Nice job. I suggest using ListViews so you don't have to make 4 listboxes.

Looks nice OP, very good. Should release, source or not. Also use a grid like the other suggested.

Wow that looks good. So you said they come from Google, but how are you able to download them?

They are not from Google they are from Mp3 Skull and Mp3 Skip. This is basically a rip of 'Mean Music' by Ameanberg.

Good job though.

No Mp3 Skull is user orientated. Users contribute to this songs listed on that site. I.E. They upload songs, people listen to them.
