Thread: [\[New Link\]\[FREE\]\[FUD\]Quack Binder - The Public Version 1.0\[New Upload\]](#)

duckyshucky - January 10, 2010, 2:58 am

REMOVED BY ME

Hello,

I'm not sure how compatible it is with all servers but it works great with a copy of my free FUD [/cpt5i4\]Keylogger](#).

It's just a regular file binder with two exceptions:

It's FUD :D

It has file execution options, which allow you to designate file one, two, or both to run after your binded file is executed.

It goes without saying but if you are going to scan this file, do it here: www.novirusthanks.org and tick the box next to 'Do not disturb sample'

You do not have my permission to reupload or distribute anywhere.

I hope you all enjoy it.

You will need to fill out a short survey (it takes about 25 seconds).

Secondary Download Link: This is for those of you who don't have any offers for your country.
You will also need to fill out a short survey here.

Thank you guys for so much help.

If you don't like the sites I upload to, that fine. Keep it to yourself though - don't clutter my thread.

Kind Regards,

Your meant to post the virus scan your self. Also, the image is like..... so small to see.

Super_Mario - January 10, 2010, 4:51 am

Thanks, i will this out ;)

@#DataSafe: I can see all the text written on the Quack Binder window :p :

@ datasafe

I didn't mean to post the virus scan myself.
Stop asking for rep via PM.

@everyone

The DL link is working for me, maybe it was down for a bit or something.

Thanks for the comments

I have no idea why you are so hostile - I didn't mean to post a virus scan, it would be there if I did, it's very simple to understand. Have you looked at your reputation as of late? You have a history of abusing it...

I'm not sure what the problem is, after you fill out the survey, in the same window (at the top)you will see a link that says "click here to continue". Click that and you will start downloading.

Not everyone can use ShareCash.org

I suggest using a different download link.

Neroxan - January 12, 2010, 7:54 pm

I may give this a stab later tonight to test it out, I dont really need a binder as of the moment but Ill check it out since you put the time into it and im here anyways.

btw, could I get a copy of that worm pic behind it? Thats righteous:)

DataSafe,

You are not getting the big picture. You was very rude in your PM to me, you was mostly rude on all of your replies in this thread. Even after I asked you not to PM me anymore cause I don't want to read so much negativity you send me flames anyway. All of this, and you ask us for rep is the reason I gave you a neg. If you continue, I'm going to report you.

Imwyldechylde,

Thanks I appreciate you looking into it and I'd like your feedback. As far as the worm pic, absolutely - just PM me either your msn, aim, email etc and I'll send it over.

Can someone upload this binder on another site? (megashare or somethin), this link doesn't work for me... thx!

duckyshucky - January 13, 2010, 11:05 am

Hello,

For those of you who say the DL link isn't working, it is working fine as of now - I've tested and so have plenty of other members.

For those of you who cannot take a survey due to country restrictions, PM me and I'll send you another link for your country (yes you will still be taking a survey)

Thanks,

ducky

When you purchase l33t or uber you can download it without completing a survey by downloading from the l33t section. This is public and free, fill out the surveys or don't - either is fine by me =)

I am absolutely making a very small amount of money off of the surveys, which I'm using for private lessons in vb.net and in turn, will pour back into this community. I'm not "using" anyone, you don't have to download my file(s). Also, the surveys get completed very easily and quickly, you just need a brain.

He's not using anyone. Yes I personally don't like \$sharecash, but it allows him to give us something for free and still earn a little from it. You can complete the surveys, if you are having issues, try again, or try using a different browser, as I've had a few problems with \$sharecash in FF sometimes.

I don't need a binder but thanks for posting this, looks good. I'd +rep you if I could. I'd also +rep you again for your desktop.

(Mar 24, 2010 09:35 AM)5h1t_warrior Wrote: [\[CITE\]](#) noob here can any 1 tell me what a binder is?

It's a program that binds two files together.

Example:

You enter

File A

and

File B

into the program and it will give you an output of

File AB

This way when you run it, both files will execute.

scheme - March 26, 2010, 7:48 pm

Wow. I don't know what's wrong with the site.

I completed a painstaking survey (lead me through all these damn offers) and when I got to the end, it just tells me i'm a Cat from Wonderland (filled out the alice in wonderland thing..) and doesn't give me a damn download link.

sigh. I can't even see anything else now.

hacc - March 27, 2010, 8:15 am

wish you would just upload on uploading or #. those surveys just link me to more surveys and I'm definately not giving out my cell number.

duckyshucky - March 27, 2010, 8:21 am

There are two links, if you can't figure it out like the 100s of others who have, you don't need it. No, I'm not uploading anywhere else. Stop asking.

Vortex147 - March 29, 2010, 4:16 pm

Omg thanks so much man. Works perfectly! Loving the keylogger and the binder! Again thanks ducky!

observer1 - March 30, 2010, 4:39 am

is this compatible with Emissary's keylogger?

Also would it be better to bind to a Doc or a Jpg?

Or would it not matter?

(If server is .exe)

duckyshucky - April 1, 2010, 7:09 am

duckyshucky - May 30, 2011, 5:49 pm

(May 29, 2011 10:56 PM)ATHUL4R Wrote: [\[CITE\]](#) mate why you removed the download link?
ATHUL4R,

The reason I posted it (and my other programs) was to give some of the new members some programs to play around with that were free. After a few months of updating and keeping them FUD I got really deep into internet marketing and didn't have time to keep making programs / updating them anymore. The programs ended up detected about a month after I stopped updating them so I just took them down.

I've kept the posts around thinking that I will update with new programs that are polymorphic but I just haven't had time.

iZan - May 30, 2011, 6:09 pm

The first time I tried to bind it, it I got an error. The second time it worked, so thanks for teh share <3
