Thread: [\[Underdogs\] Want a mentor? Apply here! \[1 Spot left\]](#)

Frostbite™ - March 14, 2012, 5:21 am

Hello everybody. I have been on hackforums for two years now, and learnt most of what it has to offer. Ontop of that I have spent time on multiple other forums and deepweb forums. I feel I have learnt as much as I possibly could have from hackforums (except coding) so I have decided to offer mentorship classes. I am going to be taking two pupils at a time.

Positions left: 0

So, what are you going to learn? As much as you can, over a topic of:RATs

SQL

XSS

Keyloggers

Remote hacking

WiFi hacking

Exploiting

anything else you can think of

I am going to get you to fill out an application form, and I can tell you now, its going to be fucking hard to get into. I dont want to waste my time with some Anonymous fanatic. By the end of the course you will be better than most people on this forum (no offence intended to anyone).

APPLICATION FORM

Step one:

Do not bother to even apply if you do not fill these requirements. If you dont but you still apply... yeah.

1. Speak english with at least decent grammar.
2. Have skype.
3. Knows how to connect and use an IRC channel (not host, just connect).
4. Understands the VERY basics of hacking (what RATs are etc.)
5. Does not flame.
6. Is dedicated.
7. Does not lie.

Step two:

Copy the contents of the code box and fill it out, then post in thread.

Code Preferred name:

Interests:

What I want to learn:

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:

Why I should be chosen:

Step three:

PM me this box, filled out. The title MUST BE "Application". Anything else will immediately disqualify you. All information in these PMs will be kept secret.

Code REAL age:

Time zone:

If you were to attempt to hack me right now, how would you do it?:For the last question, I do not accept "I dont know" or anything similar. I need you to show some basic initiative, so show some.

This may look like a lot to do, and it is. But there is no better way to learn than by mentor, and you will never regret this, it will change your hacking world.

Good luck.

Agent Raigar - March 14, 2012, 5:28 am

Preferred name:Raigar

Interests:Hacking & Programming

What I want to learn: More about WPA cracking ,RFI,LFI.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I guess I will tell him that I'm sorry I've done that and I will give him back the money.

Why I should be chosen: I don't request much, only few things. Also I think I'm fast learner and I have good communication skills. Also I'm not totally noob so I guess we will have some good time 2gether.

Cheers,

-ra1gar-

dawnofwar - March 14, 2012, 5:31 am

Preferred name: Black

Interests: Computers, Security, protesting, hiking, nature, skateboarding

What I want to learn: Full SQL (error based, double query, etc..) XSS, RAT, and how to build a botnet, defacing. Rooting servers. HTML for defacing. Anything really, the sky's the limit.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:

Depends, if it's a friend who I've known since I was a little kid, I'd give it back. If it was someone who I knew but hated, take it all.

Why I should be chosen: I'm a quick learner, I want to have a future career in network security, and running databases. I can dedicate myself to anything, and I love hacking. It has become an addiction for me (literally,) I've spent the past 5 days in my house just hacking and learning. I've already taught myself WAF Bypassing (although I need more practice,) Union based SQL, and string based.

In the past two days I've gotten admin logins for 10-12 sites, and different database for a dozen other or so. I only started learning SQL 5 days ago. All done manually, most of the sties though don't have a login page so I can't do any defacing :(

Ultimate boss - March 14, 2012, 5:36 am

Preferred name: Ultimatin

Interests: Wifi, Rats, keyloggers, and stealers

What I want to learn: coding, encryption and crypting. Would be happy to learn anything that u can teach. No LIMIT

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I will silently deposit it. Stealing money of a dumbass and idiot is of no importance. Also i dont need money only try my hands at hacking. Only when i hack the bank account of my friend who is a hacker then i would give it on his face. :)

Why I should be chosen: My eagerness to learn. :)

cyphric - March 14, 2012, 5:41 am

Preferred name: Cyphric

Interests: Wifi cracking, password stealing trough keyloggers, SQL injections.

What I want to learn: I wish to learn the basics of hacking, how to crack wifi internets and XSS exploits finding. Actually i want to learn all you can teach me! :)

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would give it back, as I have no intention of becomming a black hat. Grey hat is my goal.

Why I should be chosen: I learn extremely quick and already know the basics of LUA, C++, C#, PHP, HTML, HTML5 and other languages. Also know a little perl. I'm a hard worked and I'm VERY dedicated to what I do.

Rita Ora - March 14, 2012, 5:47 am

Preferred name: Kandor

Interests: RATs, keyloggers and anything monetizing

What I want to learn: Advanced deface exploits and application/account cracking!

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would probably give MOST of it back

Why I should be chosen: I feel I should be chosen as I have shone to taking an interest in hacking and I think that if I have a mentor I will become great at it, when I can then help teach others what I have learnt! I also have a tenderness to be very enthusiastic towards new things

Sysmatic - March 14, 2012, 6:00 am

Preferred name: CyberRevolution

Interests: Computer, Gaming, Training, School,

What I want to learn: SQL, XSS, Deface, exploit, Making crypter, Wifi hacking.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:

I don't really know what I would do, I mean basically I never really know what I would do in the actual situation since I never tried it, but.. one way I might would give it back, but if you look at the other side, what wouldn't he do to you, I mean just because you give it back doesn't mean that he will be like "Oh god thank you for being a good friend" he could basically go to the police in the next hour saying that it was me who hacked into his bank account. So I don't really know what I would do, maybe I would silently deposit them back into his account, keep them, because there is a huge risk for me to get busted if I just go to him and tell him the truth.

Why I should be chosen:

REAL age: 18

Time zone: GMT +1

If you were to attempt to hack me right now, how would you do it?: Well, I think I would try to go in depth about what you doing, trying to find something you need, if you need some sort of program maybe attempt to fake it with a encrypted server to a RAT, and then offer you and tell you that this is the program you looking for. With other words I would study you closely and slowly find out what you looking for or when you make a mistake where I can go in and hack you. It would depending on what I can find on you and what needs you would have, thats the way I would choose to go in and attempt to hack you.

Frostbite™ - March 14, 2012, 6:20 am

Ive recieved some good applications, keep them coming :)

cyphric - March 14, 2012, 6:21 am

When will we have your final decision? :)

Frostbite™ - March 14, 2012, 6:24 am

(Mar 14, 2012 06:21 AM)cyphric Wrote: [\[CITE\]](#) When will we have your final decision? :)
Probably a week, two or three at most.

Remorsal - March 14, 2012, 6:26 am

Preferred name: Nathaniel (Nate)

Interests: My interest are odd among others, I collect masks as a hobby.. That's pretty interest. I also enjoy learning a variety of things. I know these skills might come handy later on as I'm trying my might to become a white top, in the process.

What I want to learn: RATs , Keylogging, SQL.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Honestly, I'd give back all the money, it may seem the lame thing to do as you could have all the money in there as you desire, but remember it's your "Best friends" someone who's achieve more respect among others someone with a big feeling of trust. I honestly myself wouldn't break that kind of bond.

Why I should be chosen: Honestly I have no intentions of being chosen over the other members, I'm pretty much a quick learner with a wide variety of interest. Who ever wins though I wish much luck to and hope they achieve what they want.

Good luck other applicants.

Lychees - March 14, 2012, 6:29 am

Preferred name: Lychees

Interests: Hacking and Exploiting

What I want to learn: Tips of a Botnet, Some wifi Hacking, and maybe some crypting

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Give it Back Lol ?

Why I should be chosen: Because im a nice Guy and like to learn someting.

Hoping you be my mentor looking forward to it

#YOLO - March 14, 2012, 6:31 am

Preferred name: Emerson or em

Interests: Hackforums

What I want to learn: SQL, XSS, Defacing

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Give it back, be a good friend =)

Why I should be chosen: I should be chosen because I am a cool guy and I'm ready to learn! I'm up for the task and ready to hack!

Germans - March 14, 2012, 6:55 am

Preferred name: Preduhtore

Interests: Hacking, basketball, a little bit of code (just starting to learn)

What I want to learn: XXS, WEP and WIFI, deface, shell upload

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Deposit the money silently

Why I should be chosen: I am energetic and have the love to learn, I will take initiative and I am prepared to work hard. I will have a positive attitude and will be very teachable.

Tyson_08 - March 14, 2012, 7:00 am

Preferred name:

Tyson

Interests:

I keep my interest in almost anything and everything, that is not related to stealing someone's money or carding. It includes Hacking, White-Hat Helping, Sharing as much as I can, Consulting on things, Learning & getting Interested in whatever New things I know about.

What I want to learn:

Anything & everything you'd like to teach.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:

I'm sorry, I do hack stuff, but don't steal shit, doesn't matter if its a friend or not.

Why I should be chosen:

I'm a Quick Learner, Nothing Bores Me yet I get bored too often. Need someone to help me learn more, earn some & share many things irl as well ivl. :)

I know many things you won't be having a Clue About.

I'm one of the Best 'Googlers' around... :P

Willing to Learn from You!

bunny.skeo - March 14, 2012, 7:14 am

Preferred name:bunny.skeo

Interests:programing, basic hacking, sql bases, remote control, administrator acc...

What I want to learn:I am interested in learning the basic of hacking, just to understand how it works, how can i get benefits from it, i recently got job in one big company and my work is monitoring,client administration,audio and video..etc. i'm now learning and reading books about programing (java, delphi, c++) i now lots about hardware, my high school was about electrician, and i worked as a comp.service in IT shop (know everything about windows re-installations,programs,crack's,motherboards, graphics...

You hack a bank account and steal the money, only to find out two days later it is your best friends.

Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:hmm..i will keep the money, and after a while tell my friend about it, but i would tell him to go at the bank and take his money again because the bank must pay him his deposit money if he has a proof of paying the money to the bank.

Why I should be chosen:If you chose me it will be my luck. when i read the rest of posts i admire their knowledge and hard work to get this position. i must tell you that I am a hard working man, and that i have a job and work between 8am and 6pm. That means that only in evening we could practice and i can listen to you classes, so if you can handle me, i can easily adopt to every situation. Thanks for reading this. Best Regards.

bobjon - March 14, 2012, 7:36 am

Preferred name: Bobjon, but you may call me whatever you want.

Interests: I'm very interested to get into the field of hacking, and I feel I need a mentor for that like you. My interests inside of hacking aren't known yet since I never tried them, but while you're teaching me I may my skill that I will specialize in. Other than hacking I love gaming, reading world news, the internet in general, and programming.

What I want to learn: I want to learn the art of hacking in general, and maybe later specialize in a certain field if I take a liking to it. For example we can go through each method of hacking and learn the basics, then stick with something for a while and learn more advanced methods If I feel I really enjoy and want to specialize in something.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: This is a question of morals, which I personally don't have much of, but I would deposit it silently into their account if I had to, but only if it was a good friend. Giving it to their face I would regret since they might not like me as a friend from then on, and then there was no point of giving back the money. Keeping it on the other hand would be an option, but I'm just not that type of person.

Why I should be chosen: I feel like I meet all the requirements and that I would need a mentor to guide me through my career as a hacker. I also have a lot of free time to learn and practice my learnt skills, which you might appreciate. I am also very patient, and take stuff seriously when needed. I feel like this has been a long enough application, and I hope you choose me as your next student. If you've accepted me, please PM me your skype details so I can add you.

~bobjon

Note: Teaching me will be a long and hard process, so if you feel you're not up to it don't choose me, I need an active and long lasting mentor in this topic and I feel you could be it. I am very patient and active as I said, but are you?

oH4i Hx0r - March 14, 2012, 8:46 am

hey!

Preferred name: Plastico

Interests: Web hacking, Keyloggers, RAT's and being anonymous in the internet.

What I want to learn: The basics of SQL Injection and XSS, plus some knowledge about RAT's and Keyloggers.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would deposit it silently into their account.

Why I should be chosen: I cant learn everything just by looking at tutorials, i need help from somebody.

ajack - March 14, 2012, 8:51 am

im interest i know nothing and i learn fast

bobjon - March 14, 2012, 8:56 am

I honestly facepalmed at the two posts above me.

TygerTheLarge - March 14, 2012, 9:43 am

Preferred name: Tyger

Interests: Hacking, SQLi, programming, and... Music. I play guitar and also produce electronic. :)

What I want to learn: How to hack! I want to know everything you are willing to teach.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Well I guess it depends on how I hacked it, if it was some kind of flaw caused by my friend such as a shitty password or by him clicking a bad link then I would most definitely give the money back to their face and explain how I fucked them over. If it was some kind of bank flaw I'd probably give them the money back to their face as well, and tell them to not bank with them.

Why I should be chosen: I am currently studying computer programming in college. I'm a real fast learner as long as I have someone there to answer questions.

FudgeMunkey - March 14, 2012, 11:54 am

Preferred name: FudgeMunkey

Interests: RAT, Hacking, programming (Java,

What I want to learn: Everything

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I don't steal bacnk accounts, Stealing Bank accounts leads to the police getting involved. Keep it safe and steal Software or acc.

Why I should be chosen: i've self taught my self alot, which involves RATs, Java and other things. And I know with someone able to teach me, i would be able excel further than i able by myself.

MTX - March 14, 2012, 12:06 pm

Preferred name: Sillyman/DJ

Interests: Computers/Games/Runescape/XBL/ Little Java & HTML.. Networking (Cisco)

What I want to learn: How to use a keylogger and create java drive-bys while still having the games JAR file run

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: You should always know your environment and situation before just proceeding. Who's bank account it actually is seems like a large detail that shouldn't just be overlooked. If I'm going to perform illegal action against a bank, I'm going to know my way around and how to do it right the first time flawlessly and without error.

Why I should be chosen: Because I really want to learn this and i have tons of free time, Im available from 11am EST-6AM EST

Thanks for stealing my Answer....

EDIT: Im now enjoying RAT's :D

xerA-> - March 14, 2012, 12:17 pm

Preferred name:Gage58

Interests:hacking (looking to learn even more from this)

What I want to learn:bots, zombies, host booting, ftp password cracking, and defacing

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:deposit silently back into account and keep such a small amount its not even noticable unless you compare it to a previous balance check.

Why I should be chosen:i have great potential (good at ddosing, cracking programs, and stealing account information), have a clear record(never been caught), and im a graphic desinger(no relation but i thought i might as well say that).

Saos - March 14, 2012, 12:34 pm

Preferred name: Ryan

Interests: Computer science, offensive security, music production, Magic: The Gathering, typical activities of a high school kid like hanging out with friends.

What I want to learn: Bare-bones basics. I don't want to jump right into things like SQLi, XSS, and "hacking the world". I want to understand what it is that I'm doing, and why I'm doing it the way I'm doing it. I'm learning programming languages on my own time for that very reason. I don't want to use a RAT and not understand an error as to why my server won't connect. I don't want to be cracking WEP and get an out-of-the-blue, unexpected error with a certain brand of router that I can't work around myself. I want to operate on a deeper level of thinking than script kiddies. So I guess you could say that I want to learn the things I previously mentioned, but I don't want to follow a shallow half-wit tutorial on the "easy, quick way to do it".

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: You should always know your environment and situation before just proceeding. Who's bank account it actually is seems like a large detail that shouldn't just be overlooked. If I'm going to perform illegal action against a bank, I'm going to know my way around and how to do it right the first time flawlessly and without error.

Why I should be chosen: I might be an extremely visual learner, but the speed at which I learn from seeing makes up for it. I've matured a good bit since I first started dabbling in this side of computing, and I can see network security or pentesting being possible career opportunities. I will say however, that whether or not I get accepted for this spot won't determine whether or not I keep trying to learn. This is something I KNOW I want to do. If I can't make this, I'll keep learning for myself. Determination isn't a problem here.

oliviarules1 - March 14, 2012, 1:15 pm

Preferred name: Howe.

Interests: Life, how the world as we know it has developed to this point and what has influenced it to develop to this stage. Uncovering the true aspects of our society that has never been taken into perspective. My family.

What I want to learn: SQL, XSS, Deface, Exploit, Making crypter, Wifi hacking, Keylogging also it may seem quite self explanatory but i would like to learn all of the aspects of DOXing. Also i want to learn the basic tasks before i am flung into the deep end, i would also like it if you would elaborate on alot of things example, if i get an error why this is happening, what i have done wrong and how i can avoid it happening again. Also why we are doing certain things and how it will benefit me.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would confront them to tell them what i have done but i will be transferring the money back immediately, then go onto explain how he can avoid this happening to him again. Also this would be my number one option i would not ever consider taking money from my family or friends purely because i could not withstand looking at them and knowing what i have done to them without knowing what to do.

Why I should be chosen: I believe that i should be chosen because i will be dedicated and intrigued to learn from such an experienced person like yourself. I have always wanted to learn more about "Hacking" because it has fascinated me how one individual can disrupt thousands of peoples life's. Thanks for this opportunity even if i don't get selected we could still keep in touch if you would like. Thanks

Voxel - March 14, 2012, 1:23 pm

Preferred name: Voxel

Interests: Encryption, coding, exploiting

What I want to learn: Exploiting, SQLi, RAT (To a better understanding) and WiFi Hacking

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would silently put the money back into the account and pretend nothing happened whilst hoping that the bank was not able to find out who I am or where I did it from, as hacking a bank would be very hard and most likely get you arrested on account of their security, and no money is worth jail time.

Why I should be chosen: I have I initiative, but I'm not over confident to the point that I do things spontaneously, I plan and analyze all my actions and their effects before rushing into anything.

Spirit8624 - March 14, 2012, 1:29 pm

Preferred name: Jake (Dotty is my alias)

Interests: My interests are video games, helping people and helping myself, Social Engineering.

What I want to learn: I want to learn to code, remove spyware, RAT, encrypt, wifi hack, sql inject, deface,

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I give the money back to there face. I want to learn black hat and white hat, but I also have morals.

Why I should be chosen: It is only in your judgement to choose me. I have been on this forum for over a year now and I haven't learned anything, nor have I contributed. It is time for me to learn something. I don't expect this to be easy or a walk in the park, but I will be a good pupil and listen to you. I may fail at first, but that is part of the learning process.

MegaMember - March 14, 2012, 1:33 pm

Preferred name: Nhjufy

Interests: XSS

What I want to learn: XSS

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would hack bank account, but if I do it I would give him back money and tell him about it.

Why I should be chosen: Well I'm not sure, I'm not troll, I would give my best to learn everything you say...

Whooops - March 14, 2012, 1:34 pm

Preferred name: Whooops

Interests: Expanding my knowledge of computers; I am currently a computer service/sales/repair/technician at a small company on a small island on the west coast. However this field rarely dips into grey/black hat and that seems to be where most of my interest lies; Making

things do what they aren't supposed to :)

What I want to learn: Anything and Everything. Specifically the logical functions of programs and how they do what they do.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Give it back to their face, along with information on how I did it and suggestions as to how to secure themselves more.

Why I should be chosen: Attitude, persistence, and the fact that the knowledge WILL get used daily... & I really want to learn more!

Thanks for your time and consideration
~Whooops

Pale - March 14, 2012, 2:41 pm

Preferred name: North

Interests: Computing, reading, forums.

What I want to learn: Everything you know about hacking.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:

Neither of these because only an idiot would hack into a friends account. Judgeing by the information needed to be gathered in order to steal the money chances are you know exactly who your taking it from.

Why I should be chosen:

I am committed and self motivated. I want to learn all I can, no bullshit.

The Archangel - March 14, 2012, 3:14 pm

Preferred name: Archangel

Interests: Computers, hacking, programming, web and application design, video games, surfing and snowboarding.

What I want to learn: I'm currently studying html, python, and a book called Hacking: The Art of Exploitation. Once I am good at Python, I want to continue learning other programming languages. I would also like to learn how to use RAT's, botnets, basically anything there is to learn about hacking, I want to learn it. I don't just want to be a script kiddie, I want to be the hacker who makes programs and exploits.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Well if it's my best friend, I would deposit the money back into his account, and tell him that it was a mistake and that I've already fixed it. Then I would share the money I get from my next hack as a way of saying "I'm sorry about that time I hacked your bank account".

Why I should be chosen: I am very dedicated and love learning new things. I study all the time, I'm dealing with some pretty serious health issues, but I don't let it get in my way, I just push through.

Frostbite™ - March 14, 2012, 4:20 pm

(Mar 14, 2012 08:56 AM)bobjon Wrote: [\[CITE\]](#) I honestly facepalmed at the two posts above me. Yeah I did as well. Shows that some people don't even read the thread before posting.

b00rek - March 14, 2012, 8:47 pm

Preferred name: Nitrous2Oxide

Interests: Physics was too hard for me so I'm trying to get into computing

What I want to learn: Everything listed, although I do know something already

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would keep it because I don't want to be compromised by revealing myself, obviously.

Why I should be chosen: I learn fast and have no real job until september (: ()

wolfspinone - March 14, 2012, 9:13 pm

Preferred name:Wolf

Interests: Hacking in general

What I want to learn:Website Hacking, RATS, anything really

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:Give it back to their face, tell them that their bank account was vulnerable and that you can help fix it.

Why I should be chosen: I have a passion to learn, i will never argue against you and i am on a lot.

Mr.Incredible - March 14, 2012, 9:19 pm

Preferred name: 4n1m41

Interests: Gaming, Computer, Music, Coding, Hacking

What I want to learn: Explioting

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Depends if I knew him since I was little. If I don't like him or talk to him a lot i'd keep it.

Why I should be chosen: Because i'm special c:<3

Turbo29 - March 14, 2012, 9:23 pm

Preferred name:ZeroSkill

Interests:Hacking,videos games, girls, computers, banking, philosophy, girls.

What I want to learn:How to make malware/viruses/ other useful tools to destroy computers and gain info and power. I also want to learn java/C++ so one i can major in computer science and create not only video games but also AMAZING guides to help people like me.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:I'd keep it, but spend some of it on him. I'm on HF to become a hacker not be a friend.

Why I should be chosen: I feel like people want to use hacking for the wrong reason just to gain something in return. I want to learn it to make those people pay. Not only those people but the people stupid enough to click r download that link i gave them because they want the Gold/Money/Bot. People need to learn common sense and security or else they shouldn't be on the internet.

?rtificial - March 14, 2012, 9:32 pm

Preferred name: Pseudo

Interests: Blackhat, snowboarding, sleeping, relaxing, being lazy

What I want to learn: I want to learn more about hacking. Something that can only be gained

through experience and not just sitting in front of your computer and reading tutorials.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I have respect for my friends, so I will give it back silently. The same way they didn't know I took it, is the same way they will get it back. Not worth the risk telling them that it was me.

Why I should be chosen: I should be chosen because I will be dedicated as a student of yours. I will learn whatever you teach me and one day help the community the same way you helped me.

Frostbite™ - March 15, 2012, 1:50 am

Got some good applications, keep them coming!

Egyptlord25 - March 15, 2012, 6:06 am

Preferred name: mahmoud

Interests: c++ , php and rats for sure

What I want to learn: rats

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: keep it .

Why I should be chosen: because i am going to be grateful .

Frikandel - March 15, 2012, 7:21 am

Preferred name: JustRelax

Interests: Rat's - wifihacking - scripting - and much more

What I want to learn: all you can learn me, that i want to learn

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: if it is more than 10 \$ i want hold it, if it's lower i want give it back

Why I should be chosen: I can fast learn, and i want listen to you

and the rest i will pb you

StormCall - March 15, 2012, 8:29 am

Hi there. Even i need a tutor. Pls help me

tikamasala - March 15, 2012, 9:56 am

Preferred name: Tikamasala

Interests: Networking, hacking, manipulation and internet privacy/security.

What I want to learn: the basics of most areas so I am more able to research myself and understand what interests me most.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Secret answer D :I wouldnt be so stupid as to steel from a bank account.

Why I should be chosen: have an actual interest in this stuff and want to persue a career in network security, not an underage who watched die hard 4.0.

Vragoth - March 15, 2012, 1:04 pm

Preferred name: Vragoth

Interests: Computer Science / Internet Security / Psychology / Politics / History / Research

What I want to learn: Having the ability to find vulnerabilities, patch them, & a ground on where I can build upon, improve and learn myself.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I wouldn't hack a bank unless having clearance to do a penetration test.

Why I should be chosen: I believe this would be a great spot to start before i start College, hoping to get my Bachelor's, Master's and possibly a PHD in Computer Science. I believe I have what it takes because I'm very passionate about computers and obsessed with learning everything there is to know making it a great opportunity to expand my vast knowledge in several areas.

Blad?s - March 15, 2012, 1:35 pm

Preferred name: Blades

Interests: Hacking, Computers, Technology, Networking

What I want to learn: Everything computers! I would like to know as much as possible. I would like to learn where to learn, and how to do it. Every type of hacking really. Also some coding in the future. I want to have a vast knowledge of computers/networking and how it all works, and how to get what you want with computers/hacking.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:

Well this really depends on how good of a friend to me. Personally if it was a good friend I may let him know, and just return it. If it wasn't a real good friend and I felt like he may call the cops, than I would put it back secretly.

Why I should be chosen: You should choose me because I am a great learner! I am online all the time really, and I am a good friend. I am definitely determined to learn all this, and will do my best to make this easy on you. I am a hard worker, and I am excited to learn hacking!

'Chief. - March 15, 2012, 2:08 pm

Preferred name: F8Era

Interests: Html, Graphics, Video Games.

What I want to learn: C++, How to code my own RAT.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Keep It.

Why I should be chosen: Im Awesome, Positive, Know my way around a RAT. (Not that I could ever code one). Im more into social engineering + helping other people. I can also code a keylogger in VB.

REAL age: 15

Time zone: I live in NZ, Im on the computer 24/7 so I don't see how that matters.

If you were to attempt to hack me right now, how would you do it?: I don't consider myself A hacker. I don't camp in a tent with "anonymous" hacking tools outside the parliament with a huge sign "Hacking in progress!"

Critical_Hax - March 15, 2012, 2:16 pm

Preferred name: Critical_Hax

Interests: Programming - Gaming - Girls

What I want to learn: Keylogs - Hacking -Manipulating

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Give it back and tell him I stole it

Why I should be chosen: Because I learn quick and always listen closely. and Always wanted to get into this stuff, used to use RATS and Keylogs alot, but feeling like i dont know alot yet.

Cheers

Oberlo - March 15, 2012, 2:22 pm

Preferred name: Kevin

Interests: RATS, SQL, Exploiting, Social Engineering, Key Loggers, Remote Hacking

What I want to learn: RATS, SQL, and Remote Hacking - Anything and most things really.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Like the others have said, it depends on the friend. Also, this is assuming that I'd be able to hack into a bank account safely - but unless it were my soul mate or a very very close friend, I'll keep it, as cold as it sounds.

Why I should be chosen: I'll admit I'm relatively new to most hacking. I've only been introduced to VB6 programming and the only experience with programs and exploits have been with the help of others and for the use of on games. However, I'm extremely diligent, willing to dedicate my time to learn these things. I find hacking very interesting and this would be an excellent opportunity to learn :) I fully understand this is a huge challenge, but I'm 100% willing to take it.

haxorintraining - March 15, 2012, 2:50 pm

Preferred name: Javilionaire - Will tell you my real name if I get chosen :)

Interests: Anything science and computer related.

What I want to learn: Everything you can teach me. I will not give up, ever.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would silently deposit it back into their account. I believe that it is incredibly wrong and immoral to hack a friend, let alone his money without a very justified reason.

Why I should be chosen: I have always wanted to learn hacking, but have never had the time, however, now I do. I'm incredibly competent, loyal and will never lie to you. When I want to learn something, I will put everything I have into it and will not give up. I will never let you down. Please choose me!

Justice - March 15, 2012, 3:39 pm

Seems pretty cool, good luck to everyone that applies.

I might apply, what shall this entail?

Laitine - March 15, 2012, 3:43 pm

Preferred name: Laitine

Interests: My interests are Computers, Gaming, Cars, Hacking, Technology, Networking.

What I want to learn: WiFi Hacking, Keyloggers, RATs, Exploiting, Remote Hacking, BotNet stuff, defacing, SE'ing and anything you would like to teach me

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would silently deposit the money back to his/her account and say that someone did put some money to my account few times like 1-10€

Why I should be chosen: Im running out of things to do in here. I have played too much games now-a-days so I want to do something useful. I'm pretty much on computer about 3-9 hours or more in one day. I understand english pretty well.

Frostbite™ - March 15, 2012, 4:23 pm

Great applications coming in.

Also just want to clarify for people, upgrade status, rep and prestige mean nothing in this contest, only quality will be judged.

Brandenx781 - March 15, 2012, 4:42 pm

Preferred Name: Branden.

Interests: Malware Removal, Dancing, Piano, Computer Ethics.

What I want to learn: I would like to learn and find vulnerabilities and exploits on websites manually.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: On the honest side, I do not hack nor do I condone hacking or use of illegal programs. On the scenario side, I would go upfront and give them back the money to their face. I would like to explain that it was unintentional due to the fact that I just discovered it was their money a few days after.

Why I should be chosen: I am a dedicated learner, always wanting to learn different things. I know there are some stuff that I am unfamiliar about, but I ask questions when I do not understand the particular subject. I know this is going to be a hard and tedious class, but I can ensure you that I will do my best to the full potential. I don't care about anything else, I just want to learn. It's not everyday you have an opportunity like this, so I want to take it and learn to the best of my capabilities. I do not want to rush this class if accepted, because rushing a class would not allow a person to gain specific knowledge in a short period amount of time. I want to take this class nice and slow, to make sure that I understand everything, and be able to comprehend the context.

Sir - March 15, 2012, 4:48 pm

I must say I'm really liking this thread. Very nice.

Revenge - March 15, 2012, 5:19 pm

Preferred name: Danneh

Interests: Sport,gaming and computing.

What I want to learn: I want to learn as much as possible in the hacking field right now all I know is very basic stuff such as how to keylog or rat but that is as much as I know and I want to extend my knowledge

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I don't think I would ever do any hacks that would be this serious I would only hack for a reason a genuine reason so I think I would give them back the money

Why I should be chosen: I think I should be chosen because I can learn an awful lot from this, I am very friendly and will not be afraid to ask questions(lots). Another reason is because I am helpful and willing to help more people out when I know myself. I will listen very carefully and follow what you say to the best of my abilities I am very active so you will have plenty of time to teach me. I also love learning new things and don't give up on them very easy.

Snowy15HD - March 16, 2012, 12:29 am

Preferred name: Sno

Interests: GFX, Maths, Gaming, Dubstep, Photography.

What I want to learn: RATs, Keyloggers, Wifi Hacking, SQL, XSS, Defacing.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Keep it, giving it back face-to-face means admitting that it was you at which point they could call the police. Giving it back silently would leave more traces and increase the likelihood of getting caught.

Why I should be chosen: I am dedicated and hard working, I can put in around 4-6 hours a day if needed. I have a good general knowledge of computers and am quite good at social engineering as I studied (on forums etc.) and practised it for around a year.

Eeluminati - March 16, 2012, 12:47 am

Nice service dude, really helpful for the newer guys. :)

TheNeutron - March 16, 2012, 4:46 am

Preferred name: Hack0pz

Interests:Hacking

Graphics

Chess

Football

Learning New tricks about computers.

What I want to learn: I'd really like to learn SQL injecting.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Deposit it silently into their account.

Why I should be chosen: Because I am a very quick learner, I have much basic knowledge about

hacking. I know my way, what I need to know, how to learn, understand what things work. I've been in this stuff for 1 and a half year. I've learnt a lot from HF, HF member & to tell the truth some from you too. I've seen you many times in Beginners hacking forum & other places. I work very hard to know more & more about hacking. I'll learn very quick. Just give me a chance. I'm a self learner, but I'll be great to have a teacher like you.

Frostbite™ - March 16, 2012, 6:52 am

Thanks for the applications, still reviewing them all, but they look very good.
I am thinking of closing this thread in about a week.

Enterprise - March 16, 2012, 6:57 am

Glad to have you in the underdogs great job.

Autopost - March 16, 2012, 7:59 am

Preferred name:

Autopost

Interests:

Well I'm unsure if there suppose to relate to just computing or life in genereal so I'll make two.

1. Computer related interests ([Click to View](#))Rats

Web design

Program Minipulation

Virus removals

The hacking "Scene" (eg following hacking groups)

Graphics design (Although I'm useless)

Wifi Hacks

2. Real world interests ([Click to View](#))Robotics (Possibly pursueing a career in robotics)

Physics

Mathmatics

Practical Chemistry

Certain Human Biology (as you can see I love science)

Basketball Statistics

Hockey (Field Hockey)

Challenges in general, I hate things that are easy

Chilling with my mates, down time is important

What I want to learn:

Well I never want to stop learning, the thing I love most about hacking and computers in general is there forever expanding. You will never know everything, there will always be a new method or a new tool and thats what keeps it interested.

What I want to learn from you:

Well I really only got into computer systems last year, well I always loved messing with them that's all it ever was. So my skills are not excellent and I don't doubt that for a second, what I would like from you is some direction. I already have it in my mind the first thing I need to accomplish is some computer languages, I have been looking into C++ and python as my first couple, ontop of this I have learned the basics of html, css and some javascript. I have also been studying rats through the help of fellow members here on the community, learning advanced spreading techniques and such. So all I want is to keep on learning, having someone here to guide me as I continue my quest and tell me where I'm going wrong and help me with any questions I have.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:

Well I have to admit, this just isn't my scene. I'm fully committed to hacking and I will do anything but this, but I know the effects of credit card fraud as my mother was a victim about 9 years ago, It almost ruined my family and I wouldn't ever do it to someone else. So to keep my answer short, I wouldn't have stolen it in the first place.

Why I should be chosen:

Well I believe only you can decide that, but It's my believe that I am a good candidate for you "student" as I will listen to whatever you have to tell me (good or bad), I'll stay dedicated no matter what (as I have proven in my real life, Doing statistics for my national basketball league, Ranking top 10 in mathmatics each year for atleast the past 4 years, or attending a advanced chemisty class at my local university). Ontop of this I am just in the early stages, so I can be your prodige, I won't get messed around with inacurate findings and theres nothing I won't try.

Spoiler ([Click to View](#)) Anyway that you for consideering my applicate,
Sinceerly - Autopost ?

Xanderluck - March 16, 2012, 1:48 pm

Preferred name: Xander

Interests: Information, Gaming, and Learning

What I want to learn: RATs and Cracking

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would deposit their money silently into the account.

Why I should be chosen: I should be chosen because, I have the willingness to work long and hard hours. The only thing I want is knowledge and to use it wisely. Because, I have novice computer knowledge such as terms, and use. I have the willingness to redo any work that is incomplete or not legible. I want to be able to create programs, not just take and not give back any useful things.

Thank you for reading.

AST - March 16, 2012, 2:05 pm

Preferred name: AST

Interests: Security, Developing, Learning, Training, Making Friends

What I want to learn: Application Cracking, Website Defacing are some off the many things I want to learn. Learning is having a good health. And I want a perfect health.

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Give them back the money to their face, with a happy smile and say: Congratulations, you have won the: You're hacked award.

Why I should be chosen: I am addicted to the game, I will be dedicated, I already have some basic web hacking skills. I will learn and maybe I will have the chance to learn you something. I am very critic and I will never stop with it, every thing have to be done, perfectly.

badboy3 - March 16, 2012, 7:26 pm

Preferred name: badboy3

Interests: anything that has to be doing with hacking

What I want to learn: web hacking and all those other things

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would shut my mouth and not say a word

Why I should be chosen: Because I have been looking for this for a long time!

humangraffiti - March 16, 2012, 7:39 pm

Preferred name: Argon-44

Interests: Computer, RAT, EWHORE, SE, SQLI, XSS, Programming, VFX

What I want to learn: XSS, C# language

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would silently deposit their money back to their account

Why I should be chosen: Because im a very dedicated member here on HF and IRL. Ive been here for almost a year now and since i joined one of the things ive always wanted is to be known and to help people. I am also a learner, i love learning about stuff from other members here like SQLI help and such. I think I should be chosen because im a hard worker, fun, and a very matured person, I dont joke around all the time and I know what work is, also because i am a very friendly user i have made many friends here on HF and i have never scammed people before and i will never will.

Frostbite™ - March 17, 2012, 1:22 am

(Mar 16, 2012 06:57 AM)Enterprise Wrote: [\[CITE\]](#) Glad to have you in the underdogs great job.

Thank you very much, proud to be in them. I'll ad their name to the title.

To everyone else, it's going to be very hard picking my second student, all of the applications are very high quality ?

I will be closing this on Wednesday.

Grammar Rays - March 17, 2012, 4:28 am

Preferred name: Phil

Interests: Learning new stuff & earning/making money

What I want to learn: I'd love to learn how to exploit websites

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I'd keep it but I would also fake winning the lottery and then offer to take them out one day for being my best mate

Why I should be chosen: Because I fit the requirements and you're offering exactly what I have been looking for :)

h3x3n - March 17, 2012, 4:30 am

This is h3x3n, now what?

Do I win?

TheVaporGuy - March 17, 2012, 8:11 pm

Preferred name: Vapor

Interests: I am interesting in computers.

What I want to learn: I would like to learn to about SQL and XSS

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: I would deposit it silently

Why I should be chosen: I already know how to rat, and the basis of hacking, I am a quick learner and very friendly.

Abdilo - March 17, 2012, 10:57 pm

Preferred name: Dave

Interests: Ratting and Phishing

What I want to learn: WiFi Hacking

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: Depends on how much I stole if I stole under 100 I would give it back over 1k I would hide it and I would spend it on a vacation to Canada XD

Why I should be chosen: I have allot of time on my hands and my internet is @ 8kb/s so I would love to hack into my neighbors wifi and use theirs instead.

Uncle Ruckus - March 17, 2012, 11:15 pm

Preferred name: Kyle

Interests: Monetizing

RATs

Botnets

(D)DoSing

Gaming

Moderating (forums, communities, etc)

What I want to learn: XSS

SQLi

Exploiting

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:I would deposit it silently into their account. This way, no damage is done. You should never steal or betray a friend. However, if you are confronted about it, you should tell the truth. Lies are not healthy between a friendship.

Why I should be chosen:I should be chosen because I am a very dedicated member. I learn fast and am always willing to share any of my knowledge.

daman123 - March 18, 2012, 12:21 am

Preferred name: ash

Interests: Learning tech stuff and making money

What I want to learn: rats,irc bots,XSS,keyloggers,router hacking

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: First off why would i take the risk of going to jail? and being a dick to steal anyone's cash? 2nd give it to his face and say sorry and ask him not to snitch on you

Why I should be chosen: because i really wanna learn more and would like to be a good haxor :P

Frostbite™ - March 20, 2012, 2:03 am

Going to be closing all applications in around an hour, so be quick!

bobjon - March 20, 2012, 2:23 am

(Mar 20, 2012 02:03 AM)Gu?Rdi?n Wrote: [\[CITE\]](#) Going to be closing all applications in around an hour, so be quick!

Sounds good bro, hope I get chosen. ?

Trippy Mane - March 20, 2012, 3:09 am

Preferred name:Shwayze

Interests:Hacking and Programming, IRC, Botnets

What I want to learn:SE, Hacking(Willing to learn more tips.)

You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?:Give the money back, cause its the right thing to do, it would be lying.

Why I should be chosen:I think i should be chosen because, i just wanna learn, not here to mess around, and maybe with the knowledge you teach me(IF i get picked),I can share it with the HF community.

Frostbite™ - March 21, 2012, 6:10 am

I have constructed my first shortlist, which has 23 members on it. I will update when it is narrowed to the next list.

bobjon - March 21, 2012, 6:14 am

(Mar 21, 2012 06:10 AM)Gu?Rdi?n Wrote: [\[CITE\]](#) I have constructed my first shortlist, which has 23 members on it. I will update when it is narrowed to the next list.

I hope I'm on it, I sincerely want a mentor ?.

Frostbite™ - March 21, 2012, 6:30 am

Second shortlist, down to 13 people, going to be hard :P

bobjon - March 21, 2012, 6:42 am

(Mar 21, 2012 06:30 AM)Gu?Rdi?n Wrote: [\[CITE\]](#) Second shortlist, down to 13 people, going to be hard :P

Can you list the people ??

AST - March 21, 2012, 7:30 am

That goes hard, next shortlist 4 people?

DuctTape - March 21, 2012, 9:19 am

Preferred name: Jake

Interests: I make Duct Tape Wallets, I am learning to build computers, I am learning some programming.

What I want to learn: Computer hardware and programming, along with RATs, crypting and DDoS
You hack a bank account and steal the money, only to find out two days later it is your best friends. Do you give them back the money to their face or deposit it silently into their account? OR, do you keep it?: In this case, I am thinking that this "friend" is one I have known and is a very friendly one. I would deposit it silently because if I did tell them I did it, he may forgive me but will not think of me as he did before. If he was a guy who I wasn't great friends with and is an asshole, I would keep the money.

Why I should be chosen: I really want to learn about computers and how they work. I also want to learn about RATs and DDoSing, and possibly how they are created. Crypting has fascinated me since I had joined and it is something I wished I could do, but with this group, I hope I can learn how crypting works.

Thanks for reading this,

The Archangel - March 21, 2012, 12:23 pm

Fingers crossed! :D Really hope I made it!

Frostbite™ - March 21, 2012, 4:16 pm

(Mar 21, 2012 04:08 PM)R.A.T. Wrote: [\[CITE\]](#) Do I still get in for making the userbar?

This isn't the actual underdogs group sorry. I'm just in it and supporting the name.

AST - March 22, 2012, 12:42 pm

When will you tell us who is chosen?

bobjon - March 22, 2012, 2:11 pm

Yeah :D. Still waiting for the results, hope I make it.

Frostbite™ - March 23, 2012, 6:54 am

I have selected the above user bobjon as my second mentoree. Good try everybody, it was close!

?rtificial - March 23, 2012, 9:15 am

Darn. :(

Gratz to the two who got selected.

bobjon - March 24, 2012, 4:17 am

Yay, I'm looking forward to learning the art of hacking. Thanks IPseudo for your kind words.
