Thread: [If I use ProXPN/CyberGate, will I still have to forward my own ports?](#)

Avriex - March 11, 2012, 4:18 pm

Hey guys!

Okay, so I've come to the conclusion that I just can't forward my own ports.

If I use Free CyberGate or Free ProXPN, will I still have to forward my own ports?

Maple ?? - March 11, 2012, 4:21 pm

Did you try the automatic PF option on DC? (uPnP)

ProXPN does not forward your ports anymore. If you want me to take a crack at forwarding your ports, PM me your Teamviewer details. (I've done it with a 9/10 success rate so far.)

Hmm, I didn't see that option, where is that?

Anyways, according to my Sockets/NET, the ports are "Listening". but on canyouseeme.org, it says:

Error: I could not see your service on XXX.X.XX.XXX (IP address) on port (1608)

Reason: Connection timed out

DragonOfLife - June 11, 2012, 10:32 am

Avriex This could be because you're forwarding on the wrong internal IP make sure you are forwarding on your computers IP instead of another computers IP

Airon - June 11, 2012, 11:54 am

If you cant portforward your ports and other people tried to help you then i would suggest you to buy the Blackshades VPN.
