Thread: [\[Found\] PHP SQL Injection Scanner Online Tool](#)

Krisz - March 15, 2012, 4:35 pm

Hey Hackforums

Haven't been on here in a while posting stuff but I have still been updating myself reading new posts. Due to my job, I've been unable to contribute much lately.

Since I've been google dorking a lot lately, I [accidently] came across an online PHP SQL Injection scanner tool.

*NOTE: I Haven't had time to test it, but let me see what you think of this tool ?

*Also, I ran a search on hackforums for this link/tool and found no results, So if anybody found it before, then my apologies.

Looks really useful. Thanks for sharing :)

kolabsmusic - March 15, 2012, 6:35 pm

Thank you, just took a look at it, seems to be useful sir!

03storic - March 15, 2012, 9:17 pm

That's awesome, bookmarked for later use.

Krisz - March 16, 2012, 1:26 am

It seems to have a fairly easy to use user interface :) I will be testing it soon! ?

Krisz - March 17, 2012, 4:34 am

Has anybody else tested this tool yet? ?

The link is dead. Anyone know where a new scanner is?

1. Don't topics that are 3 years old.
2. Make your own or download some tool.
