On other news....

that some interesting turns of events during the last 3 hours.

any thoughts by anyone about Sabu ratting on his fellows since more than half a year? I bet they said: "Talk or Guantanamo" and who wouldnt have then....

Edit: they got him with his kids...

"He didn't go easy," a law enforcement official involved in flipping Sabu told FoxNews.com. "It was because of his kids. He didn't want to go away to prison and leave them. That's how we got him."

Many good hackers do, since it takes more time to dump, who's "Sabu" anyway?

it is safe to use a tool like havij ?

@einbrettholz

Lulz Sec - Ist keine Kinder-Gruppe Jungerman.

@Sw1x

Leader of a movment, like i said in german.

He was the leader of LulzSecurity,

They hacked sites like: Sony, Goverment, CIA, FBI.

@xSellize

Of curse havij is a good tool if you dont have time, but

to train your skills you should deface min. 1 websites without havij per day.

Dont listen @Guys thats saying havij is low, of curse its a great tool.

But you are a noob if you using this anytime i using SQLMAP,
If i want to dump. databases. Because it looks damn sexy <3
With Metasploit your chances are 20% higher and looks sexy too =].

punkstoper - March 6, 2012, 1:04 pm

sabu, is [censored]'s leader, a break-off group from the movement Anonymous, He and his minions hacked into sony fbi ect,ect just google you'll find loads, but he gave away information about [censored], and got them all arrested, to me they should all fuck his life up, hack his bank accounts, ect, no hacker is ever going to trust him ever again, he has destroyed his rep, and nobody can save him from the 1337 years he's about to face in prison.

Hey Crysan,

Im not saying LawlSek is a child-club, all the opposite, i just wanted to state that even demigods cook with water.

Sabu did what he did, be it good or bad everyone can judge for himself, but he will roast in the most inner circle of hell (dante) not for hacking statfor & co. he will go there for betraying his friends.

It's just sad he left the way he did.

The guys he fuked over wont have the luxury of selling out for a good deal.

gatopardos - March 6, 2012, 1:34 pm

there goes lul-z-sec..its sad we don't know which methods they used...

| Solo | - March 6, 2012, 1:35 pm

I hope he rots in prison. I would never rat on my fellow hackers and friends. What he did was cowardly. He blames @Th3J35T3R because he dox'd sabu in july but to be honest, if he was more careful, Th3J35T3R would have never been able to dox him. One of the most important things a hacker needs to do is keep your home life seperate from your hacker one. I use 2 computers, one for normal family stuff and the other for hacking. I suggest you all do the same.

gatopardos - March 6, 2012, 1:37 pm

one advice from me , don't hack from home. hey ya you know how to code inertia I need php, C and some assembly for a project I'm working on ?

einbrettholz - March 6, 2012, 1:41 pm

Yah I read the jesterDOX, he royaly fuked sabu.

the jester is a sligh mofo, very highly skilled. read the whole report of how he found out who Sabu was, really good detective work. Sabu didnt seperate his hackinglife form his real life years and years ago in some forums, and thats how he got him. he added 1 and 1 together.

funny thing was, i believe the jester was in on the FBI getting Sabu in July, as he wrote a statement about how sorry he is, that he falsely DOXed Monsegur as Sabu. With that he facilitated getting the rest Lawlsek.

This is no surprise.

He used it to hack Sony. Sony's website had an SQL vulnerability, and they (by chance) used the same password for the PSN configuration panel.

They are by no means skids. They successfully hacked numerous sites. A real hacker uses whatever means necessary to get the job done.

skatetopia - March 7, 2012, 10:31 am

Ya and a real hacker doesn't get caught and RAT out others to save his own ass. That's just pathetic. The kid has no skills in my opinion.

well i doubt that he was virgin, he got 2 kids.

And yah, that was a sissy act he did there ratting his own people.

He did it for his kids. i kinda understand it.

He was ratted out by th3 j35t3r first and the cops threatened to send his kids to foster homes. When you can actually hack something let me know. Pretty sure hes done a fuck ton more then you have.

skatetopia - March 7, 2012, 10:37 am

If he had kids then why would he do all this shit in the first place? You would think he would learn right decision making... Ya exactly, he had no right to rat ANYONE out, you can't use his kid as a excuse. Should of thought about that before he did what he did, now it's his fault he got caught not the people he ratted out. I rest my point.

Oh yaaa he can hack more then me, but at least I don't get caught and know who to trust when it comes down to it. #Skids

EDIT2: Oh and Inertia that's why you copied HF's Forum Categories for your website right? LOLOL

softpedia is not the news, afraid to tell you and your friend Toxic that. Get on the real news and then talk. You probably wrote that article yourself and sent it in like you can do on a lot of websites. LOL I've hacked many gov sites but I'm not a idiot like you kids and post it everywhere, gonna end up like the skid this thread is about getting caught. Then you will really be on the news.

EDIT: I bet you a 100 dollars I can get posted on softpedia too. You are really dumb if you think that is the news.

skatetopia - March 7, 2012, 11:34 am

I've been at this kinda stuff since I was 10, I sure I've done well over 37,000. Once again you joined this year, gtfo. Probably fake or use tools for half your shit. Why else would you be here?

EDIT: We all know your buddy Toxic faked all his shit.

| Solo | - March 7, 2012, 11:36 am

So your saying your not here lol Pretty sure you have more posts then me so obviously you care about this site more then I do haha Also since you were 10? whats that back in 2009 haha

I have been hacking since the 80's bud better luck next time.

skatetopia - March 7, 2012, 11:41 am

No you haven't. Nice try though. fail troll gonna be fail. You're probably 12, and no importance to anyone. Keep using tools bro, will get you very far. You probably used a auto SQL'er to do all those

sites. Been hacking since 80's and your copying the Lulzsec name, BAHABA. This is why I know your a nobody. Only a noob would try to sit there and recreate a group they will never be able to recreate.

PrestigeWorldwide - March 7, 2012, 5:50 pm

I'm not gonna lie, I use havij all the time. Why you ask? Because its simply a much faster process then manually searching out the errors. Also what sabu did was right, he knew he was going to face life most likely, so to save him from never being able to see his kids again he decided to rat out his teammates. If you are a true blackhat hacker (which sabu was) then you know to always work alone, but for his case working alone would have implied no1 to take the downfall for his actions. He was the smarter one by ratting out his teammates first before they had a chance.

Also to piggyback on the Havij nooby bullshit, wait till you get your first vuln on a site with a highly valuable database, something full of ecommerce shit, you'll want the program that can dump it the fastest because if that site goes down, and the owner realizes the vuln you might only have an hour to dump the database. Try dumping 60K full customer details in an hour by hand... get outa town.

Also skatetopia stop acting like a child, no1 hear cares about you 14 year old opinion.

Let me make clear what I was trying to say and what not.

Havij It's a great tool. Good Hackers also work economically so there is no shame in using it. I was simply trolling Sabus name.

Everyone would have ratted out anyone else if their kids were on the line.

But no matter what the reasons, Sabu is a still a traitor. He abused Information that was given to him in trust for his personal gains.

This qualifies him for Judecca:

Hell's Ninth Circle (Treachery) / Round 4

Named after Judas Iscariot, Biblical betrayer of Christ. Here are the traitors to their lords. All of the sinners punished within are completely encapsulated in ice, distorted in all conceivable positions.

source: http://en.wikipedia.org/wiki/Inferno_%28Dante%29#Ninth_Circle_.28Treachery.29

I wish he'd go there in his Afterlife... but i don't believe in god.

kobez - March 8, 2012, 4:27 am

So much hate in this thread.

@skatetopia - Does it really matter what their teams name is? A name doesn't define the hacker, their skills define them.

It was pretty obvious that sabu was using a tool to dump the large databases, have you every tried dumping a 10GB database manually? lol it would take you forever with limit 1,10 etc.

/Just my opinion.

P0gz - March 9, 2012, 12:02 am

Interesting read, I'll be reading the pastebin when I'm on my computer.

testabc123 - March 9, 2012, 2:57 am

Oh wells, one goes down, five others arise.

Eventually the FBI will run out of job positions LOL if people keep RATING eachother out.

It's pretty sad, you say you stand against corruption,extortion and bribes and yet you accept them... if his kids did go to foster care he'd see them when the grow up and they'll see what a hero their dad was.

But NOPE!

Anyways moral is to not have kids - keep that rubber @ hand everyone (and for teh ladies here, make sure your man has some decent rubber).

EDIT: or what he should have done is give his guardianship of the children to a relative. Problem solved.
