Thread: [\[HOT\] How to make 600-700 dollars a month on autopilot! \[No investment\] \[HOT\]](#)

Epoch - February 29, 2012, 4:01 pm

If you would like to download this ebook (small survey to download, no downloads required) then do so here. I would REALLY appreciate you doing this method as it took a long time to write this and I am giving it out for free. You may do so here: <http://dollarupload.com/download.php?file=15226>

If you would like to link to the "quick" download, then you may PM me and receive it that way. I usually reply the same day (I only offer this method in case you feel like surveys may harbor viruses etc.)

After a week of using this method I have made \$50 with no investment at all, now that I have \$50 to reinvest I can make upwards of \$1,000 dollars a month (That is a proven number and I am following a careful set of guidelines.) After I reach 3,000 dollars which should be around mid-end of April I want to create a stock portfolio and from there save up so I can buy a nice car. I hope you can realize the power of this method, because I did and after being persistent for only a week and not giving up I am so happy I started.
