Thread: [HOW TO HACK FOR NOOBS, WHERE TO START, HOW TO DO IT \[REVISED\]!](#)

Turtle™ - March 17, 2012, 7:51 pm

Thanks for taking the time to read this thread

It is important for beginners to take one subject at a time and stick with it until they master it so that is why the links are individual.

Here are some of the most common hacking methods,

I made a similar thread as well but I could not keep up with all of the people so here are the most common requests

Ezio42 - March 17, 2012, 8:04 pm

Thanks, but, I'm way too lazy to download them all individually, could you upload a .zip with them all in it? Thanks in advance!

'Chief. - March 17, 2012, 8:16 pm

good idea upload a single zip file thanks

The Rad Russian - March 17, 2012, 8:28 pm

Come on now, he shouldn't need to upload a .zip because the point of this is to choose which topic you would like to learn about. I have downloaded almost all of them, but some of them I don't need, and it would be a waste of space on my computer.

But, this is in the beginners section, ergo someone wanting to learn to hack would come here, and most new hackers want to know everything they can about hacking.
