Thread: [\[FIRST PROGRAM\] Absolute Basics! \[FIRST PROGRAM\]](#)

SBC Hacker - February 27, 2012, 8:04 pm

This is my first program it is VERY BASIC.

It is not intended for advanced users, it is sort of like a noob tool, basically what it is, is a program with 4 programs put in it of 4 different areas.

I DID NOT CREATE THE PROGRAMS CONTAINED INSIDE THIS

- 1 RAT - DarkComet V5
- 1 Keylogger - The Unknowns Public Keylogger V1.3
- 1 Adfly Bot - Blackwerus's Adfly Bot
- 1 DDoS - Lion Attacker

To exit you have to click in the center of the program on Absolute Basics.

Yeah, because you scanned a RAT and a key logger right? haha

.au3 - February 27, 2012, 11:19 pm

You scanned a damn .zip of course it won't detect.

My point is that it wouldn't say it was clean, it would obviously say it's infected..

I designed it as an installer not an actual standalone program so it won't show up.
