Thread: [\[BEGINNERS\]Get Your Friend's Facebook, Gmail, Yahoo Account Pass \[BEGINNERS\]](#)

Hikki - March 9, 2012, 12:28 am

1. First of all install greasemonkey [HERE](#)

2. Then install any of these-:

For [Facebook](#)

For [Yahoo](#)

For [Gmail](#)

NOTE: Your friend must login to fb by your computer....

DESCRIPTION / HOW TO USE THIS SCRIPT

Simple keylogger for Facebook login. Stores username and password for Facebook logins.

Keys:

CTRL + ALT + SHIFT + K --Bring up the secret snoop window

ESC-- Close secret snoop window

CTRL + ALT + SHIFT + D-- Clear log ?

So basicly the victim has to login on ur computer.

Dont you think the victim will find out who it was, when he gets hacked right after logging into ur computer?

(Mar 9, 2012 03:46 AM)TheDog Wrote: [\[CITE\]](#) So basicly the slave has to login on ur computer.

Dont you think the slave will find out who it was, when he gets hacked right after logging into ur computer? no one sed anything about right After, log in After à week or so and it should be GG

Hikki - March 9, 2012, 3:27 am

Yeah thats right....after the slave is out of the house you can login... :D ?

RunePanzer - March 9, 2012, 7:42 am

just install a keylogger on your own computer -.-

Vinnie - March 9, 2012, 7:51 am

RunePanzer is right lol. sorry but this is pretty much useless. I dont understand why you would want to hack your friends or familys accounts. Secondly this guide does not help you hack into a slave over the internet :/...

whateverdud3 - March 9, 2012, 8:36 am

This is pathetic...

Its just the same as installing a keylogger on your own computer..

1337LnD - March 9, 2012, 8:37 am

Looks rather pointless...

There are much better methods you could use.

iLikeHax93 - March 9, 2012, 11:55 am

wow that is pointless..come on! need some legit shit here!

DJohnson13 - March 9, 2012, 12:19 pm

I did this with Cain and Abel on my Step Dads computer and got my router password and username. No need for a key logger like this.

Lee.Nancy - March 9, 2012, 12:31 pm

just install a keylogger on your own computer

Hikki - March 9, 2012, 9:25 pm

Its just for the beginners -.-

~Jatin

Hikki - March 14, 2012, 10:29 pm

Any more comments???

~DebOrOn

35 chrs.

Sensitive - March 14, 2012, 10:52 pm

For This I use Cain and Abel or Wireshark . Anyway thx

albinohippi - March 15, 2012, 4:54 pm

yea there is no need for a keylogger like this one

v0ise - March 15, 2012, 5:20 pm

Come look at my tutorial for a more useful method with sniffing packets.

Cryptokid - March 17, 2012, 12:15 pm

I would definitely say this is good for beginners. Installing this is much less complicated than using a keylogger for someone who is new to this stuff. I can't see myself using this technique, but like I said, very useful to someone who has trouble and is just starting out.
