Thread: [? \[SOURCE\] .NET Runner - Visual Basic Game \[RELEASED\] ?](#)

Weakky. - March 3, 2012, 2:23 pm

.NET Runner

[Video: <http://www.youtube.com/watch?v=8xU98Aag5Xw&feature=youtu.be>]

Well Hackforums, here is what I promised you a few days ago. The game is now almost stable and optimized (Even If I'm still using timer). It comes with 2 levels, and I'm sure there is a lot of things to learn with the source code. I'm still working on the random map system (With yourkii), and We'll release that as soon as possible.

If you have any suggestions or whatever else, please, leave a comment.

Download Source Code : Post here and I'll send you the source.

Due the massive ammount of un-trusted user asking for it, I make some new condition.

- If you're l33t or Ub3r: Simply ask for it.
- Otherwise, You need to have minimum 12 of Prestige.

Download Binary File : [.NET Runner.exe - Localhostr Link](#)

+Bourbon - March 3, 2012, 2:29 pm

Why do you want people to PM me you I don't understand that post fair enough.

tokzicate - March 3, 2012, 2:30 pm

EDIT: Got the source straight away! Thanks for the share Translu6de!

I saw you post a thread about this the other day, could I get the source?

Good luck with the random level generator!

Pretty fun game, nice share. I like it :)

If I don't do that, people will download it without saying thanks, and I hate that. I already tested it with an old version of Screenshotr. I had about 250 downloads, with 25 thanks. Fuck off. I don't want to share it with all members too.

Biatch - March 3, 2012, 2:34 pm

Looks great, pm'ing you now for the source :)

Blink - March 3, 2012, 2:37 pm

Looks very good, TRANSLU6DE :)

Well, not the graphics, but just in general :D

Weakky. - March 3, 2012, 2:39 pm

Thanks for the feedback Blink ! I know the graphics are bad, but I find the game funny like that ;D.

Fake. - March 3, 2012, 2:40 pm

From what I can see it's just spamming spacebar -> i.e. as soon as you land you jump again.

Weakky. - March 3, 2012, 2:47 pm

Loled. Download the game and test it. You'll see how hard the game is. You need to accelerate or break to pass levels. If you simply jump, you'll loose on the first cube man..

tokzikate - March 3, 2012, 3:21 pm

Fake. you need to use all the arrowkeys, to speed up and decrease speed!

Great game OP.

One thing that you should add, is this:

Code Private Declare Function GetAsyncKeyState Lib "user32" (ByVal vkey As Long) As Integer

Private Sub Timer3_Tick(ByVal sender As System.Object, ByVal e As System.EventArgs)

Handles Timer3.Tick

Dim spacekey As Boolean

spacekey = GetAsyncKeyState(Keys.Space)

If spacekey = True Then

Label3.Hide()

Timer1.Start()

Timer2.Start()

Timer3.Enabled = False

End If

End Sub

And on Level1_load start the timer_3, so that you can start the game using the spacebar, instead of having to click the label, and then quickly put your hand back on the keyboard.

Weakky. - March 3, 2012, 3:32 pm

That's a nice idea man. I thought to add a countdown, but I would be annoying after a few try's.. I'll add it to the next update, thanks :).

Bad_P1zza - March 3, 2012, 3:38 pm

Could i please get the source? Very nice game btw :)

Yes I understand saying "Post and I'll send" because then not everybody can have it and you have some response but I don't see how private messaging is beneficial for anybody? Meh it's your thread, you can do what you like.

Phaxol - March 3, 2012, 7:25 pm

Haha this game is really fun and hard. Good job!

madTRiiKs - March 3, 2012, 9:16 pm

damn, that looks sick. im going to pm u for source, hopefully i can learn from this.

Hm, you're probably right about PM'ing me. I thought that it would be easier to answer to them, but infact, No. I'm gonna remove that.

@All others: I'm going to send you the source now, sorry for the delay.

onecool - March 4, 2012, 2:48 am

this is a good game good man (mon anglais n'est pas terrible :D)

maruata - March 4, 2012, 3:03 am

Love to try, Love to have the code too!

Really it's a nice one! If more level available, it would interesting!

Weakky. - March 4, 2012, 3:24 am

Source code sent to almost all persons. Hope you like it, and thanks for all feedback's.

I really loved the idea..

Reminds me some iPhone game .. -.-

Weakky. - March 7, 2012, 7:22 am

I clearly said in the thread that it's a remake of Line Runner man. Thanks to both of you, appreciated :).

xDowwdeen - March 7, 2012, 8:17 am

WOW this is brilliant. A nice idea would be to use a person running instead of a Blue block. Just an idea.

-xDowwdeen

Weakky. - March 7, 2012, 8:34 am

Yeah I know, I could use a GIF with a person running, but I wanted to leave it like this, because I find it funny. Thanks for the feedback (:

Weakky. - March 10, 2012, 6:36 am

Sent to Imprerialz. Glad you like it man ?

gelooc - March 10, 2012, 6:48 am

I found a mistake/bug on the game. When you lose a message box appears and says "You loose in 21 meters. Would you like to replay?" If you click "No" then the game close and if you click "Yes" the game suppose to start a new round but it closes. So whatever you click the game close. I dont know if anyone repost the problem. By the way, IT'S A GOOD GAME ! Nice job bro! (Y)

Weakky. - March 10, 2012, 6:55 am

Yeah, some friends had this bug too, I don't know why it happens... Thanks for the report man.

Sho?kwave - March 10, 2012, 8:22 am

I love this game bro ;), very fun to play, may I take a look at the source?

Percocet - March 10, 2012, 7:07 pm

Nice job dude. Even though it's using a timer I still think it's pretty good. Considering the form doesn't freeze. :)

BTW, I'd like to get the source from you.

[Eprouvez] - March 10, 2012, 10:01 pm

looks impossible :P
btw.. can i get source?

Smoogel - March 30, 2012, 1:03 pm

I got a bug with the version uploaded here.

When it asks if I want to reply, and I click yes, a .NET error quickly pops up and fades before I can read it. Then the whole application crash and stops.

I have Windows 7 64bit with .NET framework 4.

?Reath - May 22, 2012, 3:30 am

Mind sending it to me ;)

BlackCap - September 25, 2012, 1:12 pm

I can't say for sure whether you used GDI or colored panels, but to me it looks like the first one. If not, shame on you. It seems quite good however, except that the player seem to get closer and closer to the edge of the form, and acctually gets out off the screen on the secound level.
Another thing which bugs me is that you close the form on the end of each level, something which aren't that bad, but for god sake please set the StartPosition to CenterScreen or store the old location.

Randomly generated levels would have been nice. One easy solution to this could be to create a graphicspath, randomly create cuves relevant to the players jump height and speed, and then randomly create a buntch of obstacles with random sizes and make sure they don't inselects with the path.

Also add more obstacles like holes in the ground, flying enimies, possible the ability to shoot them or trick them into obstacles. How about doublejump?

As you said, shame on me. I made it using picturebox. All picturebox's are moving using a simple loop. I've already tried to make random level using GDI+ but I failed when I had to make all drawn rectangles in movement. This was a little example on how to make "gravity" in .NET, that's why I didn't really update the game. Moreover,

the game is not really interesting except if you want to learn the code itself. Thanks for your constructive comment man, I really appreciated.
