Thread: [edit button doesn't have options anymore?](#)

Rolex™ - February 29, 2012, 6:27 pm

Hi HF, I have been noticing for awhile that when I click to edit my posts that, there's no option for a "Quick Edit". Like when I push "Edit" it goes to the full edit automatically I don't even see the little drop down menu. So, did Omni do this or is it just me?

Jonathan55866 - February 29, 2012, 6:28 pm

Just noticed it as well. It was working before. Omni must be doing something.

/edit

It's working for me now.

SomeWhiteGuy - February 29, 2012, 6:31 pm

It works, i think that it is if you just recently posted a thread it automatically goes into full edit.

Douchebag # 145 - February 29, 2012, 7:30 pm

I have the button, it is only you. I think that I've had a similar problem before though, it fixed itself eventually however.

Vexna - February 29, 2012, 7:33 pm

I think you have to refresh the page if you want to click "Quick Edit".

EDIT: Yes, just tried, refresh the page and you can use this option.

You can also lock this thread. ?

This happens on slower networks, it's happened to me countless times.

J0uk0 - February 29, 2012, 8:31 pm

Works 100% fine for me. So I'm guessing its just you.
