Thread: [Thread moved.](#)

Nichole - March 18, 2012, 11:59 am

I posted this in the wrong section, and moved it.

JellyFishy - March 18, 2012, 12:03 pm

Very nice. :) Good luck with the project. Will have to buy it for sure.

Not planning on selling it, just going to release it.

JellyFishy - March 18, 2012, 12:09 pm

Ahh okay. I'll observe it and add it to my crypter if you will allow me ofc.

ubbelol - March 18, 2012, 12:14 pm

Wrong section? It's not a code or anything, it's not really related to .NET and if it's true what you said about hooking ZwOpenProcess then it's not coded in .NET either.

fatbill5000 - March 18, 2012, 12:18 pm

could i get a copy of it when its done ? or be a tester?

Nichole - March 18, 2012, 12:19 pm

Not going to release the source. Just the builder. Here is a beta test if you want to quickly run. It's not infected with anything, just the crypter and a text encryptor as a dummy process. Pretty much, you'll run the TestCrypt.exe, the file encryptor will appear, and if you end the TestCrypt.exe process. The file encryptor will still be running, with no visible process attached to it. But since the console is visible, you can just close it from the screen. The point of course is that, if the application was hidden in the background, you wouldn't be able to get rid of it.

<http://www.mediafire.com/?w77donutt43x9da> It's harmless since the target process is only a text encryptor. If you want to stay on the safe side, just run it in sandbox or a virtual machine.

Oh sorry, it is the wrong section. Didn't mean vb. And You actually can hook ZwOpenProcess through .Net. By dynamically loading the libraries.

Bill Nye - March 18, 2012, 12:31 pm

This is going to be great. +1 for you.

Huskar - March 18, 2012, 12:35 pm

Your Not Going to sell it? I recommend You Sell It

Shihanus - March 18, 2012, 1:48 pm

Damn! Every release you do is Walls-Off-The-Balls incredible!

I'm thinking you should sell it because that is by far the best crypter I have EVER SEEN!

But at the same time I don't want you to sell it, I want it.

fatbill5000 - *March 18, 2012, 1:51 pm*

i dont want you to sell it, the community wants it lol
