Hello hackforums! :) Today i am giving you a free chat spammer (Facebook, Skype, MSN, Yahoo, etc) You should know what a chat spammer is and if you dont then the name is pretty self explanatory. So pretty much just enter a message, and an interval(milliseconds)

To download just click the thread picture.
NO \$HITCASH!

disclaimer and copyright shit:

if you don't trust it, just don't download it and DO NOT TROLL! trolling is only for motherfuckers. please don't distribute this as yours. if you want to give it to a friend then send them to this post. I worked hard trying to get this working so please don't steal it as yours.

have fun!
