Very Simple method, i recommend doing it when you are at work/at school/away from your ipod.

Requirements: A jailbroken iPod touch - A computer running UNIX/unix like Operating system OR Windows OR Macintosh

Step 1: Go on your ipod and download app trailers

Step 2: type as ur bonus code shadowrising for an extra 50 points

Step 3: Go on the cydia store and download VEENCY

Step 4: Go on your computer and download TIGHT VNC VIEWER [or click here](#)

Step 5: go on your ipod touch's settings and at the bottem, there should be something called veency. set a password

Step 6: go on your computer and download an autoclicker from garyshood.com [or click here](#)

Step 7: Look at the ip u are using on your ipod (settings > wifi > your wifi network)

Step 8: open tight vnc viewer

Step 9: type as your username ur ip

Step 10: type your password in

Step 11: go over a blue 5 point trailer.

Step 12: Turn ur auto clicker on 4 seconds over the right side of your watch trailer button.

Setp 13: let it run for a few hrs and u made cash.

im confused as to were the cursor is supposed to be when i am watching the video.

About how much do you make and how fast?

sonex - March 11, 2012, 11:26 am

This can get you an average of 30 bucks per hour, BUT you have to have 2 autoclick cause you have to press replay video and done, then again the same, it takes less than 4 seconds to complete, but yet i couldnt found a +5 trailer? only +2

Probably because you are level one, just level up once.

The right part of the replay button. This is so you dont get redirected to another part of the app when it saks you for an offer. It will ask you if you want to do a lotto ticket, if you position it to the right ur autoclicker will click 'no thanks'

I will post a video to youtube explaining the process after you have a vnc viewer later just follow my twitter @sr_shadowrising

Ofcourse I made it, done a few videos by now and I'm near level 3, already payed out 0.50\$ and I only have one more +10 and few +2.

Btw when I click on that it opens a video which cant be closed? Seems like either of us is wrong, or I cant read or you posted something wrong.

You can pm me ur vnc information and i can probably help u directly

sonex - March 11, 2012, 2:18 pm

Read it twice you'll get what I mean. I've set all up as you explained, but when autoclicker clicks on watch video it opens it and have to wait next 30 sec till it finishes.

ShadowRi5ing - March 11, 2012, 2:27 pm

unfortunately yes. i am working on a solution for that thats better than an autoclicker.
