Really ? I actually loved it.

I couldn't use this amazing wallpaper I made since I didn't save the .psd and resizing fucks up the image.

Ironic..

the bear is too "real" and near.. but the background is very nice. 6/10

I liked it when only 20% of the image was loaded:

1. The polar bear is to light and is in conflict with how dark the background is.
2. The opacity of the text, why. Oh my lord.
3. Why radiation? The "X"?
