Well DAMN! This is a first thread i've seen of this in the AA section other than my post. I swear this must be one of my top 5 anime. #2 to be exact. Really loved the plot in this, and it educates you too ^^.

Because no one really seen it. I don't see why the ratings were so low. The art work was really good along with the story line. It's rare to find anime like this.

The ending sucks monkey balls, everything else was okay.

HellsCrypt - March 10, 2012, 2:17 pm

its a great anime I personally loved it. The story is a really interesting one that pulls things from string theory to things that will leave you going. O_O

Its a must see anime, the plot is unlike anything I've ever seen and once you start to watch it you get hooked on to it. :D

It's a pretty good watch, slow development >.> but worth a watch.

It's one of my favorites. It's also pretty underrated.
