Hello hackforums! :) Today i am giving you a free chat spammer (Facebook, Skype, MSN, Yahoo, etc) You should know what a chat spammer is and if you dont then the name is pretty self explanatory. So pretty much just enter a message, and an interval(milliseconds) whats new? well in insatiable 2 i have added an anti spam detection feature, a feature to allow limited amount of messages to be sent if you want and i fixxed an anoying bug that put the message in the set message box.

To download just click the thread picture or click [here](#)

Ok, credit to Stackoverflow for helping me send strings to other apps, but everything but that is 100% mine. I coded this from scratch.

and no i did not use that tutorial. (lol that tutorial is a VB tut and my program is Delphi)

All of my apps are coded from scratch and quality.

Bump, so some more people get to enjoy what these guys got :)

Great release for the people who need this.

But, it was really unnecessary to make a thread design for a free product.. lol don't you think?

Though, it's your choice. Nice job i guess.

**Badside416** - December 21, 2012, 10:12 pm
