Thread: [\[RELEASE\]\[SOURCE CODE\] XXXDownloader - Download videos from adult sites!](#)

Ingenuity - March 5, 2012, 4:15 pm

Hey Guys, just another quick release along the same lines as my CFake downloader: XXX Downloader.

Downloads video files from online video storage services, including

- Motherless.com

- Pornhub.com

-Way more coming soon - I'll update this thread, but my ideas include xnxx, redtube, etc. I'll also take requests if at all possible.

Other features include:

- Multithreaded downloading

- Segmented downloading (the program downloads files in segments, and then appends them to one file on your drive, meaning that sites which throttle your video download speed (such as motherless, etc) will download much faster than normal. This is the same strategy that programs such as IDM and DAP use).

- Parallel downloads

Coming soon:

- Clipboard monitoring & more websites

Gif of functionality:

[img]<http://dl.dropbox.com/u/7543521/Images/Untitled%20%282%29.gif>[/img]

Note: The gif is paused in the middle so you don't have to watch a progress bar inch forward while downloading 100mb of video.

Download: <http://dl.dropbox.com/u/7543521/Archives/XXXDownloader.rar>

Virus scan (main executable):

<http://virusscan.jotti.org/en/scanresult/64a26f34567bbfe2bfea0e7395a67edb24d20674>

Virus scan (installer executable):

<http://virusscan.jotti.org/en/scanresult/5054c8b9af2fc4d4a0297edbf133fc0855d0cf46>

Source Code: <http://dl.dropbox.com/u/7543521/Archives/XXXDownloader%20%28Source%29.rar>

Note: This is also the source code for my CFake downloader too!

How to install:

- 1: UnRAR to a folder

- 2: Run "XXXDownloaderInstaller.exe" as administrator - this won't show any UI, but will register the necessary .dll files for XXXDownloader to run.

- 2: Run "XXXDownloader.exe" - the UI should load without errors.

Edit: btw, all files are saved to my documents.

(?°??)?(???? - March 5, 2012, 4:16 pm

What's with you and all the adult programs recently xD?

F?y - March 5, 2012, 4:17 pm

I think i love you thanks alot

YES PRON ON MY PHONE

I'm not sure. I just made this as a challenge for myself, and a tool for other people to use. You haven't even seen some of the stuff I've coded for my own use in terms of applications like this - I'd be banned for posting it here in all probability.

F?y - March 5, 2012, 4:42 pm

This crashes upon opening it please fix thanks

Yeah, we all know that's true Jack.

You interested in creating porn programs for windows phone?

Sure it won't go on the marketplace, but I'm sure the home brew community would love it

I bet it would go on the marketplace, most people here loves giving their dick the old tug & pull often, especially Jack here. He lubes up all the time for the big mamba stroking of the day going up and down on what could be the best of the day, though we all never get that same first time.

Gr3eNoX - March 5, 2012, 9:46 pm

u...p first cfake image downloader thn this..whts next??
btw nyc job :)

rotemvalkrie - March 5, 2012, 9:51 pm

good program idea, looks pretty nice too

2: Run "XXXDownloaderInstaller.exe" as administrator - this won't show any UI, but will register the necessary .dll files for XXXDownloader to run.

I've got xnxx and redtube working. I've also got browser and hotkey integration with Firefox & IE - so you can just press a hotkey and the program will download the video from the current URL of your browser without any other action on behalf of the user.

hazeleekaizera - March 7, 2012, 1:06 am

can you add xvideos.com , xhamster.com and japanese site videos please

kuhchuk - April 27, 2014, 10:23 pm

I can't seem to get the Cfake downloader to work. The image files it downloads appear to be .jpegs, but nothing will actually open them. And that's not to mention after the first 30 it fails to parse the download links.

Haven't checked out the video downloader portion, but I'll try that shortly.

Any idea why this is happening?

Only3 - April 27, 2014, 11:56 pm

what u except from 2 years old thread ?

It appears that this guy likes gravedigging and porn

Ingenuity - April 28, 2014, 4:01 am

No shit, they've changed their website after 2 years. Download the source and play with it till it works.
