Probably should be careful about messing with a government website. After all it's logging everything. Hope you guys have some good VPNs. Just saying.

You're assuming there's 1 set of logs??

Thats all the logs that I could find, and the IP that shows on any others wont be the one I am using anyway.

Greystersting - March 20, 2012, 7:23 pm

That looks pretty cool if it's not a honeypot.

How did you find the IP?

anonymous_bdc - April 1, 2012, 3:59 pm

Found it using shodanhq

Just typed in some keywords, and clicked on the IP link on there

Its amazing the stuff you can get into searching on there
