I'm not exactly a beginner, I know about rats, keylogs and other things, but would like to keep learning more. I'm not close to a being a pro hacker but if theres some1 out there who could use help with anything id be glad to help out so at the same time I could possibly learn some more. I'd also be interested in helping any green hat hackers or RATers who BM. Like i said, i'm not a pro hacker, but I do know some things and can learn fast. PM me thanks :)

NOTE: Don't ask me how to set up rats. Theres a million tutorials on this, go through them and see what you did wrong. Theres also a lot of people who will set it up for you for a small fee or even free.
