Thread: [Image Resizer \[HF Userscript \] \[V 1.0.0 \]](#)

_DeNy - March 15, 2012, 11:25 pm

First of all, this adds a new section in your UserCP:

[img]http://ss.woopshoop.com/Weeip.png[/img]

After you visit that page, it will look like this:

[img=800x450]http://ss.woopshoop.com/R3Wlm.png[/img]

From there, it's pretty self explanatory.

And the final outcome (A screenshot taken of a thread containing many images):

[img]http://ss.woopshoop.com/te1eK.png[/img]

Original: [\(Click to View\)](#)

[img]http://ss.woopshoop.com/vwf0o.png[/img]

<https://hackforums.net/showthread.php?tid=2304516>)

Google chrome and FireFox users, install from here: <http://userscripts.org/scripts/show/128447>

If you run into any problems, please let me know!

If you think something should be added to this, again, let me know!

+Awesome - March 15, 2012, 11:55 pm

Such an awesome share and no replies? ?

Aldi - March 15, 2012, 11:58 pm

i love your work im using a few right now i <3 you bro haha nice work

_DeNy - March 15, 2012, 11:59 pm

That's actually what I was thinking for a while, lol. But userscripts don't get much attention anyways, no matter how easy they are to use.

Aldi - March 16, 2012, 12:00 am

but these user scripts are so fuking good?!?1

+Awesome - March 16, 2012, 12:00 am

Look how happy I am using these. Just tried quoting your post. Didn't work. ?

Rouge Status - March 16, 2012, 12:00 am

No thanks, especially when you can access all data from the sites we visit.

Aldi - March 16, 2012, 12:01 am

Can't tell if stupid or just troll.

If you even bothered to look at the script, you would know that there's nothing malicious about it.

Dummkopf.

Aldi - March 16, 2012, 12:03 am

Dummkopf.

begins sifting through the script...

Å¢? øf ???d?s - March 16, 2012, 12:03 am

You're really getting out these little user scripts, aren't you? xDD

Dummkopf.

*you're

And I'm sure you could probably change it if you wanted.

tetrimartial - March 16, 2012, 12:06 am

Tbh, thank you for the script... i trust it to not be malicious looking at your profile anyway :) cheers
will test it out now

I fail to see what you were correcting.

If you don't trust me, then host the script locally for all I care.
