Thread: [Taking Crack Requests again for any@hotmail.com/@live.com/@msn.com/@windowlive/@w.cn](#)

?K47 - March 14, 2012, 2:31 am

So I am going to open up a crack request thread, I am putting together a list of requests off this forum alone. You may request up to 30 emails and can request

@hotmail.com

@live.com

@msn.com

@windowlive.com

@livemail.com

@w.cn (windows connect now)

or any foreign extension (ex: @hotmail.co.uk, @live.ca, @msn.com.au, ect ect)

I will be taking the requests for an hour and a half before I load it up in my cracker and run my 1st password list on it. I will be running these requests all night long on a couple password lists and most of tomorrow and maybe even longer depending on how many I crack. I will be charging 20\$ per crack and 15\$ for each additional cracked email. If the price is to much then don't request, I actually will be spending time and effort on cracking these and running the best password lists I see fit.

I am loading up a list of complete HF requests within an hour so send me your requests asap on here or on 1 of the IM's in my signature

(as long as this thread is open you may still request emails, post them here or hit me up on 1 of the IM's in my signature to give me your requests, I will close this thread once I am done taking requests and starting the cracker)

also would like to know this, can we request accounts of people we know or will you be doing more default password lists?

Thanks man

I only charge on completion of cracking your request(s). I provide SS of the inbox and or reply to an email you send to the inbox. I am as honest as I can be when charging on the amount of time your

request took.

You can request people you know but if its someone who is computer smart and prob has a strong ass pass wit caps n symbols in it then its not going to be crackable, however I do have large uncommon alpha numeric password lists to run (100k - 700k) so I have been successful cracking uncommon passwords as well (longest time I spent on a single email was 10 days running my aim/aol cracker non-stop, the password turned out to be raptor852 which you can see is very uncommon and in the end I believe I ran over 40 different password lists of 2-3 million different passwords before I cracked it. So even tho I don't get online everyday I still have a desktop in my computer room thats soul purpose is to run crackers 24/7.

Cracking machine example:

[IMG]http://img109.imageshack.us/img109/7589/crax.jpg[/IMG] (yes 1 of these is a mid 90's desktop wit a Pentium 3 processor from back when some of you where still in diapers but runs these small vb apps just fine)

Added Mikey@live.com and Mikey@hotmail.com to the hotmail cracker I will PM you if i end up cracking either.

OICN - March 14, 2012, 5:00 am

?K47 - March 20, 2012, 2:11 am

I charge on the amount of time i end up spending to crack a request....could take a couple hours....could take a day or 2....or could take a week of running. Anyone can vouch that im as fair as i can be on the amount of time spent and i only charge if i hit your request. Will add fish@hotmail.com to my list tho and get at you if i hit it

you could do it ?No I never said I could crack any email, where do you see that? If you wanted youtube@hotmail.com i could ATTEMPT to crack it but not every email is crackable it depends on how strong the password is and how much time and effort i spend on cracking a request, the longer it takes me the more i have to charge
