Thread: [?????OMEGLE SPY MODE BOT????? \[GET HUNDREDS OF VICTIMS EASILY!!!! \]](#)

Hello Hack Forums,

<http://www.mediafire.com/?bixxcna461iinnm>

This is the best bot I have ever used and it is also the most funniest bot. You can get your victims in minuets or in seconds depending on hoe you use it. Once the victim disconnects it automatically connects to another person. If don't want to use it as a victims then you can just have fun with it.

As its said above its not made by me its made by kill4joy95.

I am not responsible for any of your actions on how you use this.

Not too sure about this with u having negitive reputation, i'll wait a bit..

If it works and all is good, well done!

phishle - March 9, 2012, 1:59 am

Malware-bytes Realtime scanner detected it as a trojan,. If you try running it in Sandboxie- it'll crash. Sounds like a virus that's almost FUD. Be careful everybody...

Gerges - March 9, 2012, 2:06 am

It's clean and legit, Vouch for this program for the maker and the poster.

Let's hope it's legitimate.

Edit: I scanned the file on virustotal, I found nothing. I'm still suspicious, though.

Copied from <https://hackforums.net/showthread.php?tid=1604552> it has even the same title, I bet it's infected or he just wants rep without putting any effort.

I dont know if this is really binded with a RAT or something. When I start it in a VM and watch the opened processes, nothing suspicious show up, only the tool itself. AV scans on such tools are often false-positive.

Maybe someone could also check it and confirm that it is clean.

Hikki - March 14, 2012, 2:33 am

I'll Still w8 for others to confirm o.O

But if its non-Rat program then Its Awesome..!!!

pLaToOn - March 14, 2012, 3:15 am

Just tried it, its useless because omegle won't allow links anymore :(

Breakongaming - March 14, 2012, 3:34 am

Arsenic_ - May 4, 2012, 4:48 am

I downloaded this from vulcan tools website, and the real exe is "Omegle_Bot_Ps.exe" and it looks a bit different. I couldnt get it working though.

Punisher13 - May 4, 2012, 3:29 pm

<http://imageshack.us/photo/my-images/24/fakea.png/> wtf is Crypto.exe?

twizt2 - May 4, 2012, 5:34 pm

works its clean big support from me

Dr.Fusker - May 4, 2012, 7:08 pm

I suspect it to be a FUD rat or something - it works with sandbox but it seems absolutely useless. I have a hard time seeing/understanding why in earth this should be attractive in any way.

If I am wrong in this - maybe someone can explain the deeper meaning of this program??

Kenneth1007 - May 8, 2012, 7:53 pm

This program has a virus; Trojan.Agent.

FeaR 6D65 - May 9, 2012, 2:50 pm

hmm.. ill bookmark this and virustotal and use on my old computer i'm about to format later.
