Black Shadow - January 13, 2010, 9:40 pm

Over 8000 icons with Icon Changer 3.8 including serial !

Icon Changer is a software application that makes changing icons on the desktop fun and easy. It's a hassle-free way to personalize your desktop without submerging yourself into reading books about advanced computing.

Simply click the icon you want to change, point at the one you like and that's all. Why change icons? To make navigation easier, to group similar applications together, to customize and spice up your desktop, of course. Try it!.

Moreover, you can use Icon Changer to change personal file icons. You can now assign an icon of your choice to each and every file convenient on your computer. Personalize your computing experiences to make using computer a bit easier and much more.

Thanks for share dude ?

Riss - January 14, 2010, 4:11 am

I can confirm that this works on .exe's also!

bapbop - January 14, 2010, 5:53 am

Works on .exe files, however it seems to delete the content of the file for me, and then creates a 84,5kb file with the icon.

zer0day - January 14, 2010, 6:25 am

Thanks, you can never have too many icons ?

hey can you tell me...how can i change icons by useing this ..thnak u sir

bigfootreturns - January 16, 2010, 12:45 am

This is really good, Although I did have some problems when changing .exe icons.

For example, When I click "set" on a .exe icon, It shows me two options.

The first option is "Change embedded icon, backup file will be created"

Second option is "Adjust windows to display custom icon and don't edit embedded icon. another machine will show the original icon for the file."

I tried clicking them both but the icons do not change, So I am rather confused.

Could you tell me exactly how to change the .exe icon, Sorry If this is really easy to do, I just have a hard time figuring it out :S

Vaksar - January 17, 2010, 9:20 am

I think that the determining thing isn't how many icons you have in the pack. The quality is counted in my humble opinion. It's a great tool and it works properly, thank you.

yes it does work, use the whole key.

McCallum - February 8, 2010, 6:13 pm

I love this program, but it only works once for .exe icons, then I have to reinstall the program.

What happens is after I change the icon of an .exe, for some reason it replaces the icon and the original .exe with the last .exe I modified. I couldn't really think of an easy way to explain this, so sorry if you're confused.

I'm not sure if Windows 7 64-bit is the reason.

Icon Changer is a software application that makes changing icons on the desktop fun and easy.

It's a hassle-free way to personalize your desktop without submerging yourself into reading books about advanced computing. Simply click the icon you want to change, point at the one you like and that's all. Why change icons? To make navigation easier, to group similar applications together, to customize and spice up your desktop, of course. Try it!.

Moreover, you can use IconChanger to change personal file icons. You can now assign an icon of your choice to each and every file on your computer. Personalize your computing experiences to make using computer a bit easier and much more convenient.

Thanks for the share , 8K icons : EPIC man !

lordofthemanor - July 26, 2010, 7:23 am

Thanks a lot.

But it doesnt seem to work for me.

After i SET the new icon it doesnt change it and it builds a smaller file, also without the new icon.

Any advice would be appreciated.

Thank you.

EDIT

It works fine on my rat, but after i bind it with other piece of software and THEN try to change the icon it doesnt work anymore.

What can be wrong?

SomeGerman - July 26, 2010, 7:55 am

If I make a .exe and I want to give it an icon, will it be available for others or it will have the old icon?

Yes you can change the icons on exe files.

Icon Changer is a software application that makes changing icons on the desktop fun and easy. It's a hassle-free way to personalize your desktop without submerging yourself into reading books about advanced computing.

Simply click the icon you want to change, point at the one you like and that's all. Why change icons? To make navigation easier, to group similar applications together, to customize and spice up your desktop, of course. Try it!.

Moreover, you can use IconChanger to change personal file icons. You can now assign an icon of your choice to each and every fileconvenient.on your computer. Personalize your computing experiences to make using computer a bit easier and much more.

glina126 - February 3, 2011, 9:40 pm

hey! i was using this for a while and it WAS the best till yesterday :(Now it corrupts the server. anyone know whats going on with this? did the company crack down on the serial #? i tired uninstalling it and reinstalling it with the sane results. if anyone knows whats going on, or if its only me, please post!

Emily - February 3, 2011, 10:38 pm

Very good Icon Changer but all of them are the same pretty much. All of them just change the icons. Nice work. ?

glina126 - February 3, 2011, 11:02 pm

SORRY! My new server was getting corrupt by this. Not the old one. I guess it corrupts only some servers. Either way im using the old one now. Sorry for any confusion!

too bad it corrupts Spy-Net server. :/ Anyways nice.

Arron XR - February 21, 2011, 12:13 pm

Yeah had this a long time ago but what I can remember you can only change 3 - 6 icons before you have to register it.

I used to uninstall it then redownload.

thanks alot for the share tho bro :D (Feb 21, 2011 10:09 AM)Simonas00 Wrote: [\[CITE\]](#) too bad it corrupts Spy-Net server. :/ Anyways nice.

how it does nothing to the file apart form change the icon.

Downloaded n tested, perfect work!

but...

I think that it removing the content of the file, I mean if I made a keylogger and I changed the icon, the new file with the new icon won't be a keylogger anymore..

Is it right? or I wrong and it's only changes the icon..

Thank you very much!

2_H8 - April 2, 2011, 8:48 pm

Yeah, it woks fine on .exe files. even default windows icons. xD

That is very good if you gonna make payload .exe file to anybode and send it, you change the icon and the file name, they are going to open it. Try to make a payload to anybody and make a exploit/multi/handler in metasploit. ;D

actually no, its doing just that for me, i find the .exe i want to change (its 1mb before alteration) then i find the icon i want it to be then i click change set object and it changes the icon but all the data is gone (it becomes extremely small file) and when i try to execute it, it says the file is corrupt, would u mind putting up a video of how to change a .exe file correctly thnx :)

Yes sure you can but always check that it hasn't corrupted your server, if it does corrupt your server but you

still want to use the said icon, just save the icon you wish to use to your desktop and with a program called

Reshack get a blank .exe and clone the icon to the blank .exe then change the icon of your server using

Reshack with the cloned file.

Press stop and check the folder with the download. It will be there, changed.

What I'm wondering is where the 8000 icons are lol. I only see the default Windows ones.

EDIT: You can search for icons at the top. Click the "Icon" tab and click the search button. THOUSANDS of icons came up for me. It should for you if you have a lot of programs.

pkpwner716 - January 4, 2012, 2:48 pm

=P I was able to use it and it erased like half of my icons that were already there so now I have like half of my things with just white folders. Is there an easy way to fix this? I've already tried to do the reset all icons done in the icon changer but it didn't fix anything.

Edit: I was able to fix this by turning off my computer and turning it back on. Works perfectly now!

Icon Changer is a software application that makes changing icons on the desktop fun and easy. It's a hassle-free way to personalize your desktop without submerging yourself into reading books about advanced computing.

Simply click the icon you want to change, point at the one you like and that's all. Why change icons? To make navigation easier, to group similar applications together, to customize and spice up your desktop, of course. Try it!.

Moreover, you can use Icon Changer to change personal file icons. You can now assign an icon of your choice to each and every file convenient on your computer. Personalize your computing experiences to make using computer a bit easier and much more.
