I need to work on the cloner for my product and make it perfect ?. As a result I need some websites to test. Just give me a link and I'll upload the cloned website as well as a screenshot of the website.

Impressing work [jhfire](#)! I'm looking forward to it will be implemented in your service :)

Orpheu - March 4, 2012, 4:41 am

HTTrack Website Copier already does that for free.

you just need to remove one or 2 lines from the index.html to it look's exactly like the original, it grabs everything on the site.
