Thread: [Great App on Android](#)

Derrick420 - March 26, 2012, 11:28 pm

Hey guys found a great and fun app on Android Market. You Must be rooted to use it.

It uses Session Hijacking to get onto other peoples stuff such as emails and facebook's and much more. I use it at coffee shops and such!

It also has anti Session Hijacking method to keep you secure on public wifi networks.

Im not claiming this application as mine. What you do with this app is your responsibility not mine.

Reply or PM me for a link to the download. ;]

EDIT: IT HAS BEEN REMOVED FROM THE APPLICATIONS

But i have a saved .apk file if anyone is interested.

Sp00nerism - March 27, 2012, 5:38 pm

Can I get a link for this? It sounds cool. Thanks in advance :D

SectorHiguer123 - March 27, 2012, 5:48 pm

May I please have the link, thanks mate.

Derrick420 - March 27, 2012, 7:15 pm

Going to now send Private Messages to those that asked. If you also want a tutorial on how to use the application PM me and i will post a tutorial.

Sp00nerism - March 27, 2012, 7:59 pm

Yeah, you should post a tutorial, but also, if you look on the site, it says it will be discontinued... so no more downloads unless you find a 3rd party source. Also, it does require BusyBox, which requires ROOT.

Derrick420 - March 27, 2012, 8:22 pm

Okay i will post a tutorial when i get time to. Should be up in a couple hours. But i have a copy of the .APK file if you didnt get to download it!

Nah, its fine, I'm smart enough to google a mirror download, lol, I have it and I have BusyBox, I just

need to root my phone, haha

Derrick420 - March 27, 2012, 10:06 pm

Get the app and read the tutorial from:

droidsheep or faceniff, there are no other apps for android that do that! Google has both.. and 4shared which is a free app on the market!

also both work on unpatched sites on the galaxy s3!

Arman? - December 16, 2012, 6:05 am

Can I have this please? I am very interested!

madvideos - December 16, 2012, 6:21 am

understand that these apps only grab sessions, they DO NOT get passwords! If you want to do that you need BT5 R3 and use Wireshark, Subterfuge which is a GREAT MITM attack! If you are on the move and don't want to spend the time to set up scripts in etter and running apache.. and blah blah..
