You named that punny dog rambo? My German Shepherd would eat that dog for breakfast and still eat his dogfood right after. You bring the name Rambo to a disgrace.

YERANUK - February 27, 2012, 8:05 am

What type of dog is he, I like how he looks, might get one for myself since my current dogs are so ugly (I still love them though lol)
I read your old thread, and I don't think it is a chiuhaha/papillon mix..

that will kill your dog so fast. Chocolate is poisonous in large proportions and for dogs just a small bit can kill them.
