Thread: [Request for a Hacking Mentor](#)

bobjon - March 13, 2012, 11:14 am

Hey HF,

So I'm interested in learning how to hack, but everyone seems to be telling me different things, and its quite confusing for me. I think it would help me achieve becoming a beginner hacker, if I had a mentor. If you are interested please PM me and I might PM you back my skype details. Keep in mind at this stage I'm an extreme beginner and you will have to be patient while teaching me. I am interested in the general concept of hacking, and each branch of doing it such as RATs, website defacing, DDoS (not really hacking), keyloggers, etc. I don't want a LQ or bad mentor so here are the requirements:

- More than 100 Posts
- Not in the red (reputation)
- Good english and grammar
- Good knowledge about hacking (of course)
- Skype

Please don't hesitate to PM me as I'm eager to get started as soon as possible. Thank you,

~bobjon ?

Note: If you have any questions feel free to leave them below.

The Rad Russian - March 13, 2012, 11:32 am

I would offer too, since I have some knowledge on the things you listed (rats defacing ddos keyloggers etc) but I don't have 100 posts(need 20 more). I have the rest of the stuff though if that would work..

Germankid - March 13, 2012, 11:48 am

I can help you. Even if i may be a new member of hackfourms, i have interned for prestigious companys that focus in IT security/breaching. Currently in college, so my time may be limited, but otherwise i hope i have adequately answered your condescending question.

Xtr0id - March 13, 2012, 12:05 pm

Lol now people have standards for personal hacking teachers here? People ask this all the time. But If your curious about wireless or networking h4kz then you may ask me. Rep is red because.. well I don't know how to make friends but all the same, I can learn you teh wireless stuff.

bobjon - March 13, 2012, 2:48 pm

Thanks for all the offers guys! I PM'd the person I thought was best and if I didn't accept you its nothing personal I just chose what I felt was the best mentor for me.

ranman77007 - March 13, 2012, 6:37 pm

I just got here, I don't anything about starting my own thread... I thought this was the beginner thread, I didn't mean to offend anyone... :) I thought I was in the right place... sorry about that...

King of the South - March 13, 2012, 8:11 pm

Dude! Firstly, Welcome u to HF World. U have come to the right place. As a new beginner, I believe u must have set your goals, and to achieve them, u have to identify which part of hacking field u want to know ? When u are able to discover it, Carefully search for tutorials on the field and study them and if there is anything u don't understand there, ask others and they will explain it to u.

There are lots of tutorials with pictures and description that can actually help u more than u think. Better start doing something now and stop wasting your time looking for a personal hacking teacher. Cuz no real hacker will have that time for U mate.

Regards.

Xtr0id - March 14, 2012, 4:13 am

Oh and I can do all that other RAT DDos and bruteforcing stuff; I just find that network hacks get you farthest the quickest with the least hassle.

H4X00R - March 14, 2012, 4:31 am

can some one help me? i just want to be loved :P
pm me
