Thread: [*\[GIRL RATTING\] Natas's Spreading Package + TUT How To Rat Girls*](#)

Natas - March 15, 2012, 3:17 am

EDIT - Do to the high amount of people who have pmed me wanting this package and all the feed back I have gotten you may just download this below !

DownloadLink- <http://www38.zippyshare.com/v/62332420/file.html>

THIS THREAD INCLUDES

*TUT ON HOW TO RAT GIRLS SPREADING THROUGH FACE BOOK

* MY PERSONAL PACKAGE FULL OF MY PICTURES AND TEXT DOCUMENTS USED DURING THE USE OF RATTING GIRLS WITH THIS METHOD.

FULL TUT BELOW, ENJOY HF

Personal TIPS

So if you are reading this I made this method on how to rat girls to do this you are better off being fully FUD with your server. If your not its ok but it will be a lot harder because it will show up as a virus to them if they have a AV "Anti Virus" if they see something about It like "it just said I got a virus :(". Make some shit up say something like "Its just because its not sure who created the download its not a virus just ignore it :)"

What You Will Need

- A. A fake name "Example I use the name Josh Andrews"
- B. A new fake email that matches your fake name above "Example Joshandrews1994@hotmail.com"
- C. A new face book account with your fake first and last name use your fake email to make it.
- D. Your RAT rename it something like photo11.jpg and if you have a crypter make it a jpg file :).

Steps

1. Once you make your face book account you need to make it look some what legit. First fill out all your information get a picture of a guy " a some what good looking guy will make you better off or you can get my package and use on of thoes picutres" mabey steal some ones pictures off another persons face book but stay away from his friends and him or he may post your not real. get a few pics upload them and make a profile picute. put some intrests and a bio about your self. then you need to do some hard core trolling add a whole bunch of people mabey 70 or more that will make your account look legit.

2. Once your account is done its time to chose your fist slave :) find a some what good looking girl. Add her on face book "if she is not all ready added" try to find out and see if she is single is she is single it is going to be a lot better to get her. Look threw her picures dont say any thing perverted but give a few of them a like and coment mabey say looking good or if she is doing something funny say haha thats funy or something. Or if she is at some place be like I have been there before liking all the pictures or puting something perverted will make her think you are a freek or it will make her think you just sex or a man whore. after you do that send her a message make the message sound good here is my message feel free to use it if you want and make sure you save your message if you want to use it on more then one girl.

[Message] Hey sorry if I freaked you by adding you. I just saw you and thought you seem pretty cool and im bored to shit, I just dont no what to do and felt like adding you if you dont want to talk to me its fine you dont have to add me but you seem pretty chill !. [/Message]

3. Wait for her to get back to you it may take a while depending how active she is on face book. While you are waiting choose your next few victims I tried doing 10 victims a day just because the more you do the more girls you get duh. But any ways do this to a few girls accounts and wait for a message back.

4. When you finally get a message back you are going to have to talk to her a little bit mabey get her number and have some social time by texting if you dont want her to have your real number make a new aim something like your fake name or something cool "skaterdude420" somthing like that how ever I never have texted a girl doing this method. But the point is you need to talk to her a little bit and build that bond you need to build . Once some converstatins start to build it will be time to hook her. [Please note that that bond is the key to doing this there is two different kinds of bonds you can make there is the "trust brother and sister bond" and there is the "sexual boy & girl bond". Try to build that trust brother and sister bond but if she flirts with you first then go for it flirt back that means you got this fish on the hook but do not flirt with her first that will break what ever bond you have with her and will ruin every thing. If she doesnt flirt with you its ok it doesnt mean she doesnt trust you just keep on building your bond.

Another Personal Tip

Ask A LOT of qustions wait for a response before you ask for more and save your qustions to a note pad and respond to her qustions like your intrested and try to find out more. GIRLS LOVE ATTENTION and this will help build that bond by showing your intrested in her.

Example Of Some Questions To Ask

How is your day going ?

How are you feeling ?

How is your family like ?

Are you religious ?

What do you do after school ?

Just make shit up make her feel like you care dont ask to many qustions dont make your self seem like a robot you are going to have to tell her some stuff to.

Another Tip

"Note Pad is a life savor make sure to save your convos for you dont have to use them over and over again"

Popular Charectors And Personaltys I Made Up

Make a Big story about how you got sent off to a dentenal center for a year for thoes trying to seem like "bad boys"

How your family is mabey say your dad use to beat you up when you were a kid this will make her feel guilty or just kinda bad for you.

as I said just make some convos up that are some what intresting

When You Should Go For The Catch

Once you feel she trusts you and you have a big enough bond and she trusts you its time to hook the fish and get your slave rattedAs I said there is two bonds you can build the brother sister trust bond or the male female sexual bond. Depending on the bond you made its time to get her rat-ed

Bond Number 1 - The Sexual Bond

If you have the sexual bond do something like this

"Hey I got something I really want to you to see I think you will like it :) Im going to send it to you cause umm you no I dont want any one els to see it if she says why dont you send it to my phone ? Say something like I dont have picture messageing. rename your rat to something that will make it look like a photo mabey something like photo11.jpg and if you are fud. Ask for her email and send it to her threw her email. If your not you are going to have to upload it to her and send her a link I suggust useing <http://zippyshare.com/>

Bond Number 2 Brother Sister / Friendship Bond

If you have that brother sister trust bond built make up a story about something embareising that happened and say you took a picture and its hillarious and you have to see it as I said above the best way would to be sending it threw email but uploading works to if you upload it you might have to help her figure out how to download it.

The End

If you have any qustions or concerns feel free to ask me. If you are wanting the package I use just pm me I use a direct link to all members

Yeah the only hard part is making a fake fb and adding a bunch of friends and stuff. One time she new I rated her computer and she bitched on my wall and stuff and I had to make a new one. I no this method works from using it if you want any pictures for your fake fb you can download the download I have on this thread.

Lil Benadryl - August 30, 2012, 7:36 pm

Hey I would like to say thank you for making this thread it was very high quality and I will be using this method to get some hot girls. I give a huge vouch for this because this absolutely works. Btw if

you do this with a guy you could get a lot more because guys think about gettin a nude picture of the chick so if you offer them that they would take it. XD

care to share the image spoofer with me? (PM) :P

daeyezofhoruz - May 14, 2013, 9:10 am

im too lazy to be doing all that and simply just don't have the time. i had a method with a java drive-by and webcam chatting sites. really nice results and no bond required.

but anyways yeah about the whole renaming your server to a jpg extension... it just can't be done. you can change the image of the file to make it look like its a jpg file but the server extension has to stay as an executable, com, exe, bat or whatever. you can try yourpicture.jpg.exe amd have them download it but the driveby is much easier solution to just click ok and no downloading involved.

When I use to use this method I would just use zippy share or a file sharing site that allows

malaware

even back then I wasn't able to send files just straight over facebook.
