Hello dear members of this forum, I am learning VB .Net for about a month and now made a sound converter. Its just a simple converter. You can sound file convert to mp4,mp3,m4a,wmv,avi,wav formats .

Screenshot

[img]http://img191.imageshack.us/img191/8729/84225891.jpg[/img]

Supported file formats:

Executables (.exe)

Does this actually convert or does it just change the extensions?

Ingenuity - March 4, 2012, 3:32 pm

Lies. This is not a sound converter. This changes the extension of the file. Changing the extension and converting the file are two completely different things.

Penthos - March 4, 2012, 3:43 pm

Lmfao I was thinking what Jack confirmed.

Also a big lulz at the fact op thought changing the extension was "Converting" .

I almost guarantee it was a so call tut on YouTube he followed.
