If were talking about speeds I can say that it is the same speed as my normal internet speed ?.

Big Vouch and recommends this service to Everyone.

(Oct 9, 2012 04:24 PM)Damnation Wrote: [\[CITE\]](#) Review:

I recently purchased Anonymous VPN, to stay secure when doing minor hacking jobs (All whitehat, and VERY minor.), and for general safety over the internet. When I bought it, I had some initial troubles. I am running Linux (My Distro is CrunchBang) and the networking set up for VPN's is less than admirable. I contacted The user "?NONYMOUS" about my issues, and he replied with sold advice, and a link to a website giving the problem more depth. It took me 15 minutes to get it setup. But it gets even better. If your using windows (you probably are) you get a link with the VPN info that fully details exactly how to set it up.

Note: I am writing this review as a silent "thank you" for ?NONYMOUS's great service, and support. I wasn't asked to do this, nor was I paid. I just like the program, and ?NONYMOUS.

I'm do not own these devices, but I'm almost certain that this will work. What you get isn't a program of some sort but simply the IP to the PPTP VPN and the login info.

If your devices can handle PPTP VPN's you should be good to go. ?

Please PM me if you're interested.

Looking forward to do business with you,

So if the police come to the VPN the owner can say he kept logs ;)
That way there's less trouble for him in the end, cause 15 minutes is nothing, by the time the police will trace it back your logs will have been deleted hours ago, probably even days.

I'm not so sure anymore =/

At first it was just me i thought cause I saw no one else complaining of the errors I was getting (619, 800,) but then other people got the same thing.

I was dissapointed because the speed and quality of this VPN was outstanding, other then the fact I

got those errors.

It's a loss dude, don't bother, I tried to contact him multiple times, the first time he said "I can't offer 24/7 service for this and I'm in the middle of doing a bigger business deal." This was almost a month ago and no response, I'm not trying to slander him as I assume he's busy IRL and went on vacation awhile ago.

I'm just warning other potential buyers to stay away from this, you are just giving him \$5 for shit service. If it was up, then it would definitely be worth it, but 24/7 downtime? no way.

Circle™ - April 7, 2012, 3:05 am

Well. He's he really needs to get online. I payed for a lifetime subscription, and now I'm getting an invalid username or password error.

D3tin - April 7, 2012, 6:17 am

[4:14:03 PM] ??azician: Message from Pazician:

"Dear Sirs

I'm very sorry for any trouble I might have caused.

I created a sales thread in the wrong section by accident and got banned as a result. My ban will be lifted 11th of April and I'll be back to reply to all your private messages and assist you.

To everyone who've already purchased the VPN and experienced problems please add me on skype, so I can sort out all problems and get you back up and running.

Skype: CallMeGuyFawkes

To anyone considering buying this VPN, don't buy it until after 4/11/12, where I'll have sorted out any VPN and purchase problems.

TLDR: I'll be back the 11th of April. Don't buy the VPN from this thread until then and if you have problems add me on skype: "CallMeGuyFawkes".

Best of luck until I get back,
Pazician"

@Z3R0 COOL:

Thanks for posting that, hopefully it gets sorted out in the end, I really liked this because of the speed, and the fact that it's p2tp cause I really need one right now to enhance my vpn chain

H?cker - April 8, 2012, 4:16 am

Hmm, am I the only one that seems suspicious. I read his reputation, alot of people have said the his tried to sell them things that are free. Also \$5 lifetime, I'm sure you don't host it yourself you're just reselling. How can you afford the VPN when it's \$5 lifetime.

I added you on skype, accept asap please.

Sirs

I'm very sorry that this is taking it's time, but I'm really busy in real life and all this VPN shit is killing me:

One of the buyers of the old VPN abused it somehow and tried to completely destroy it? At least that's what my providers are telling me. I'm currently emailing back and forth with them, but they won't just do as I demand.

If they keep rejecting my demands I'll boycott them, despite my lost investment in them.

I'm doing my best trying to get everything working again, please be patient - it takes long for my lazy providers to answer me every single time.

I haven't seen your messages on Skype, but I'll most certainly talk to you once I get online - I'm not trying to ignore you in any way.

Please have patience; send me an email and wait.

Kind regards,
Pazician

Good to hear you are working on this! May I suggest you increase the price, or add a monthly charge to it to increase longevity and reliability from a better provider? You had the best speed I've ever used.

Also what did they do to destroy the IP?

Dear Sir

The providers can't really say anything, they're stupid as fuck - I apologize for my language... I feel like I'm mailing with a child when I'm conversing with them.

Regarding the change of providers; it's not about the money - I'm earning enough from B-hat activities. I liked the speed of the VPN too, and that's why I'll fight a little longer. I'm expecting their response tonight. If they disobey again I'll change provider - probably to a US based one, but I'll still make it go through my Russian one.

Very legit, and very impressed!!!

I am glad to have this VPN back, very good service and speed, I just have a few questions:

1) How is the IP bounced? does it go you---russia--exit connection ?

2) It is 100% logless right? or does it only keep logs fro 15 minutes, if so if you were pressed by authorities, would you give out the IP?

You have my vouch for sure!

Yes it does my bad sorry! I failed to realize you updated it since the last time I checked it, one last question:

Can I use the same config files to connect to it twice?

Like lets say I open up my computer, connect to it. I then launch another VM and connect to a different IP address. I then launch another VM from inside that VM. On VM 2 can I connect to this service again, or do I have to connect to anotehr service?

Vouch for ?AZICIAN, great product so far - hope it stays that way!

Edit - Is the host having connection issues? My connection seems to be dropping every once and a while, causing me to have to go and release the connection, and try again.

Oww please.. NOTHING IS 100% SECURE
Unless you're your own ISP, have a socket chain for 100k socks5 and you own a 20 VPN then yes you may be 100% secure.

LOL just using TOR as your connection is that safe lol, if someone really wanted to they could track you back through it. NSA has cracked TOR's encryption method already.

This will make you safe for sure though:

you---vpn--vm--vpn---tor--webproxy

However you can get more security by doing this:

you---ssh--vm---proxychain program---launch VPN through proxychain---vm---vpn---tor--webproxy

EDIT: If you use pazicians VPN + TOR you will be really safe, his VPN is pretty fucking secure and I'm almost 100% sure it's logless, reason being: personal reasons. IF you still don't feel safe, you can use a logless web proxy, such as pirax.de/proxy/ You chain will then be:

you---vpn--tor--webproxy and honestly that will give you a pretty good fucking security chain. But if your hacking and dumping DARPA that will defs not keep you safe lol. If your going after really big gov't sites I would use 2vpns min, tor, a web proxy, and maybe an SSH connection.

Interested! But just a couple of questions -

- 1) How do we open ports? For example, ports 3080 and 3081. Is it possible?
- 2) Is this a shared IP address? Or is every IP private? Because a lot of the sites I go on restrict shared IPs.
- 3) Do this have it's own application, or do we connect to something like OpenVPN?

Thanks for the help!

Dear Sirs

I'm happy to announce that I'm back and ready to sell more copies.

I've had a lot of problems with PayPal and have come to the conclusion that it will work much more smoothly without the auto-buy link. I know that this will mean that I'll have to "do stuff" prior to you getting the product, and there might be a delay, but this is better than what we had before.

This will eliminate the carding I saw on my thread and I won't get in trouble with PayPal.

I'll be answering all your questions, but not in the thread; please send me a PM with your question and I'll get to it asap.

(I want to keep Q&A separate from the vouches and testimonials)

Best of luck to everyone, I'm glad to be back! ?

I would just like to warn everyone that this VPN is not as it claims to be. It is ONLY a US Kryptotel VPN. The sale went well and I would highly recommend it for viewing content only available for the US, but the Russian bit is completely bullshit. When I asked the seller about it, he tried to explain

himself, but there were obvious flaws in logic and after I pointed them out, he stopped responding.

@Seller: If you can prove this works the way you claim, this will become a vouch, but until then it stays.

The eternal question... the speeds...

This is really difficult for me to estimate as the speed will be individual. There's several factors that will change the final speed of the VPN, including country, initial speed, latency, PC etc.

If you got a very old PC and live in a country in Africa with crappy speeds and a shitload of latency, you can't expect the speed to be the best...

But take a look at the vouches and see how many buyers are satisfied with the speeds - I don't think you'll experience anything different. ?

I regret to inform you that I can't provide you with any speedtest as the end speed won't be the same for each buyer - therefore any result I might provide would be misleading. I think that this is one of the best Virtual Private Networks I have ever encountered on hackforums.
No logs will be kept so its good for blackhat activity (I don't endorse this) and it uses US ip addresses. It provides support and it there is no expiration. This is a great VPN, it is well-advertised, everywhere I go I run into the sexy looking signature, advertising this VPN. The owner of this VPN is a very legit seller and I strongly suggest that everyone buys this VPN. Vouch!

I vouch for Pazician's VPN. It is simply amazing. It's speed could easily compete with some of the much more expensive VPN's (especially considering this is THE cheapest one I've ever seen.) I'm not sure how he can even make a profit off of something like this but however he does it, if you need a VPN this is without a doubt the one to suit your needs.

I had pazician VPN, am I able to get this for free? How do I get the 5 other locations? Thanks

Or?ginal - August 19, 2012, 10:02 pm

Added you on skype - hoping to talk to you.

Keylogged - August 20, 2012, 7:21 am

Probably best VPN out there, works like a charm!

EDIT: Not even using my own connection now for ANYTHING, this VPN is much faster than my regular connection, and provides me with anonymity, thanks!

Lathame - August 21, 2012, 3:48 pm

I might get this soon! it looks very nice!

I would like to say this VPN is pretty..pretty..pretty..pretty damned good.

The seller is friendly and helpful, I asked him a few questions before purchasing and he responded quickly and patiently.

As for the VPN, I received it within a few minutes of purchasing it. Easy to setup and it's fast, and for the price of \$5 is the best deal going!

Thanks to Enigma for providing us with this great VPN, a definite vouch from me ;)

ASDA - August 26, 2012, 3:54 am

This VPN is one of the best around as soon as i activate it it works like my own personal connection

i dont even know i have it connected and running. I have bought the 1month package thinking it was going to be one of those VPN's with lousy support and not much uptime on it but i was wrong. This VPN has always been up no problems just the only downtime was the upgrade or what ever it was which i didnt mind. The support is just amazing Robert Your a good person and im glad your running the VPN with Anonymous because you have answered every single question i have had and even helped me out when i was/had problems with it.

There is no lifetime. That was probably a different product. The VPN is ran by different people, different service.

maxitis - September 30, 2012, 12:44 pm

Different username not different person.

He was selling the \$5 "lifetime" service for 1-2 months so as he can get vouches and then he changes his username and topic so as he can use the previous vouches.

If that is a different service it should also be on a different topic ...

Mut? - September 30, 2012, 1:27 pm

Blunts. - October 9, 2012, 4:24 pm

Review:

I recently purchased Anonymous VPN, to stay secure when doing minor hacking jobs (All whitehat,

and VERY minor.), and for general safety over the internet. When I bought it, I had some initial troubles. I am running Linux (My Distro is CrunchBang) and the networking set up for VPN's is less than admirable. I contacted The user "?NONYMOUS" about my issues, and he replied with solid advice, and a link to a website giving the problem more depth. It took me 15 minutes to get it setup. But it gets even better. If your using windows (you probably are) you get a link with the VPN info that fully details exactly how to set it up.

Note: I am writing this review as a silent "thank you" for ?NONYMOUS's great service, and support. I wasn't asked to do this, nor was I paid. I just like the program, and ?NONYMOUS.

Simply replace Y with either 'US' or 'EU'. ?

8bitworld - October 26, 2012, 9:58 am

I bought the VPN earlier today got a response within 30 minutes or so (probably quicker but there's always a detail using hotmail) and the speeds are almost as quick as my actual broadband stats on speedtest pretty much 90% like for like so no complaints there either. And everything is as stated in the 1st post so if you're after a VPN for a multitude of reasons this is your go to guy! I went with an EU VPN btw as I have no need for US Services but if you do you'll be enjoying blazing speeds no doubt about it. 10/10 for me great work and speedy response times Anonymous.

This is actually a very good VPN. But I noticed that the connection reconnects every few minutes and currently I don't even have an internet connection if I'm connected to the VPN!

If you want to get a professional VPN, I recommend to get another one than this.

You can only use this for sometimes.

I'd give this product 6/10

I have not had any problems at all with this VPN, I'm connected 24/7, Maybe somebody has your login details? I know if somebody tries connecting at the same time into your account you will get disconnected. You should probably request a password change.

For your information,

PPTP protocol has been cracked, so this VPN probably doesn't offer a great protection.
I don't mean trashing sales, but I feel normal to disclose the information.

I've sent a payment, according to previous orders, they would get the details of the VPN right after purchase, t's been 3 hours, still no email.

JoHN - November 12, 2012, 9:51 am

I purhased this yesterday evening. I've delt with VPN's in the past, but this is one of the only ones that work like a charm on a Mac. Processing took 6 hours, I got all the info really fast.

Support was good, as I wasn't sure if it worked on a Mac.

Well, now It works like a boss, and it's dirt cheap. Get it.

Now, the test is to see if this works at my school, now that would be awesome.

I get 32mb down, 6mb up.

A Public VPN. Do you have a dedicated or Private VPNs? Also I just got DDoSed and the VPN went down straight away no holdings and this means A Public VPN shares the IP with more than one person, so everyone went down or goes down when someone gets hit.

Great VPN tho for Browsing Anonymously but for playing GB or another COMP game type on Xbox live or PSN is not good when you get hit, cause everyone goes down thats on that server.

Great deal for 3 bucks. Vouch

DotVanish - November 19, 2012, 1:13 am

Just like any other vpn O_o if it goes down everyone goes down on the server.. and somebody could of had your IP before you connected. Also you don't really seem to understand how a server works, If a server has multiple IP's no matter what IP gets hit everybody on the server goes down.. Its not like each and every person on a dedicated IP gets their own server lol.

It depends on where you are located, pick a server closer to you. If you are really far from the server of course you will get slow speeds. So if your in the EU dont pick a US server...

There is more than 2 servers, when a certain number of people are on the server we move people on to them. Also, that does not have to do with anything even if we had 2 servers or 10 servers.... If we really wanted to we can assign users' spots on the network and forward the port to the user account they are using. Example... Assign 192.168.1.10 to client 10 Assign 192.168.1.11 to client11 and so on and forward a port to their assigned IP.

Also will purchasing in "bulk" for dedicated cost more or less?

Do you allow me to Refer other people to your service for a discount?

Do you support "lifetime" ?

Second vouch for the 6 month service. Still going strong. I really love the service anon. Once the 6 months is up, you can expect me to give you another payment for 6 months. This is the best priced VPN out there bar none. And I always have good speeds with it as well.

Empire--dumps - December 22, 2012, 4:02 pm

I'm thinking of purchasing multiple subscriptions to give as gifts. Is the user account, the email account you use to send invoice? Also when do you designate a password?

I would like to give the person who recieves these gifts the option to be able to either set their own info or be able to change their credentials.

Huge vouch from yours truly.

Upon receiving my personal login information, Anon personally directed me towards a simple and very easy to follow tutorial on how to fully configure his VPN. No less than five minutes later, I was fully connected a hidden behind a very sound, anonymous VPN.

I have in the past purchased and used various VPNs, including nVpn, which is said to be one of the best, and truly can find no reason as to why someone would spend more money for an identical product, essentially.

For the price (which, by the way, is what? Half the price of other competing VPNs?), this product is honestly astonishing.

I vouch fully for Anonymous, and this product, thank him for his professional manner, and would recommend to all those seeking a safe, fast, and easy-to-use personal VPN.

Kn1gh7 - January 7, 2013, 7:35 pm

If I could only describe this VPN in one word, it would be "FAST". With most VPNs you're bottle necked and slowed to the lowest possible speeds to conserve resources. AnonVPN on the other hand is extremely fast and you'll feel like you're not even using one! This is by far one of the best, if not THE best VPN on the market currently. You can count on Anonymous for reliability, so you won't have to worry about getting your service halted midway. Hell, I'd pay about \$15 a month for this. This is a steal for what it's worth guys.

How is downloading/seeding on your VPN?

bringiton4 - January 23, 2013, 7:37 pm

Vouch (again)... A bit of patience was worth it, I was one of the older buyers - however Anon promptly had a new VPN system setup and sent out to old customers. Although he could have simply referred to his TOS and not given out any refunds or continued the service - he showed his character by taking the time to set the VPNs back up again. Now the service connects through the OpenVPN GUI, I previously had trouble with my VPN which I couldn't resolve (despite his best efforts troubleshooting), however so far this connection works perfectly.

So thank you!

pelayo - January 23, 2013, 9:01 pm

Leo Owns U2 - January 23, 2013, 10:07 pm

After trying it out I definitely recommend it, it is fantastic! My speed didn't decrease a single bit, just as if I wasn't even on the VPN but I am absolutely secured :p.

Only thing I noticed was that a few sites would ask me for captcha and those sort of things before being able to see, but really don't mind as long as my IP stays protected :).

Due to increased interest I've been forced to increase the price; I've been having way too many customers daily and I haven't been able to carry out purchases as quickly as I would like to.

I've increased prices by a tiny amount and added a "One Year" option.

Kind regards.

IP is shared. This is evident in the fact that the actions of some users negatively affect the others with the same IP.

Port forwarding your router while on a VPN will not work. Also port forwarding is down atm I believe, so I guess we gotta wait for Anon to fix it :)

Receiving same error as this guy, pretty sure my subscription is still active as well due to the downtime.

Turtle™ - February 8, 2013, 12:09 am

I can't say that I'm not a little bit dissatisfied with the VPN. The speeds are lower than my normal internet speed and the port forwarding feature is not active. I understand that he has a lot on his plate, especially with the server change and all but I think that he should have at least notified his customers that the port forwarding was not working, especially since he doesn't give out refunds...

The anonymity is pretty good and the speed is OK but I just wish that the VPN gave what it promised. Port forwarding was one of the main reasons why I got a VPN in the first place.

BulletsModz - February 8, 2013, 1:41 am

It works for me -

Create a file in the OpenVPN\config folder and call it password.txt

Open it up and on the first line type your user name.

On the second line type your password

Save the file.

Now right click the Open VPN GUI icon in the taskbar, and click edit config.

Spoiler [\(Click to View\)](#)

Find the line that reads 'auth-user-pass'.

Change it to 'auth-user-pass password.txt'.

Question on the # website says that the VPN is based in the Netherlands, thats all good for me , however i scroll up and click on purchase and figure i might as well read the ToS

By purchasing this product you agree to the following:

You acknowledge that the VPN is based in the USA, Kansas.

So , wrong marketing, misdirection or whatever.

<http://www.#.net/index.php?page=vpn> - In the prices section it tells you that the VPN is based in the Netherlands.

So which is it, is the VPN in US Kansas or in the Netherlands ?

?Polo? - February 23, 2013, 9:06 am

To hide your IP over XBL, you will need to tether your VPN to your Xbox, this can be done with a Ethernet cord from your computer to your Xbox. you can find plenty of tutorials on YouTube.

I tried to get this VPN to work with the OpenVPN client. The profile wouldn't load, so I put in the server URL manually, and I get this:

Unable to obtain Session ID from vpn.#.net:1194: XML-RPC: ConnectionRefusedError: 10061: No connection could be made because the target machine actively refused it..

Any ideas? (Same without :1194)

I just bought it :) I can't wait to receive :D I will update with my opinion of the VPN when I can!!

Please hurry and send me the creds!

Well, I received the info within a few hours. But I can't log in. I have gotten several different errors so far. But I have talked to support, and sadly it appears that they are online from early morning to mid day, in my time zone :P so e-mail takes a little while. However, I will update when I am able to fully connect! :D

First go to your server opvn file you want to auto connect to and open it with notepad++ or similar.

Find the line with "auth-user-pass" and change that line to "auth-user-pass pass.txt"

Now in same directory as the opvn file create a new txt file named "pass.txt"

Now open "pass.txt" and on first line enter username for vpn login and on second line enter password. Save and close.

Now you got autologin you can do this with any all server opvn you need enabled.

Vouch vouch vouch! I bought a subscription/membership for one month and I sure will be buying it for a year after the month is up. Awesome auto-pay system, amazing VPN panel, 10/10 will use forever. Only down-side is the current downtime which is coming from the IP transfer... but I know Anon is working hard on resolving the issue.

Resolved one minute after you posted. ?

Soon all buyers will have three IP's they can connect to ensuring that at least one will always be online. ?

You won't receive an email with the credentials; you shall just log into the VPN Panel with the credentials you registered with.

Note: I'm setting up the three other servers now and moving site to new servers - as bought a

hosting company.

Please be patient while I carry out the transfer.

juggalobeast - April 27, 2013, 1:04 am

love how it works, bought a year sub for it and less than an hour later it is down...guess ill test it out tomorrow once everything is back up lol

it is back up, as long as it stays up i would say it is a very good service, on my 50/5 line im getting about 15/2 through the vpn, it is alot better than some others i have used.

so other than the down time it is a pretty decent vpn, looking forward to my year of use

Do you really think you can purchase a service and then get a refund for it once you've used it for whatever purpose you needed it for?

Reason for downtime has been stated.

Did you consider that your ignorant attitude could be the reason why I didn't provide you with the same support as I give everyone else?

I had nothing but issues when I had purchased it. I wouldn't recommend this to anyone. I have had way more down time than I have had uptime. Only being able to connect to one IP at most times. Instead of fixing it or answering my messages he negatively replied me lol. But yes this is nothing but issues. Goodluck.

Hello, I recently bought your VPN and it has been working for me for a day, now that I'm using it, only the first IP that has been given to me works (VPN1) and the others don't work. When I connect and I enter my username & password, it takes a long time to connect and when it is connected nothing even happens, my IP doesn't change. All the sites are still blocked for me. But yesterday, it worked fine for me. I don't know what happened today.

EDIT: It worked, but VPN 1 isn't working. Just remember to run as admin.

Did you try to run openvpn as admin?

Because if you don't run it as admin, your IP won't change, I got this problem at first too

nightxblade - May 21, 2013, 10:43 pm

I saw earlier that you said you cannot Portforward for a RAT, but in the features it states that you can Portforward with your VPN. Please respond, as I'm looking for a VPN(:

Thanks!

No those are just the IP's assigned to your account. So when you connect to VPN 1 for example it will show the first IP on the list on your account.

Same problem, i talked to Anonymous via PM and after i asked him if he could create a new account for me on the site because i wasn't able to login he just ignores me. Well, it looks like he doesn't want to help his customers to fix the issues and im very disappointed about this. Also, i'm not able to forward any ports although this was an advertised feature of the VPN and instead of providing support, he just says that i should let my subscription run out and buy a new one (I purchased the 3 months sub at 28th april and now i can't use the features of it for the rest?).

I'll ignore all messages saying "doesn't work"; if you don't give me any details as to what error you get or why you think it's not working, I can't help you and you're merely wasting my time.

Furthermore this is a sales thread, not support thread; I consider all "doesn't work" posts on here as sales thrashing.

Three IP's from Netherlands. Country is stated in the OP and number of IP's is irrelevant - I offer security, one IP is even enough.

I do not think so. Multiple different IP's can come in really handy when getting IP banned and stuff. I don't care about multiple locations, just about some more IP addresses.

Same thing here, doesn't work for me either. I contacted Anonymous about it, he asked if I'm using No-Ip and I'm still awaiting further support.

Also this VPN seems to go down alot. Yesterday at this time it was down, too.

Don't want to complain though, 15\$ for half a year is a great deal either way.

Shop has been closed to prevent overwhelming amounts of customers.

We'll reopen sales once subscriptions ends for some of the current customers.

Vouching for Anonymous , Knows his shit .

Regards,

Candyshop - August 11, 2013, 8:47 pm

This is a great VPN I used it for a long time when I had my old computer!

Rat_Installs - August 11, 2013, 11:01 pm

are you really from ?nonymous i love that hacker group. I would love to be in it with you i have LOIC cannon which i know smacks at 150Gbps so ya let me know.

Makabra666 - August 17, 2013, 1:08 am

Vpn and site don't work any info !? :(

I don't think a LOIC cannon would hit any harder than 50gbps.

Huge Vouch for Anon. I have purchased this before and I have loved using it!?

It is down for 1 week now... What's happening? I got a license for 4 weeks..

Paravicious - August 19, 2013, 3:09 pm

Can you get the VPN up already? You have customers waiting for you....

Education - August 19, 2013, 3:16 pm

Would this VPN be untraceable back to my IP?

d3lud3 - August 22, 2013, 12:25 pm

Haven't had this working in a while.

Any instructions for iOS, I couldn't seem to get it working with the OpenVPN app, it wouldn't read the files properly.

- **KG** - August 23, 2013, 11:01 am

Are you still continuing with this? Haven't worked in weeks, and no reply's from PM's? Get back to me so I know if I can move on or not.

Cheers

Blad3 - August 24, 2013, 5:06 am

1week it is offline , will we get it back?

Makabra666 - August 24, 2013, 11:36 am

Idk im waiting too. <33

Love this VPN

x64 - August 27, 2013, 1:29 am

Still not fixed, just asked for a refund. If I won't get it, i will chargeback. Because it has been down for 3 weeks or even more.

t?rtuga - August 27, 2013, 7:32 am

I beleive # was hacked, so thats why i think hes taking a while to get it all back up and running

Makabra666 - August 27, 2013, 8:34 am

Where i can now download ovpn files ?

?nonymous - August 27, 2013, 9:07 am

This service is up and running.

The database was automatically terminated to prevent a trusted 'friend' - who went rouge - from dropping the database; no data was stolen.

Old customers can't log into the VPN Panel; they can still log onto the VPN's with their old credentials as they're stored as hashes locally on the servers.

Retard will be dealt with accordingly.

Purchase:

<http://#.net/vpn/order-hf.php>

VPN Panel:

<http://#.net/vpn/login.php>

Setup guide:

<http://#.net/vpn-setup.php>

OVPN files:

<http://#.net/config.zip><http://#.net/config.zip>

still offline ?

i cant login...

and well get refund ?

Does that mean that we don't need the panel anymore/will never get access to it? When can we log into it again?

Panel was primarily used for activating the account on the servers - old buyers already got it activated and new buyers will get added normally.

You can't test ports with third party services - the port is solely open through your connection using your credentials.

You need to install TAP-drivers; look at the last part of the error log.

Xp0s3r - September 2, 2013, 5:25 am

It's actually worth to buy one year of this VPN?

May I ask too if all the ports are opened or you open the ports you want via VPN panel?

Thanks.

Mr C - September 2, 2013, 2:11 pm

I had intended to look through this thread for the answer but it would take forever.

Does this VPN now have dedicated IP Addresses? The only issue I have is that I don't want to find out I'm banned on certain websites from someone else's actions.

Also, what is the level of encryption?

Thanks in advance!

Blad3 - September 3, 2013, 10:47 am

ty for the "customer support"....

no answer no help .

vpn seems connect but the ip doesn't change

some 1 can help me with that whats wrong its was worked fine to me and something happend

SnakeHF - September 3, 2013, 4:33 pm

now this vpn is arguably the best ive seen so far nice vouch

Xp0s3r - September 6, 2013, 6:29 am

I don't know if I'm port forwarding correctly but it is not working for me, and I bought it (apart of the cheap price) because the port forwarding.

Please help me.
