Thread: [\[TuT\] Spreading over AIM \[EasY\]](#)

WereWatching - January 11, 2010, 1:36 am

Introduction:

Hello HackForums, I have been a lurker on this site for quite sometime, but recently I came to the conclusion that, since I love this site so much I might as well spread my words through the community. With that said please excuse me if this is the wrong section or anything else of that sort. I am new to whole making threads. Thank you.

Description:

Torrents and AutoSpreaders can work wonders, but sometimes you don't always get those bites. One on One spreading can have a higher percentage of infections/views. If you got some free time and want to have some fun, then this method will work wonders. This does require a bit of social engineering on your part, but most of these people are quite gullible.

Buddy List:

The Tutorial:

Step One:

Spoiler [\(Click to View\)](#)

[img]<http://i248.photobucket.com/albums/gg192/Werezlupex/AimList.png>[/img]

Creating a new alias. You don't want the infected to know it was you who infected them. Also, the AIM List I am presenting you with has a bunch of people who are interested in either Halo or Editing. Or both... Try to make your screen name relevant to the contact's interests. In this scenario I will be using the alias xXLightZOuTx

Step Two:

Spoiler [\(Click to View\)](#)

[img]<http://i248.photobucket.com/albums/gg192/Werezlupex/hackforum.jpg>[/img]

Spoiler [\(Click to View\)](#)

[img]<http://i248.photobucket.com/albums/gg192/Werezlupex/loadingbuddies.jpg>[/img]

Loading the buddy list. I have provided you with a buddy list full of contacts that are into the 'Halo Scene'. Take note that due to the size of the buddy list you may have to wait a few moments and possibly load the list a couple of times.

Step Three:

Spoiler [\(Click to View\)](#) [img]<http://i248.photobucket.com/albums/gg192/Werezlupex/Target.png>[/img]

Selecting a target. You have a decently sized list here, choosing someone shouldn't be that tough. Some people on this list will fall for your bot much easier than other people. If you get caught I suggest you block them, continue to try and spread and then at the end of the night dump the aim and make a new alias tomorrow.

Step Four:

The social engineering. The needs to be a reason for them to download and open your file. Take a look at a chat log I saved after infecting somebody.

The Conversation:

Spoiler ([Click to View](#))Me: Hey

Him: Hey.

Me: Whats up?

Him: I'm sorry, but do I know you?

Me: No. I am new to the whole halo scene and I am trying to meet some friendlies.

Him: Oh, well hello there. Always good to meet new people.

Me: Yeah.

Him: So you edit?

Me: Yeah.

Me: I am working on a new way to improve the whole 'Halo Montage'. Running a video file via a .exe to remove all quality loss.

Him: Oh, that sounds quite amazing actually.

Me: Yeah, I had to code it all into a .BAT File and then convert over to a .exe

Him: Hm, I'm not that tech savy lol.

Him: Most of the just went right over my head. lol

Me: Well I could show you a render, but I would like your word that you won't send this to anyone.

Him: oh, I am very trust worthy. I get tons of montages before they come out.

Me: Alright here it is.

Transfer complete: *****'sHaloMontage.exe

Him: Hm, nothing is showing up?

Me: Hm, well what OS are you on? My friend tried it on his Snow Leopard and it wouldn't work.

Him: I am on Vista.

Me: Well I have never tried to run it on a vista, I use windows 7.

Me: Maybe the code needs some work.

Me: If I recode this will you try and run it later for me?

Him: Sure.

[I then go on to RAT him later]

Last Minute Tips:

For those people who do not have social engineering practice this may be a little bit more tough for you. Just practice and you will get the hang of it.

After awhile these people will realize they are being targeted by people looking to infect them. Try to make new buddy lists and try this on other people.

This tutorial is now coming to a conclusion. I hope this tutorial helps some people as I know others will find this as basic information. On an ending note, if this is the wrong section, I am sorry. Enjoy!

oooohhh i always enjoy new ways to SE. Thanks a WHHHHOLLLE bunch! <3

WereWatching - January 16, 2010, 8:15 pm

Glad I could help although I thought more people would have found this interesting.

?Border?ineExtr(A) - January 17, 2010, 1:15 am

Look, you might spend 4 hours here, and get 40 victims, but i could get like 400 victims in 1 hour (yes, using torrents). The thing is that this is so booooooooooring and time-wasting :A

Warpclaw - January 17, 2010, 9:51 pm

Where fo you get these halo editors?

whatisthis - January 17, 2010, 10:17 pm

thank you brother.....

Dr.Genius™ - January 20, 2010, 2:55 pm

Wouldn't this take a hell of along time? Why not just use torrents?

Hackorz - January 20, 2010, 5:38 pm

i do this alot tbh instead of trying to have someone help me with a montage type thing.

i make an aim example: sexygirl7724

then go into lesbian,bi and all kinds of forgiegn chatroom and it takes less than 3 mesages before normally someone asks to trade pics with me and yah. the majority of people dont have a damn clue they just want to see some form of porn but for the other 10% of people who are smart and try to stay away from .exe files i always tell them its a powerpoint of a party where i got "fucked up" and 99% of the time it will work. i see no reason to talk once i see the zombie pop up so i ctrl+J them to block them from messaging me when thier comp slows down.

good tutorial though. hopefully u take what i have said into consideration and maybe edit it a tad bit. good job though

xhood - January 20, 2010, 7:15 pm

i would rather spread through youtube or torrents this method doesnt really work as much as it use to

Matter - January 20, 2010, 7:27 pm

Works wonders, thanks.

xRjs4490x - January 20, 2010, 7:28 pm
