As some of you may have remembered I had se a airsoft gun.... Well I did it again! I actually did this a while ago just decided to make the thread now... It is a fully auto/semi auto electric gun.

It was this gun: <http://www.crosman.com/airsoft/rifles/APR76C>

I was hoping to not get the clear one...but oh well lol

Anyways last time a lot of people asked for the method I gave it and I don't think many people got it, but I figured out how you can most of the time get it but dont want to release yet... I am working on a se forum and I will probably put it in there if you would like to know it pm me ?

Edit: Also will add pics for both of the guns tomorrow ?

Impressive but trying getting a pcp air rifle off of them. They go as high up as \$1500.00

Nice, I think you could of even gone to get a better gun than that,
Crosman is probably the easiest airsoft company to SE, ICS is probably one of the hardest,
because of their T&C's regarding replacements

You have se'd Crosman? I believe they are pretty hard since they will not talk to you unless you have a order number...
