custom GUI to improve it but good job overall.

Warpclaw - January 9, 2010, 10:12 pm

OO nice GUI, well the pic and the layout..How'd you make it like that?

wu239iusopp - January 9, 2010, 11:23 pm

thanks. it looks good.

dear first of all i will never try to hack anyone caz i just join this just for information and why should i
try to backdoor you either you are greater hacker than me.
so if you didnt like it just leave it for others.
thanks man and you can check it or you can crack it find the original code dude.
then you will find its clean and still i have not much knowledge on RAT. dear
although thanks for comments.

Your first program should never be something like a keylogger. learn to make things like email senders through smtp. then move on slowly to more complex things
