CrystalClear Theme  
by mavamaarten

Yep, I'm back with another free theme for you guys!  
Sorry for the boring thread, I'm too lazy at the moment to design a whole new thread for a simple theme.

Preview

Features:Animated (fading) button

Tabcontrol

Animated progressbar

Checkbox

Radiobutton

Listbox

Controlbox

Textbox (not on image)

Download & Agreement:

Not really an agreement, but there are some rules I want you to follow.

First of all, IF YOU DON'T KNOW HOW TO USE THEMES, DON'T SPAM ME VIA PM! I used to say this in white text but I still got a lot of PM's about it. Seriously, I hate getting spam PM's.

Second of all, GIVE CREDIT IF YOU USE MY THEME IN YOUR PROGRAMS! (I already used red before ? )

Enjoy using my theme! If you experience problems please try to fix them yourself first. If you can't get it fixed, post in this thread ALONG WITH YOUR ERRORS.

Download the theme here (direct mediafire link, no surveys):

Why labels? They look fine right now. About the other features, nah, I make these themes for fun, I'm not going to put too much effort in my free themes.

**Taco7712** - March 15, 2012, 10:26 am

This looks amazing, it won't lag in any way right? Will be giving you credits.

**aTastyUnicorn** - March 15, 2012, 10:49 am

**no1me** - March 15, 2012, 10:56 am

mava i saw nice CheckBox with x inside can u do it (i can do it but will take much more time)  
tnx

**Meerkat.?** - March 15, 2012, 10:59 am

It's retardedly easy :D

The icon is actually drawn as a string (think of the wingdings font). In the source it will show DrawString("a", ..), replace the "a" with "r" and it should show an X.

Perhaps you'll have to change the position a little, but that should be no problem :)

**no1me** - March 15, 2012, 11:25 am

yhe it easy and look nice i will change the size and it wiil perfect tn timer

**Exodus-** - March 15, 2012, 11:26 am

<https://hackforums.net/showthread.php?tid=2315932> That's not really a problem with the theme, you're doing something wrong with your threading.

Thanks a bunch, Eternal Five, for converting my theme into C#. Now C# coders can enjoy this theme as well!

Enjoy! :)

**beho86** - April 15, 2012, 8:21 pm

I found a little bug, not a big deal tho. If you try the textbox, and make it multiline. It works fine, but for some reason the lower border disappears! Other than this! You're the man keep bringing us those amazing themes mavamaarten.

Oh, damn. Can be fixed very easily by editing the class ;)

**beho86** - April 16, 2012, 11:15 am

Sounds good. I gonna check out the textbox class and play with it to see if I can get it fixed. Thanks tho

Edit: Got it! Thx

Just a note, for the C# conversion there might be an error. "Strings.InStr()" does not exist. Looking for a fix right now :3
