Thank you for share ^^

tux1 - January 13, 2010, 4:22 pm

nice features but strings are not encrypted so i don't recommend anyone uses this otherwise you run the risk of losing your logs

Hey rapidguide, love your keylogger! Works like a charm. But i was just wondering how do i remove the server.exe from my computer because i ran it to test it on myself and now i don't know how to remove it. I tried running kill.exe but it brings up an error and it won't remove it. Can you tell me another way to remove it?

Thanks, and again very nice keylogger. ?

Shifty™ - January 16, 2010, 11:52 am

What kind of program makes the keylogger?

Because my question is: "What is the best way to infect an another computer with this keylogger?"

For what the fud box if its not fud?

tonykil1 - January 22, 2010, 6:02 am

How does this works? Im a beginner. I opend the map and i got two files. Kill and the keylogger?
How do i get this to work and spread? Im VISTA btw.

raptors500 - January 22, 2010, 4:53 pm

I'm gonna try, it looks like a pretty advanced key logger. I really like the feature of a screen shot, good for catching your gf to see if they've been cheating.

tonykil1 - January 23, 2010, 1:44 am

Can someone please tell me how this works? I want to spread to some guy who hacked my account. So kinda keylogg him back.

hey dude,why i cant rename the server.exe its say its loaded in system,does it mean im getting keylogged by you? wth is this? why did it load on system? when i do killl it tell me problem with net framework,;omfg..

Toy - January 23, 2010, 3:53 pm

How do you find the password in the log's.
Also It doesnt send all the info. :S

Hardy - January 23, 2010, 6:02 pm

I tried the keylogger in torrents and it says they both have 1 leecher that means they were download right so how come i didn't get the logs.
