Thread: [New good priced rat coming "Bionic Rat"](#)

**goofygoober** - March 3, 2012, 6:30 am

Well im sick of these overpriced rats so i am finally making a rat that is only 15 dollars i am adding hwid system now i will post more info later but would anyone like to reserve a copy first 2 customers get 5 dollars off

**van1lle** - March 3, 2012, 6:46 am

I wonder why everyone mentiones the HWID System :3  
It's not a feature, nor has it any advantage for the customer.

It's not a feature, nor has it any advantage for the customer.  
He was just posting an update about his RAT & what he needs 2 do before he markets it.

He codes Delphi6.net, haven't you heard of it? It's the next best thing to be released from Microsoft on the .net framework.

So true lol.

OP just because you found a rat source doesn't mean you can sell it. Your posts show us you can't code for shit.

**Pinch** - March 3, 2012, 10:31 am

Definitely not going to buy this after looking at you threads, I.  
I call C+P.

**Predator\_Crack** - March 3, 2012, 11:29 am

The title/name seems interesting (bionic ∴ ) but in what language is coded ? What are the unique features it may has in the end compared to other rats ?

**osos96** - May 21, 2012, 9:52 am

my router doesn't have this option in its menu only:  
System Management  
Diagnostics

System Log

Logout

Firewall

Port Mapping

LAN Setting

Wireless Lan

System information

Service information

so is there any way i can use a rat now i actually liked prorat so much but couldn't setup it i built a server and did every thing but i can't get the slave ip address i tried it on my self and wrote my ip address but didn't even connect

also i liked this one cyberGate but i can't port forward so any help please
