Thread: [\[MUST VIEW\]Open Source ddos/dos tool\[MUST VIEW\]](#)

Hacker_Adi - March 17, 2012, 1:45 am

Hello everyone i'm starting a new FOSS project.It is a Opensource ddos/dos tool.

You have to download the .rar file,extract it and then you can code the ddos/dos tool and submit it to given website below

This DDOS/DOS tool is by the hackers for the hackers.The details about this project below:

Details

Project Name: FOSS DOS

Language: VB.NET/Mono

Website:<http://projectfossddos.weebly.com>

Sorry for the incorrect sp3lling error in poll title.NET application will work cross-platform.

When Microsoft released .NET it also submit .Net architecture,designs,etc.. to ECMA under section ECMA-135.When ECMA started working on Mono many opensource/non-opensource programmer contributed in it.

You can also import your silverlight apps to cross-platform Moonlight it's a part of MONO

Antivir: Nothing found

ArcaVir: Nothing found

AVG: Nothing found

BitDefender: Nothing found

VirusBlokAda32: Nothing found

VirusBuster: Nothing found

Report overview

Scanned by viruschief.com

Check the website again so you can see the proof that it's not a virus.

Thanx for viewing the post.

Kyle XY - March 17, 2012, 1:48 am

One Word: SKID.

Honestly. We don't need your shitty DOS tool.

Xylon - March 17, 2012, 1:51 am

First of all this is a DOS tool.

Second of all you're a script kiddie not a hacker as you stated:

Quote:This DDOS/DOS tool is by the hackers

Hacker_Adi - March 17, 2012, 1:53 am

I'm not a skid. There are hundreds of opensource ddos/dos too but the ddos/dos tool i'm creating is dynamic and different from other. Even the Anons also use ddos/dos tool. Even you also used a ddos/dos you can not say that you have'nt used any ddos/dos tool.

DragonHunter - March 17, 2012, 1:55 am

Keep in mind you are not able to use most of the obfuscators with mono since mono needs to read 100% of the assembly

You can only use very light obfuscators which will rename some stuff and thats about it ur able to do

Just letting others know they can't use cryptors and such

Xylon - March 17, 2012, 1:57 am

(Mar 17, 2012 01:53 AM)Hacker_Adi Wrote: [\[CITE\]](#) I'm not a skid. There are hundreds of opensource ddos/dos too but the ddos/dos tool i'm creating is dynamic and different from other. DDOS IS PLURAL FORM DOS IS SINGULAR AND SINCE YOUR MAKING A TOOL THAT'S ATTACKING FROM YOUR OWN IP IT'S OBVIOUSLY SINGULAR FORM SO DOS. AND NO I'VE NEVER USED RETARDED PROGRAMS LIKE THIS IS USE A BOTNET THAT WOULD TAKE DOWN YOUR LIFE FOREVER.

Hacker_Adi - March 17, 2012, 2:01 am

Hey Xylon it works on two modes

DDos

Dos

it depends on you which option you choose.??

And one more thing i want to tell viewers that i'm coding a Network library it will work on it's own Network library.

I will be grateful if the viewers can give me suggestion,ideas,etc.??

Xylon - March 17, 2012, 2:11 am

I will be grateful if the viewers can give me suggestion,ideas,etc.??

So what does it use shells, bots? not really.. they would get leached after 2 secs.

Hacker_Adi - March 17, 2012, 2:13 am

Thanx DragonHunter for giving me advice but it is an opensource tool so anybody can view,modify and upload it to given website but thanx man

Code So what does it use shells, bots? not really.. they would get leached after 2 secs

It will not depend on the shells or botnets always it will also use some website crashing commands like the most simple HTML command to crash servers:

Get C:\Con\NUL

And one more thing it will automatically create shells when it will need shells but this proc3ss will take some minutes.???

Please notify me by pm that you downloaded the file and if you have any problem contact me. Thanx

Pumpkins - March 17, 2012, 6:53 am

(Mar 17, 2012 02:13 AM)Hacker_Adi Wrote: [\[CITE\]](#) And one more thing it will automatically create shells when it will need shells but this proc3ss will take some minutes.???
Funniest thing i've heard all day. ?

Hacker_Adi - March 17, 2012, 7:09 am

Hey it's not a funiest thing it is a feature of the tool and now i'm coding sockets/ports for it.

If you want to contribute you can contribute but don't make comments like that.??

Sho?kwave - March 17, 2012, 8:30 am

I do not understand why this is a "must view" thread, and judging by your spelling/grammar, it's probably shit anyways.

Hacker_Adi - March 18, 2012, 12:06 am

I'm going to remove this thread because in this forum no one wants to help/contribute but they will discourage someone from doing something different from others????

DragonHunter - March 18, 2012, 1:40 am

(Mar 18, 2012 12:06 AM)Hacker_Adi Wrote: [\[CITE\]](#) I'm going to remove this thread because in this forum no one wants to help/contribute but they will discourage someone from doing something different from others???? Funny how u figured this out, most of the people only know 1 thing "leeching"

Hacker_Adi - March 18, 2012, 2:05 am

I said this because nobody in this forum except few help/contribute but they say that it's a shiity idea, we don't need the tool even if they doesn't want the tool/contribute in this project they should not make comments like this?????

?Cooldude? - March 18, 2012, 4:45 am

And how are you creating your shells?

Hacker_Adi - March 18, 2012, 5:24 am

I'm just coding shell and sockets+shells generator this time i will explain you after i finishes it and i will also put it on website.???

Assault - March 18, 2012, 6:58 am

Argh..

[IMG]<http://solutionproblem.files.wordpress.com/2011/06/cant-tell-if-trolling.jpg>[/IMG]

Sakozi - March 18, 2012, 6:59 am

this thread already exists here <https://hackforums.net/showthread.php?tid=2308801>

Hacker_Adi - March 19, 2012, 4:54 am

I know i have started this thraed because it's going to be get locked.??

Sutton2k9 - March 19, 2012, 7:15 am

(Mar 17, 2012 02:13 AM)Hacker_Adi Wrote: [\[CITE\]](#) It will not depend on the shells or botnets always it will also use some website crashing commands like the most simple HTML command to crash servers:

And one more thing it will automatically create shells when it will need shells but this proc3ss will take some minutes.website crashing commands you can just send a packet to a website saying shutdown and the server shutdown unless you found a new exploit in server which i doubt it.

How are you going to automatically going to create shells?
Will you be using webdav exploit or you found a new way?

If you have found a new way then it will be a shit way within two weeks, after you make it public.

assassin_D - March 19, 2012, 9:52 am

Dirty skiddie... DIE!!!

RARRGGHHRRAA

Lol srsly shut the fuck up. Please do come take down my life with your 5k install-for-install botnet. Do you feel like a big man on the internet with those big letters? when you exceed 10 GB/s you can talk. I can prove that also.

<https://hackforums.net/showthread.php?tid=1393622> everybody watch for the big hecker.

***** - March 19, 2012, 3:57 pm

Oh come on, this is not Shit?

let me paste your code:

Code Public Class FOSSDDOS

```
Private Sub AtrumButton1_Click(ByVal sender As System.Object, ByVal e As
System.EventArgs)
    Form2.Show()
End Sub
```

```
Private Sub AtrumRadioButton5_Click(ByVal sender As System.Object, ByVal e As
System.EventArgs)
```

End Sub

Private Sub Label1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub Target_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub TargetPort_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub PortNO_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub TargetServer_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub AtrumRadioButton1_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub AtrumRadioButton3_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub AtrumRadioButton4_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub AtrumRadioButton6_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub AtrumRadioButton2_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub Attack_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub Close_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

Private Sub FOSSDDOSPANE_Click(ByVal sender As System.Object, ByVal e As System.EventArgs)

End Sub

End Class

Please, explain how this is an amazing ddos program?

assassin_D - March 20, 2012, 5:09 am

Stupid skiddie, i know ive posted but i want to keep it alive... for the enjoyment of HFs non retarded users :D

Coleak - March 20, 2012, 8:15 am

Wow, I think my life has forever been changed by this user affected with down syndrome.

Hacker_Adi - March 20, 2012, 8:57 am

Sorry i have given an incomplete code of FOSS-DDOS tool but it is now complete and Version one is released if you want you can contribute in it .Please test it and rate it.???

maruata - March 20, 2012, 9:03 am

Nice one you did. But the form can be re-sized and the close button is not moving along. I think that need to be fixed!

Ano Mouse - July 20, 2012, 3:04 am

Nice DDOS Tool

it works thank you

have a good day

Khaos Theory - July 20, 2012, 9:03 am

have a good dayWhy did you gravedig this useless thread?

TechApp - July 20, 2012, 9:13 am

[img]http://cache.ohinternet.com/images/e/e9/Skid.jpg[/img]

Hello everyone i'm starting a new SKID project.It is a Opensource script/kiddie tool.

You have to download the .skid file,extract it and then you can code the script/kiddie tool and submit it to given website below

This script/kiddie tool is by the hackers for the hackers.The details about this project below:

Details

Project Name: Script Kiddie

Language: VB.skid/Mono

Website:http://projectfossddos.weebly.com

Sorry for the incorrect sp3lling error in poll title.NET application will work cross-skiddie.

When skids released .NET it also submit .Net architecture, designs, etc.. to ECMA under section ECMA-135. When ECMA started working on Mono many opensource/non-opensource programmer contributed in it.

You can also import your kiddielight apps to cross-platform Moonlight it's a part of MONO

Antivir: Script Kiddie Found

ArcaVir: Script Kiddie Found

AVG: Script Kiddie Found

BitDefender: Script Kiddie Found

VirusBlokAda32: Script Kiddie Found

VirusBuster: Script Kiddie Found

Report overview

Scanned by kiddiechief.com

Check the website again so you can see the proof that it's not a virus.

Thanx for viewing the post.

Mazaki - July 21, 2012, 4:40 am

I take this program :) I'll see what it is.
