Thread: [??\[READ-UPDATED\] 10mw Green Laser Pointer \[READ-UPDATED\]??](#)

Pr?digy - March 4, 2012, 6:39 pm

Update

As you all may have noticed.

Some have received their laser and some have not.

I have tried to keep in contact with all of you and I am updating this thread and not closing it because I am not a scammer.

I have never tried to scam and will never try to scam someone.

So about the lasers.

Very few of you have received it...In fact I think 2 out of about 25 have.

You all may be thinking that this is terrible for you because you are now not going to get a laser. Well this is much more terrible for me, because now I am refunding the payments of those who want a refund AND I am losing the money it cost to build the lasers.

What Happened?

To be honest I really am not sure.

Since some of the buyers received the laser I think that it was customs that took the lasers. I will continue to dive deeper into this problem and try to find out what happened

So What are we going to do?

Well Sadly there isn't much for me to do.

The most I can do is just sit in disappointment.

And there really isnt anything you can do either.

Will I get my Laser?

If you have not gotten your laser by now I doubt you are going to get your laser.

That isn't a no...but if you are willing to wait you can.

Can I get my money back?

Well it cost me \$4 to build each laser and I charged you \$5.50

Then it also cost \$3.50 to ship...bringing us to a total of \$9

If I refund everyones payments I will have lost over \$50

I guess that is OK.

If you would like a refund Please PM me and we can discuss your refund.

AGAIN I AM SORRY

And I am so sorry this happened.

I think I will stick to selling DDoS and virtual items.

Shipping details and all these payments was such a hassle.

Hell I was even in the hospital for a week.

I dont want to go through this again.

Sorry to all and I hope we can all still be friends :)

Have a Good Day.

Feel free to post or PM me with your comments or questions.

I'm interested, do these ship to UK?

Transpose - March 7, 2012, 8:42 pm

I bought 3 from him 3 days ago, he said he would give me tracking the next day but has yet to reply to any of my pm's.

Positive - March 7, 2012, 9:15 pm

Not going to lie, this is very cheap for a 5mw.

But this will not burn things.

Upgrade to a 250mw (or above) to burn shit.

These are allowed to be shipped in the US. They are not illegal.

When you hit the watts, then they become VERY illegal.

Charger - March 8, 2012, 3:34 am

I should get mine today, I will let you all know if I do.

JinDawg - March 8, 2012, 3:41 am

Can you ship to AU? Not sure if legal or not.

Volcom Stone - March 8, 2012, 3:46 am

These look pretty sweet. Quick suggestion change;

??[Super Cheep]

To

??[Super Cheap]

??[Super Cheap] 10mw Green Laser Pointer 10 Batteries Included [Super Cheap]??

Unless the words "Cheep" is what you were going for.

Charger - March 8, 2012, 11:26 am

Didn't get mine today. Starting to wonder if I got ripped off or not, since he's not answering PM's.

Silent1ntruder - March 8, 2012, 11:51 am

Im interested, could you PM me if you still have these for sale.

Transpose - March 8, 2012, 11:53 am

I advise for no one to buy this till someone can confirm they got their lasers.

OnStar - March 8, 2012, 12:54 pm

Same here. It seems more than ten people have bought them, and haven't/won't get their product. He's also ignored all PM's, despite his last time logging in, being; 'Yesterday 08:15 PM'

Get the hell out of here with that shit, please.

I have shingles and have had them since I was young. You don't just get "diagnosed with the shingles", it's a reaction to the chicken pox vaccine when you're young, or you're really old.

Pretty sure you all got scammed by this guy. Don't fall for his shit and dispute ASAP. Explain your story and that others also got scammed as well.

He is letting me receive my laser first, and then pay.

We will see

Arckos - March 10, 2012, 8:34 am

I don't see why everyone is complaining. he said either friday or monday. its not even monday yet dont get your panties in a bunch.

I know about 4 people who have shingles. One person in my own family has gotten them. It's not caused by the vaccine. It's caused by the same virus as chickenpox. So if you haven't gotten the vaccine, you can catch shingles too.

We both make our own lasers and I tested his out. They are about the same.

And I am sorry you guys don't believe me about my shingles. I will be sure to post tons of pics when I recover.

Osuka - March 11, 2012, 11:07 am

The Pilot - March 11, 2012, 11:16 am

You got shingles and you won't be able to send it out?

How come yesterday you were telling me that you will send it out soon and that I will receive it soon?

Charger - March 12, 2012, 8:58 am

I didn't get it today. Calling PayPal later .

Pr?digy - March 12, 2012, 10:08 am

If you guys are un-willing to wait I will be glad to refund your money and have the shipping company have you sign for a return when you get it.

Again I am not here to scam so if you want your money back I will refund it...but it will be disappointing for you when you get the laser and you have to sign to have it returned.

It has been 4 from when it said I would get my laser.

Pr?digy - March 12, 2012, 11:01 am

Yes and apparently I have to pay the post office \$0.50 for each box and I didnt realize it and I didnt do it until today...(When I got out of the hospital).

So you can either wait a week or I can refund your money.
Just tell me what you want me to do.

Please tell me when you now need to pay an extra \$0.50 when you didn't before? And why wouldn't they tell you that when you dropped off the package?

Pr?digy - March 12, 2012, 11:09 am

I dropped off the packages in the drop box...they held them because there is a shipping fee for each of them, not just by the shipping company...but also by the post office.

Arckos - March 13, 2012, 10:21 am

So we need to pay you an extra .50? Or when should I be expecting my laser. Thanks

Could you post a picture of it? A lot of members are skeptical of this..

Also the reason he didn't get it shipped out is legitimate. It has happened to me before.
